

DAILY GAZETTE.

THE PEOPLE'S COLUMN.

THE WORK OF RADICAL POLITICS. A day or two ago a ship arrived at New York with ten so-called Ku-Klux prisoners from South Carolina. They were marched through the streets of the metropolis, shivering with cold, under strong guard.

Whether these men are guilty or not, it was scarcely necessary to imitate Russia, which transports her prisoners to Siberia, by sending them so far north where the climate itself will add new tortures and perhaps death to the severe penalty of penitentiary confinement and labor.

At their meeting on Monday, the New York Methodist preachers had a warm discussion on the doctrine of "annihilation of the wicked."

The British steamer Sparrowhawk has been ordered to Honolulu. She will reach there about the same time as the United States steamer California.

The Patent Office closes the year with all its business disposed of, no patent cases being now before the Commissioner or his Assistants.

The Philadelphia Press is out promptly for the annexation of the Sandwich Islands. It thinks the group may be had for the asking, and if our Resident Minister has properly exerted himself, may be even now floating the Stars and Stripes, and calling itself the United States Territories of the Sandwich Islands.

A BRUTAL COCK FIGHT.—The cock fight between New York and Troy, arranged at Saratoga last summer, for \$500 each and \$5,000 for the odd lot, each party fighting twenty-one birds, came off Friday, somewhere between New York and Albany, at an antiquated run mill.

THE GREEN OBSTACLES TO EMIGRATION.—The Gazette of Berlin explains that the partial revocation of reduced fares for emigrants on the State and private railways in Germany is a question of internal administration, and was resisted by the government by considerations of political economy.

THE MISSOURI LEGISLATURE MEETS TO-DAY.—There is a lively interest among the members on the question who shall succeed General Frank Blair as United States Senator. A caucus of all Democrats who desire to maintain their party organization, and who believe that Democrats should organize the Legislature, change its policy and control the election of United States Senators, has been called to meet to-day.

THE MIKADO OF JAPAN.—The Mikado of Japan, as described by the Japanese Gazette, is about five feet, 10 inches high, of dignified bearing, slightly built, of darker complexion than the majority of higher-class Japanese, with a thin, composed, somewhat Mongolian cast, full lips, and dark eyes.

PHILADELPHIA IS THE NEXT CITY TO CALL FOR A VICE CONSUL.—National and State politics are somewhat municipal affairs still, in that no one would dream of neglecting their administration in a foreign Republic.

MURDER FOR MONEY.

Not in this country alone, but in Spain as well, it seems a favorite way of disposing of a murdered victim to cut up the body and distribute the parts so that they never will return to their old relationships. A case is now on trial at Barcelona involving circumstances of this sort.

When Charles II. was brought back from his exile and restored to the throne of his fathers by the almost unanimous consent of the nation, which had become disgusted with fanaticism and fanatics, the Round-heads, fearing that the punishment which they felt was due to their crimes might overtake them, adopted the wise and safe plan of emigrating, and chartering the Mayflower and other ships, and being joined by those of their party who had previously emigrated to Holland, sailed from England and landed at Plymouth Rock, since celebrated as the landing place of the Pilgrim fathers.

Thus we find that the opposite sections of this country, the North and the South, were originally colonized by essentially different classes of men, and their descendants, to this day, differ as widely from each other in their principles and feelings, and indeed in their prototypes, the Cavaliers and the Round-heads of old England.

The northern Colonists, consisting in a great degree of the artisans, tradesmen and agricultural laborers of the old country, were able to clear up their forests and cultivate their clearings with their own hands without the assistance of slaves, while the Colonists of the south, being the landed class at home, and unaccustomed to work or labor, found themselves under the necessity of looking around for laborers, and seeing no other alternative, supplied themselves with slaves from Africa.

This is the true history of the causes which led to the importation and employment of African slaves. It is not that the people of the North are, in their hearts, opposed to the institution of slavery, but that they are hostile to the very existence of a race born between the Tropics. They have no rice fields, no sugar or cotton plantations where only they negro race can work and live.

The suppression of the New Orleans Times.—The Times, which takes the place of the New Orleans Times, recently seized by order of Judge Durell, comes to us in neat and attractive shape, although greatly reduced in size. At its head is the announcement: "Born Saturday, December 21st, at 10 o'clock P. M."

TOO MUCH SOLDIER.—At a late celebration of the New England Society, in New York city, General Sherman, according to a report in the Washington Chronicle, said: "We ought to be prepared on the very shortest notice to organize an army, and if he or any other general had power to lay his hands on the best of young men in Broadway they could have an army equal to any in Europe."

THE MISSOURI LEGISLATURE MEETS TO-DAY.—There is a lively interest among the members on the question who shall succeed General Frank Blair as United States Senator. A caucus of all Democrats who desire to maintain their party organization, and who believe that Democrats should organize the Legislature, change its policy and control the election of United States Senators, has been called to meet to-day.
