The Intelligencer.

FREW & CAMPBELL

liber Nos. 25 and 27 Fourteenth Stre

NATURDAY MORNING, APRIL 30. THE Morgantown Post says that more attention is being paid than formerly in Monongalia county to breeding large horses. The Clydesdale horses are now

THERE is to be a reunion of Washington county, Pa., people up at Brown's Island on the 23d of June. The affair is under the auspices of a Steubenville committee of Washingtonians.

THE death of General Joe Lane leaves enly two surviving Generals of the Mexican war-General Harney, aged 81, and General Robert Patterson, of Philadelphia, in his 90th year.

ROANE COUNTY seems by a letter in the Parkersburg Journal to be considerably stirred up to the importance of securing the Wheeling, Parkersburg & Charleston railroad through her territory.

Ir is quite generally remarked that the country has not, for many years, had a Vice President who gave so much attention to matters that do not concern the incumbent of the Vice Presidency as does Vice President Arthur. WASHINGTON COUNTY, PA., boasts of

being a strictly temperance county, granting no license within her borders, and the Observer says that if it was not for West Virginia on one side and Pittaburgh on the other no liquor would come into the once the case, and as is still the case in some the different counties as to hogs, cattle, county surreptitiously. It is announced that arrangements have

been made for the erection in Botetourt and Alleghany counties, Va., this year, of nine iron furnaces. The furnaces generally are to be erected by Eastern capitalists and Pennsylvania iron men, who regard the ore in the counties named of a

In Mississippi last year the average daily attendance of pupils in the public schools was 155,911, of whom 72,881 were white and 83,830 colored; 3,255 white and 2.314 colored teachers were employed. public school purposes.

WE received yesterday from Mr. Sam Busby, on Short Creek, a number of specimen twigs from apple, peach, plum, cherry and apricot trees, all showing up well in the way of fruit prospects. The buds are especially numerous and well developed on the apple and cherry trees. There is an excellent prospect all round. The wheat out there is looking well, and the farmers are getting in their corn in good shape. The ground is in excellent order.

Taz City Council of Chicago has passed an ordinance forbidding the erection of overhead telegraph lines, and requiring all wires now sustained above ground to at all, be put under ground by the 1st of May, Chicago is only the pioneer in what will doubtless become a general movement in the large cities. The New York Assembly on Wednesday passed a bill head wires below Forty-second street, in New York city.

THE use of the telephone for communication between adjacent towns and with plantations throughout Louisiana promlees to be quite general. A circuit from Vicksburg, a distance of two hundred and forty-three miles by rail, has been found to work satisfactorily Gov. Warmouth has a wire to New Or leans from his plantation, and other planters along the coast are said to be about to adopt this great convenience. The Picayune says in the next decade it is probable that the Telephone Exchange of New Orleans will embrace within its connections the majority of the planters and country merchants in the lower half of the State.

Out y one house in five in Brooke county is insured, and there is talk of starting a home company at Wellsburg to do a local declaration is made which is of a nature insurance, which amount if monopolized by a home company of solidity and character would give it a handsome business The Herald expresses the opinion that only 10 per cent of a respectable capital

on his physique over any of his competitors, only,three others rating as high as 85. A sound body is an indispensable requisite this not having been the case, we must for admission into West Point. look elsewhere for an explanation.

The boys were examined in seven branches of study, viz: spelling, reading, clocks, about the same average to her 17,writing, arithmetic, geography, grammar and history. The possible maximum in berdecreased six in the year, and the valthese examinations was, as in the physical nation fell off from \$9,871 to \$9,229-a deexamination, 100. This figure represented perfection in any of these branches. Seventy was fixed as "questionable," and anything below that was regarded as in- is, while the general run of clocks and different, 50 representing failure. Strange watches were worth but \$9, those which as it may seem the average for spelling in some way disappeared from the assesswas only 58, a very low average indeed for ore' lists were worth upwards of \$100 each. the most fundamental study in the list.

Brooke county tax payers last year were
The boy who scored the highest only the possessors of 1,105 watches, of an alreached 79, and the successful boy only leged average value of about \$7, the num-reached 77. There were five boys who ber having increased over 1879 by 163, of reached 79, and the successful boy only fell below 50-the line of complete an average valuation of not quite \$4 each. failure-one of them having simply They are not so badly fixed up there, one two noughts affixed to his name. This is a person in every five and a half, having sad commentary on common school edu- some sort of a time-piece.

the lowest boy falling to 00, and the high- in the State increased from 47,000 to 48,286, est (the winning boy) reaching 95.

two rating only at 40, and three only at Marion county, with about half the population 50. Two only reached 90—the winning lation, reported 2.436. boy and the next best boy on the general But there are some

