## Important to Buyers of Silks

Owing to the failure of the French, Italian and Spanish silk crop, manufacturers have advanced the price of silks, and they will be still higher.

Anticipating this we bought a large stock as early as March. At that time they reached the lowest point ever known in the silk market. We now offer them at our old prices, no advance being made by us on those justly popular goods, which stand on their merits, as being unequalled for value and elegance.

ALL PRICES FROM 75 CENTS TO \$3 00.

## DRESS GOODS.

During the past few days we have made marked reductions in the price of our entire stock of Dress Goods, that must and will be sold in order to make room for fall stock.

## MR. ARTHUR BROWNE.

The Mysterious Packet in Possession of Chairman Browne in regard to Him? They Want to Suppress the Facts to "Let the Old Man Down Easy."

We yesterday announced the fact that Arthur Browne had resigned the position of Superintendent of the City Gas Works and at the same time published the communication of the Special Committee of Investigation in regard to the affair. This communication was remarkable only for its brevity and its vagueness. The committee, evidently aware of this fact, and of the substance of essentials, had prepared a second, and from what we have been able to learn a very voluminous report, minute in its details and explicit in its nature. This second report was to be produced in case there would be a demand for it by Council, and would clearly show not only to that body but to the people whom they represent the exact status of affairs in regard to the Browne resignation and the communication thereto. This report or two of the special committee were very anxious to suppress for the time being at least, and as Council was deeply absorbed in the consideration of other business at the time of its presentation, this object apparently attained.

deed, the Chairman of the Special Committee seconded the motion referring the first paper to the Committee on Light, which was done. The contents of the unread communication however were indicated by some one and they were known to quite a number of spectators at the meeting of Council, who went there to hear them at length and to see the action of Council in the matter, and to say the least they were disappointed at the non-appearance of the paper, especially after it had been demanded by one of the members. The motive for this could not be understood, and yesterday we called upon several members of the Investigating Committee to learn the object of their suppression and they were unavailingly "down" on the whole matter. One of them in particular was more pointed than elegant in his remarks toward their Chairman.

Dr. Reeves was called upon in the evening, and stated that he wanted to let the old man down "as easy as possible," and they had done it. He utterly refused to divulge the contents of the document in his possession, or to indicate its contents in any way.

Another member said that "the committee was ready on Tuesday evening to report, and the public was expecting it. The body of the report, he said, was mainly from Browne's own book, and could not be controverted." Another told us that in not even a cursory examination of Browne's book eighteen or twenty instances of gross neglect or favoritism were found, and the very trustees who were supposed to be the most impartial and unbiased of men, on account of these gross irregularities apparent upon his books. Numerous instances were found of favoritism, as for instance the "Fruit House" meters three were put in in 1873, we think it is stated, these were new, but in his book they were charged as only rest, and the entry for cost is as such. Similar instances occurred frequently, as in the cases of John Duer, J. G. Smith, John Maxwell, Andy King, and others. If they were not put in for resetting they were for meter services and other matters. The discovery of these irregularities was the occasion of last Friday afternoon and Saturday night's meeting. On that evening the committee on Light, the Investigating Committee to meet with them in order that the latter might see the true state of affairs and also understand the run of things at the Gas Works for the last several years. From the evidence adduced at that meeting and the city yesterday, corroborative evidence that was presented, an informal meeting of the Board of Trustees was held on Monday morning, and after a thorough canvass of the situation, it was determined that the President should go to Mr. Arthur Browne and ask him to tender his resignation at once, and also to indicate the alternative in case of refusal. The resignation was handed in that evening, at another meeting, whereupon Mr. Geo. K. Wheat moved that it be accepted and Mr. Kilgus seconded it, and immediately moved the suspension of all further proceedings for the present.

A meeting was held at the office last night, at which time a statement was taken, and Mr. Browne relieved from duty. We were, however, told that nothing indicated either in Browne's book or in any of the books the fact that Browne had ever received a cent of money, or had in his possession a single dollar, or had been paid for any services rendered.

"The charge against him," said one of the committee, "is his neglect of duty and irregular way of doing business; nothing more."

