"Carnation Day"

The custom of wearing a carnation upon the anniversary of the birthday of President McKinley, will be kept this year, as usual "Carnation Day," to-day, January 29th, will be commemorated by the wearing of a carnation, the favorite flower of the martyred President. This custom was established by the Carnation League of America.

A horse of Sheriff J. O. McDermitt got out of his stable one day last week; while running and jumping in a playful manner, attempted to jump the high iron fence at the school house, which resulted in his two front legs being badly out and the flesh torn from them by the sharp iron pickets. The horse will get well however.

We regret to see a disposition on the part of a few of our young people to quit school. Stay at school another year or two and don't be ashamed of what ought to be your glory, that you want to learn more. Step from the district school to the high school, from the high school to college, if you can. Get a business education by all means.

Abandoned the Bag.
The Parkersburg Sentinel mentioned a few days ago that George Davis had invented a tin ferret for hunting rabbits. The affair was given a trial Thursday by Art Hastings and several other nimrods, and it worked like a charm. They got all the rabbits they could carry home and then some. The tin ferret has the natural ferret and rabbit dogs beaten a block and it is quite a simple arrangement. A tin horn is tied to a pole and there is a long rubber tube attached to the horn. The horn is moved into holes or burrows occupied by the rabbits. One of the men blows the horn through the long hose and the other holds the sack at the opening. The thing worked all right until they thrust it into a burrow occupied by a pair of skunks. The pair busted out into the bag but the hunters did not bring them home, abandoning the bag in a hurry.

To all persons interested in the navigation of the Kanawha river. It is dangerous to the men and works to put the movable dams up or hold them up with ice in the river, and it might become necessary to put them down at a stage of water that will ground boats in shallow landings. You are therefore cautioned as to holding boats at landings during the winter months where there is not ample water with open river. Yours truly, Thos. E. Jeffries, Assistant Engineer.

Capt R E Gaches returned yesterday from a business trip to Cincinnati.

THE DEARDORFF & POORE CO'S
JANUARY
Stock Reduction Sale

It has a ways been our custom to close out odd lots and lines of goods that we discontinue carrying in January before stocktaking but this year we intend to make a General Reduction all over the house. Ready to wear Garments come in for the heaviest cuts, such as Cloaks, Tailored Suits, Furs, Shirt Waists, Sweaters and Skirts.

Cloaks, Furs, Waists and Skirts 1-4 Off
Suits 1-4 to 1-2 Off.

The reduction on most other lines will be 10 per cent except such lines as we desire to close out which will be cut more and the lines that are sold under contract, not to change the price, there will be no change.

Market conditions do not warrant a penny reduction in Dry Goods of any kind, in fact some lines that we are compelled to buy and have bought for Spring, are higher than they have been, and our advice is if there is anything in our stock that you will need in the next three or six months, buy it during this sale; you could not invest your money better.
