

ADDITIONAL TELEGRAPH. WASHINGTON.

WASHINGTON, August 23.—During the first year that the business of the late Freedmen's Bureau has been under the charge of the Adjutant General's office...

The Secretary of the Treasury has directed that the interest due September 1st, amounting to about \$5,000,000, be paid on and after August 25th, without rebate.

American Association for the Advancement of Science.

PORTLAND, Me., August 23.—At the morning session of the American Association for the advancement of science, S. H. McAllister, of Akron, Ohio, and nine others were elected members.

The Association afterwards broke up into sections. The discussion on Prof. Fowler's anti-evolution paper was continued in section A by Dr. Dawson and Prof. Morse.

Dr. Dawson gave a description of a specimen of scyllaria showing the marks of fruitification.

Prof. Wheeler read a paper on the Arctic regions—their geography, climate, ocean currents and other phenomena, considered with reference to the atmospheric theory of an ameliorated climate and open polar sea.

At Locust Point, Baltimore, Saturday afternoon, while a vessel was being loaded, the chain of the chute broke, instantly killing one man and dangerously wounding three others.

Henry Crow, of Burlington, Iowa, was drowned Sunday morning, by the upsetting of a boat in which he was crossing the river at Memphis.

The Terrors of Vacation Time. New Yorkers who have spent the summer in the city without being murdered, or drowned, or robbed, or crushed to death, certainly have reason to congratulate themselves.

DELIGHTFUL.—Yesterday was one of the most delightful days of the season, to the delight of all who sought recreation out of the city, as well as those who were fortunate, or unfortunate, enough to remain at home.

LARGE FUNERAL.—The funeral of Mr. Montgomery, of the Eighth Ward, was very largely attended yesterday afternoon.

MUNICIPAL COURT.—In the Municipal Court, Judge Chamberlain presiding, on Saturday, the following business was transacted: Case of J. M. Brodie vs. John Clator, continued; case of McLaughlin vs. Roberts, continued until Friday.

BEAUTIFUL.—Mr. Pickett, the scenic artist, is busily engaged, with his assistants, on the scenery for the new Opera House. Judging from what he has already done we can most emphatically pronounce him a true artist, and we promise that the scenery for the Opera House will be about ten thousand per cent better, in every respect, than any ever before used in this city.

A GOOD ARRANGEMENT.—His Honor Judge Cramer, of the Municipal Court, feeling for those unfortunate who were compelled to remain in the lock-up two whole days and nights, if arrested during Saturday afternoon session of the police court at four o'clock.

DEATH OF MR. O'CONNOR.—Mr. Charles B. Cecil died on Saturday night, after an illness of only a few days. Mr. Cecil has been quite well of late, but had a stroke of paralysis a few days since, from the effects of which he died.

DEATH OF MRS. DR. CUMMINS.—Mrs. Annie E. Cummins, the estimable wife of Dr. James Cummins, died at the residence of her husband in Centre Wheeling, about ten o'clock Saturday evening, after an illness of only a week.

ACCIDENT IN THE FIRST WARD.—Saturday evening last, some boys in the First Ward got an old axle with the wheels attached and were having a high old time riding down Market street between 6th and 7th.

ACCIDENT ON THE B. & O. R. R.

An Emigrant Train Thrown Down an Embankment.

Emigrants Become Enraged and Stone the Train Men. A very serious accident occurred on the B. & O. R. R. yesterday, four miles west of Cameron, by which three or four German emigrants were killed and fifteen or twenty wounded.

The accident was caused by the spreading of the track, which threw the tender, the express car, and one passenger car, down an embankment, and all the coaches of the train off the track.

The coach that went over the bank, some 15 or 20 feet, was new and just out of the shop, and contained some seventy or eighty men, women and children. The car turned bottom upwards, the trucks with it.

Some of the emigrants became enraged, thinking that the engineer and conductor were trying to kill them, and set upon those officers of the train with stones, and they had to flee for their lives.

In an hour or two after the accident occurred the express train—which was an hour and a half late, came up, and its officers, directed by Capt. Devry, who fortunately was a passenger, rendered all necessary attention to the wounded.

Capt. W. H. Harrison was also on the train and rendered valuable assistance. A couple of surgeons were sent from Cameron, and so soon as the track was cleared the unlucky emigrants were sent to Bellairs, where every comfort was supplied them.

Of course no blame attaches to any one for the accident, as it was one of those sad calamities which no human foresight could avoid. The wonderful part of it is that the result was not more fatal.

How It Works.—Not many days ago a certain woman in our city considered that one of her neighbors had highly insulted her, and so she gave her a "piece of her mind," and then demanded an apology, which she did not get.

She concluded she had just cause for getting out a warrant for her neighbor's arrest, which she did and had her brought up before the Squire. After a hearing of the case the Squire concluded one was about as much to blame as the other, and fined them both. Neither was then willing to stop, and so the case went before the police court, and both were again fined.

So far as the law went that ended it. But how much satisfaction had either got? In the first place the fines and costs amounted to \$30 each. In the second place all of their neighbors had been sworn and every word that either had said about the other, for a month past, that was unbecoming a lady, was brought out in court. Many things were sworn to upon any check. And now that they have suffered in purse, in good name and in self respect, they are deadly enemies. How much was gained by "going to law" about a trivial family quarrel?

HE DIDN'T GO.—As one of the boats was leaving the wharf for camp meeting yesterday, four or five gentlemen might have been seen making a lively chase for the departing boat, which was dropping down past the Science, which was tied to the wharf. These gentlemen knew that if they could get on the Science in time, they could get from there onto the moving boat without trouble.

The three most men were young and ran up the spar, that reached from the deck of the Science to the shore, like squirrels. The gentleman who brought up the rear was not so young, and was about as heavy as any two of the younger men. But he thought he could also run out the spar.

He tried it. He made three or four steps successfully; but alas! his foot slipped and he came down astride of the spar with a force that threatened to break it, and bounding a foot or two came down again, to the delight of a large crowd on the wharf and along Water street. As the gentlemen didn't care about riding back to Moundsville he concluded he wouldn't go.

BEFORE JUSTICE MCCORMICK.—On Saturday, James Currens and Samuel McVey got into a muss and were arrested and taken before Squire McCormick on a charge of tumult and disorder. The Squire discharged Currens and fined McVey five dollars and costs for disorderly conduct and six dollars and costs for contempt.

The case of Nicholas Miller, charged by George W. Hughes with threatening to end his existence with a butcher knife, was also continued until Monday evening owing to the absence of material witnesses.

THOSE SUPERB STEINWAYS.—Who is there whose soul is not fit for "stratagem and spoils" that does not take an interest in a beautiful Steinway Piano.

We saw a very choice new impulse of them on Saturday, which had just been received by Messrs. Adams & Lucas, 109 Market street, the sole agents for them, embracing the elegant plain Piano and the beautiful upright or Boudoir Piano. An admirable specimen of each of these classes have just been sold and taken to the residences of two of our citizens living on the Island.

Their tones are the embodiment of all that is lovely, sweet and sympathetic in music, and which distinguishes the Steinway Pianos above all others. Possessed of such surpassing musical qualifications, it were a wonder if their popularity in this country and Europe would fall short of the overwhelming measure now actually enjoyed by this mammoth Piano Establishment of the world.

A RARE CHANCE.—Persons desiring anything in the way of clothing or furnishing goods will find it to their advantage to call upon Mr. C. H.
