

THREE CHILDREN DROWN; MOTHER AND BABY SAVED

Taxicab With Six Occupants Plunges From Ferryboat Into River at Brownsville, Pa.

BROWNSVILLE, Pa., July 6.—Three children, aged four, six and eight years, members of one family, were drowned, and their mother and baby brother had narrow escapes from drowning yesterday afternoon when a taxicab in which they were riding ran off a boat at the ferry across the Monongahela river a short distance above Brownsville.

from their home here to Alicia when the accident occurred. When the taxicab driver drove his machine on the ferry, according to witnesses, he failed to apply the brakes, and the machine went over the end of the boat into the water.

Mrs. Blocham had an eight-month-old baby in her arms, but he was thrown free when she struck the water. Although her right arm was broken in the accident she swam to the baby, which was floating down the current, and, seizing it, managed to keep herself and baby above water until rescuers could reach them.

The other children sank quickly and did not come to the surface. A few hours later the bodies of two were recovered. Rescuers are still searching for the others. The driver of the taxi escaped injury.

Ohio's Sam McGee.

MARTINS FERRY, Ohio, July 6.—With the mercury in the 90's and trying to make 100, a man walked through the business district here wearing an overcoat.

He had the garment buttoned close about his neck.

The spectacle almost halted traffic.

WARE MOTHER-IN-LAW, JUDGE WARNS COUPLE

NEW YORK, July 6.—A warning to husbands and wives not to complicate matters by going to live with relatives "in-law" was issued by Supreme Court Justice Frank Gannon in Brooklyn yesterday while hearing an application in the separation suit of Wallace Brown, who charged "too much mother-in-law."

Justice Gannon held also that women must now expect the same treatment as men under the law.

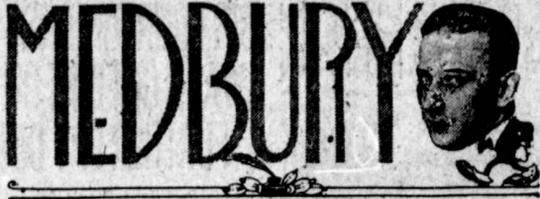

GIVEN JAIL TERM FOR TRYING TO SEE FIGHT

NEW YORK, July 6.—Abe Charden, who plays the saxophone in a Brooklyn theater, pleaded guilty yesterday to having tried to steal an automobile for \$600, so he could see the Dempsey-Carpenter fight. The judge gave him a chance, but Abe wasn't there.

"Can you play a requiem, of the Leg of a Duck, written by J. O'Brien and danced to by the children in the street," asked Judge McMaon.

Abe could play neither.

"I'll give you three months in jail to learn both tunes," said the judge.

Says Pomeranian Dogs Grow in Tenor and Bark in Falsetto

By JOHN P. MEDBURY.

Summer is here and the little Pomeranian dogs are leaping from lap to lap.

A Pomeranian is an animal which is too small to be a rat and too large to be a mouse.

They grow in tenor and bark in falsetto.

They're what you call wrist-watch dogs.

Sportsmen call them cushion hounds. They can't sleep on anything but an upholstered chair.

They can't get a good night's rest on any piece of furniture which costs less than five hundred dollars.

They're so small that they can use a mouse trap for a dog house.

You can cover them with a postage stamp and tuck it in around the sides.

They can sit on a calendar and leave twenty-nine days visible.

They're known as limousine mongrels.

They won't ride in any machine unless it's driven by a chauffeur.

You've got to feed them off of Haviland china or you spoil their dinner.

People who own Pomeranian dogs punish them when they're naughty by making them eat in the kitchen.

They're wonderful fighters and can lick anything twice as small as they are.

Pomeranians are so strong, that it only takes three of them to carry a bone out of a lamb chop.

They're very artistic and bury their bones under beautiful Turkish rugs.

A Pomeranian dog is very athletic and loves to dig in the dust on the velvet rug in the parlor.

One woman lost her Pomeranian pup and it was very hard for her to lose him. Her husband was beginning to think it was impossible.

They get into everything in the house and you have to shake your shoes out in the morning before you put them on.

They're very good protection against burglars. A burglar will never enter a house where there's a Pomeranian. He's afraid the dog might follow him home.

They go to sleep in a flat and snore in high C.

NEW DOWNTOWN POSTAL STATION OPENS TODAY

Monday morning will mark the delivery of mail from the new postal station on the first floor of the Post-office Department building, which will take the place of the Eleventh street station. Twenty-seven carriers are to be assigned.

