RETAIL FOOD PRICES ON DECLINE IN NOVEMBER
 Retail food prices decreased during November, the Bureau of Labor Statistics announced yesterday.
 The cost of twenty-two articles making up the retail food index carried by the bureau, decreased 2½ per cent as compared with the cost during October, it was announced.
 The report shows, however, that between November, 1919, and November, 1920 the increase in the cost of twenty-two food articles was 1 per cent.
TYPHUS SPREADS FAST AMONG STARVING POLES
 With Government reports estimating the number of children infected with tuberculosis at 40 per cent, typhus spreading at an alarming rate among the undernourished population, and an estimated food supply sufficient to last only four months, Poland is facing her darkest winter, according to reports received by the American Red Cross.