The Doer was before the committee on Friday, and made a statement that he had been cognizant of these facts before, and had refused to answer the questions then put him, and explained that the reason was "that it was a matter of bread and butter with him." He also made a statement in regard to the gas used by him at his house and for which he had not paid. Such in fine is the information we have been able to obtain in the matter, and by the greatest exertions, gathered from the committee, and from the substance of the report that will probably be submitted to-morrow evening at the meeting of Council.

COMMONWEALTH DISTRIBUTION CO. Next Monthly Drawing, August 10th. Unprecedented Success of the new and original feature of allowing any Ticket-Holder present the privilege of calling out his number and if placed in the Wheel. Why don't they all do it?

The last drawing of the Commonwealth Distribution Co., in Louisville, Ky., was the grandest success of all. Macaulay's Theatre was filled to overflowing and many persons called out the numbers of their tickets which were readily shown them and placed in the wheel. The numbers representing all the tickets from 1 to 100,000 are accurately printed by machinery, spread out on a table and so arranged in a series of 100 that it is only the work of a moment to pick out a number. In fact, there are ALL NUMBERS THERE, as it is impossible to know what numbers will be called for. This is a sure prevention against fraud or favoritism. The next drawing will be conducted in the same manner and the same splendid scheme presented, viz: 1900 prizes amounting to \$112,400. Orders are pouring in from all parts of the country so great is the confidence in the integrity of the Company. Tickets are only \$2; halves, \$1. See advertisement.

It is a fact well established by unquestionable testimony that Hall's Hair Renewer cures baldness, restores the hair to its original color and lustre, faded gray or discolored hair, cheaply, quickly and surely. The poorest people prefer to buy it, rather than to purchase a more expensive and more forcible than woods can delineate, through blanching looks or grizzly beard, that they are aged and passing to decay. A very short trial will convince the most skeptical that it does eradicate the scalp diseases which rob the hair of its color and life.—Fort Scott (Kan.) Daily Monitor.

A Famous Article. Glenn's Sulphur Soap has won great celebrity and sale by sheer force of its astonishing effect in curing skin diseases, and eradicating all eruptions. Price 25 cents a box. ## One Week in Wall Street.

October 7th, 1878, Western Union Telegraph stock sold at the New York Stock Exchange for 93.1-8 per share; October 14th, 1878, it sold at 83.3-4, a fluctuation of 9.8-8 per cent in seven days; 12,500 shares sold on a margin of one per cent required an actual capital of \$12,500. The same stock delivered at 83.3-4 gave a profit of 9.8-8 per cent on the stock, or \$937.50 per 100 shares. On the whole 12,500 the actual profit was \$117,187.50, or 9.5-8 times the capital used in one week. This is a single case taken from the official record of the Stock Exchange, and shows how money is made so rapidly in stocks. Few people, however, have the necessary cash to put up in order to realize such immense profits as these, but capital in any amount from \$10 to \$50,000 can be used with equal success by the new combination system of operating in stocks which Messrs. Estoring & Co., Bankers, New York, have established. By this method of pooling thousands of orders in various sums and operating them as one immense capital, shareholders realize large profits which are divided into two parts, one for success, and full information, so that any one can operate profitably. Stocks and bonds wanted. Government bonds supplied. Apply to Lawrence & Co., Bankers, 57 Exchange Place, N. Y. City.

The invalid finds in "Dr. Lindsey's Blood Searcher," nature's great restorer. It is wonderful.

If Baldness or a Deficiency of Hair Exists, or if the Hair is gray, dry or harsh, the natural youthful color can be restored by using "London Hair Color Restorer," the most delightful article ever introduced to the American people for increasing growth, restoring the natural color, and at the same time a lovely hair dressing and beautifier. It is totally different from all others; not sticky or gummy, and free from all impure ingredients that render the hair greasy and clogging, and it is quickly performed, made so clean and elegantly prepared as to make a lasting hair dressing and toilet luxury. A. J. Tynes, a prominent citizen, Wilson, N. C., writes: "Some ten years ago my wife's hair commenced falling out, and got very thin and gray; but after using 'London Hair Color Restorer' the scalp became healthy, the hair stopped falling, the color was restored, and is now growing beautiful."