The branch is open for business today, and has been equipped for carrying out all postal business of the main office, with the exception of general delivery. The office force of the station formerly at Eleventh street will carry on the business of the new station.

BIG SHIPMENT OF GERMAN GOODS REACHES NEW YORK

NEW YORK, July 6.—Twenty-two hundred tons of German made toys, cutlery, and glassware—the largest shipment of German goods since the war—arrived here yesterday on the Hudson of the United States Mail line. There were 300 riders-to-be from Europe aboard the liner.

'WARE WASTE AND WEAR WELL'

Human Bodies Are Poisoned by Their Own Waste. Most Illnesses Are Preventable.

The human body has to be heated and fine foods burned inside the body to produce energy. All this waste should be removed from the body regularly, thoroughly, daily, by the eliminative organs,—which are the bowels, kidneys, skin, and to some extent the lungs. These should act in harmony—if the bowels are inactive extra effort is required of the others, which easily become deranged. Many medicines will force bowel action temporarily but the after-effects are harmful. Many remedies are advertised, some of which have proven year after year to be reliable, efficient, and without harmful action or effect. Take Beecham's Pills for example. For over 70 years Beecham's has been a household word all over the world. 70 years of use by all sorts of folks, men, women and even children, have proven first, that Beecham's Pills do what is claimed for them; second, that they are harmless, do not produce bad effects. Some medicine forces Nature to unnatural action. Other medicines, like those contained in Beecham's Pills assist Nature, act mildly, persuade and hence produce no harmful effects. It is common to find families in which Beecham's have been used by several generations; their use handed down from father to son and from mother to daughter.

That's the best possible recommendation for any remedy. Every druggist sells Beecham's, is glad to do so because he knows that their reputation has been won by merit.

MEETINGS PLANNED TO PROMOTE PLAYGROUNDS.

Mass meetings to advance the cause of children's playgrounds are to be staged by the Columbia Heights Citizens' Association, following a meeting last night at which many needs of the District were discussed.

Tom Moore was thanked for the use of the big lot between Fort and Park road during the past two years. He intends to build a motion picture theater on the playground site, and several hundred children in that neighborhood will be without a place to play in the location.

Resolutions favoring car fare reduction, recent appointments to the District Supreme Court bench, the Keller bill and increase of facilities in Rock Creek Park were adopted.

Regular meetings were adjourned until October.

LOUISIANA RENT HOGS CAUSE BITTER PROTEST

NEW ORLEANS, La., July 6.—The Louisiana housing commission yesterday announced it would go before the special session of the Louisiana legislature in September of this year and ask laws to protect the people of New Orleans, Shreveport and other cities from "rent profiteers" who are overcharging for rents.

Fifty thousand people in New Orleans have been called upon to give the commission data regarding rents, and already several thousand have responded.

ENLARGEMENT OF HISTORIC CHRIST CHURCH STARTED.

Enlargement of Christ Church, one of the oldest, most picturesque and historic Episcopal churches in Washington, is under way. Christ Church is located at the navy yard. It is expected the improvements will be completed by September.

From a tobacco warehouse in 1780, the church has constantly expanded. It was first instituted as a parish in 1793, according to the records.

JAPANESE PAPERS APPLAUD U. S. PLAN TO DECREASE NAVY

Borah Disarmament Resolution Meets With Indorsement, But Some Editors Skeptical.

By International News Service.

TOKYO, July 6.—"Is the United States prepared to entrust the defense of the far east to the Japanese navy?"

With this as a leading question, the Tokyo Nichi Nichi takes up the question of a possible disarmament conference called by President Harding.

"The Nichi Nichi fears that, even if the conference were held, it would prove a failure.

Other Japanese newspapers as well as the Nichi Nichi question the motives of the United States and declare that the general American policy is not in line with an apparent desire to retrench in armaments.

"The passage of the Borah resolution in the United States is proof of America's desire for retrenchment in the matter of naval expenditures," said the Nichi Nichi.

"There have been naval agreements concluded between rival maritime powers in the past. One of them was concluded between England and France, and the result was that England concentrated her navy in the North Sea, while France undertook the patrolling of the Mediterranean. But this particular agreement does not serve as a pointer to the course which are involved in the present proposal for a conference. English and French could agree on the demarcation of their own field because they felt a menace from Germany. In the event of disarmament being discussed by America, Great Britain and Japan, there is no common enemy to necessitate the division of the field of service of each of the countries concerned.

"If the proposed arrangement is to do anything it must be competition in the Pacific. But how are the powers to divide their respective fields in that part of the world? Is the United States prepared to entrust the defense of the Far East to the Japanese navy?"

All indications point to the probable failure of this arrangement. The United States is opposed to the idea of confining her navy to any other sphere but the Far East.

"Those acquainted with the history of the present naval program of the United States realize that there is no ground for belief that the United States will keep out of the eastern Asia. It is known that it is part of America's program to extend her zone of influence in Asia.

"At the proposed conference the question of limiting construction and the abolishing of submarines, as suggested by the league of nations, undoubtedly would be taken up; but there is no reason to believe that such action would be adopted. Existing conditions are the clearest answer to this and other similar propositions."

The specific answer is provided by Great Britain. Great Britain is one of the strongest supporters of a naval holiday. Her finances are not in satisfactory condition. Nevertheless she has decided upon a significant program—a program providing for the building of some of the most powerful battleships the world has ever known.

"When the problem is thus considered one cannot but feel that there is little hope of the proposed disarmament conference arriving at any decision which will make a permanent reduction of armaments."

SUSPECT'S BALD HEAD FREES HIM OF CHARGE

FAIRMONT, W. Va., July 7.—To the fact that his head is bald, Joe Larossa, of Fairmont, owes his freedom, possibly his life.

Larossa was accused of being one of the men in the murder car from which Rocco Verdington was shot to death on the night of May 30.

L. C. Straight, the only witness introduced by the State when Larossa was arraigned today before Magistrate Billingsley, said that Larossa's features, figure and clothing were identical with those of one of the men in the murder car. But the men were not the same, he said, for the participant in the shooting affair had black, curly hair.

Larossa can boast but few hairs on his head, but tonight he is a free man.

Tomorrow—in the Palais Royal—Bargain Basement.

Court's Decree Clears Title Barriers to Sale Removed

The SOUTHERN BUILDING

Fifteenth and H Sts. Northwest

Washington's Most Popular Office Building. Located Right in the Heart of the Great Financial District of the Nation's Capital. A Building That Is Nationally Known.

WILL BE SOLD UNDER THE CO-OPERATIVE PLAN

The finding of the court has made it possible for Allan E. Walker and William L. Browning to take title to the building for the Allan E. Walker Investment Company, and its sale on the improved Walker co-operative plan will proceed quickly to consummation.

porations for occupancy, and to investors.

In addition long term leases will be made to responsible concerns and individuals at \$2.75 to \$3.00 per sq. ft.

Purchase of space in this building gives to either tenant, prospective tenant or investor, an opportunity seldom offered wherein actual returns are so great and the security so sound.

Sale of space will be made to present tenants, to individuals, firms and cor-

To Be Sold at \$1,000,000 Less Than Cost of Reproduction

In Six Years A Purchaser Pays Less Than a Tenant

Here's the Plan in a Nutshell

Initial payment of a sum equal to about two years' rental, and monthly payment of a sum approximating 75 per cent of the rental value, for a period of 139 months secures ownership and permanent occupancy, under the improved Walker plan of co-operative ownership.

THE TENANT

This offering makes it possible for the acceptable individual, firm or corporation to own its business home in the most advantageous location, without tying up tremendous amount of capital in building. It is a fact that no such opportunity will be offered in Washington again at a figure so far below the cost of reproduction, to say nothing of location, which is impossible of duplication.

THE INVESTOR

The investor in either large or small amount of space in the Southern Building is offered a most attractive return under the more normal conditions. The security is so sound, and the returns so generous, that it will may be said that few investors have been offered such profitable opportunity.

The value of known location in a nationally known building is tremendous and increases with each year of possession. Co-operative ownership will make possible a business home satisfaction that is impossible to attain any other way. It will lower cost of operation. It will raise the standard of occupancy.

As to the future, the history of American and foreign cities is that although retail districts have a stability that is but for a term of years, the financial district is like unto the rock of Gibraltar—immovable.

Permanent occupancy-possession and a permanent tangible asset, increasingly valuable as the years pass by—instead of a mass of useless rent receipts.

Thus with the growth of Washington and its increasing importance in the world of finance, the security becomes more valuable—the asset of ownership a thing of steady, certain enhancement.

Under the Walker Plan, with initial payment, monthly payments, interest on both, it costs less in actual cash to own than to rent.

Investigation of the Walker plan of co-operative ownership, the financing and all of the details, will convince the most conservative of the sterling character of the investment in space in the Southern Building.

The Reason for the Low Price Asked

Nearly three years ago we made the initial deposit for the purchase of the Southern Building. Litigation prevented the passing of title. During that time the enhancement in value has been tremendous. Hence we are enabled to offer the Southern Building on the cooperative plan, at a figure so far below its actual value.