In geography the average was 72, the owest boy standing at zero, the next low- chants' delivery wagons and all the variest at 50, three at 60, one at 75, and 5 at ous uses for horses, is said to have but 90-the highest notch reached—one of 2,584 horses, asses and mules, while Mo-whom was the winning boy. whom was the winning boy. In grammar the average was only 59,

the next 41, while only 2 scored 85. In history the average was only 61, the lowest being 5, the next 35, and the high- Hampehire, Harrison, Jackson, Jefferson,

It is only fair to say that the rather low average on the whole examination is at- Wayne, Wood, and even Wetzel, have, tributable in part to the almost absolute according to the returns, more horses than failure of one boy throughout the list. Ohio county. This does not seem improbe This unfortunate boy's general average ble when all the circumstances are taken was only 14%. The next lowest average into consideration, and it is not so humiliwas 45%. The fond parents who sent these sting when we reflect that Barbour's 2,883 two boys to the examination must have been sadly defective in themselves not to Berkeley's 3,858 at \$41, Braxton's at \$40 have foreseen about how they would rate

The winning boy averaged 85‡ throughout the list. In one study, reading, he showed as high as 95, which was the only 95 accorded in the examination.

Take the average rating of all the boys in spelling, reading, writing and arithmetic, and it certainly was not creditable to the common schools where they had been taught. It only goes to show what primary instruction are sadly defective.

The examination system for the ap-pointment of cadets to West Point, and also to the Mayal Academy at Annapolis, is an excellent one, and is a most salutary change from the old method of appointage at Bellaire might have succeeded against the boy who received the highest average, simply because his father had more money, or more political influence, or more favors of some kind at his dis posal. An examination brings all the boys of a Congressional district on to a common level of opportunity, and in addition secures to the government service a far better average of cadets. No boy who not quite \$90 each, as reported to the a is not vigorous in mind and body ought to be fastened on the public service in the army or navy, and under the system Over \$500,000 were paid out for public ed. of competitive examinations he cannot ucation, and laws have been enacted to be. This is a great gain to the country provide for an increase of the fund for in every way-in the money saved trying to graduate dull boys, and also in se curing bright men as officers in two im portant arms of the government service

A study of the returns made by the assessors of the various counties to the Auditor last year, and printed in the biennial report of that official, reveals some suggestive facts, and a comparison of the fig ures for the several counties is very sig nificant. There are some surprising di ferences in valuations in different counties and some inexplicable facts are established by the returns-that is, if the returns are to be relied upon as establishing any facts For instance, if the returns are reliable,

there are in Obio county 2,025 watches an clocks, valued, in the aggregate, at \$45,815 Now, Ohie county has, by the census of 1880, a population of 37,457, which, a simprohibiting the erection of any more over- ple calculation will show, is about eighteen persons to every watch and clock in the average when we remember how generally our male citizens are supplied with watches in these days of cheap and reliable levy. time-pieces, and how few houses, even from one to three clocks. Supposing, for the purposes of illustration, that there was not a time-piece in Ohio county outside of and cannot be hid or misrepresented Wheeling, our population of 31,000 odd in That there is any remedy that will reach the city would give about 15 persons to all the faults of the system we are not preevery time piece in the county. This is pared to say, but much can be done by certainly a remarkable statement, and nothing but the returns of the assessors by the assessors, and by creating a public would convince us of its truth, in the face of appearances to the contrary. The average value of the clocks and watches, indis- of a man in other respects by the comcriminately, is about \$22 50, which does not seem, at first sight, so out of keeping with the facts as the other figures. But a business in Brooke and Hancock counties, to provoke astonishment, and that is that It is estimated that the county of Brooke while in 1879 there were 2,135 watches is now paying about \$600 per month for and clooks in the county, last year the number had decreased to 2 025, a fe llingoff and clocks must have a large trade from

outside the city and county. In Kanawha county, with a population would require to be paid up in order to do a safe and profitable business. This may be, but if the company is to command popular confidence from the start 100 cents persons, about our average in the safe and profitable business. This may be, but if the company is to command popular confidence from the start 100 cents. on the dollar will be more likely to do it within the city limits. Kanawha's clocks than 10 cents.

within the city limits. Kanawha's clocks and watches, moreover, are returned as worth on an average something like \$9.50, 25 jears, monite and 25 days.

from which it would seem that while Intermed at Mannington, on Saturday afternoon from which it would seem that while At the recent competitive examination more Kanawhans than Ohioans are supat Bellaire for a cadet appointment to the plied with time-pieces, they stand them at West Point Military Academy, fifteen considerably less than half as much boys competed for the prize. They were money as ours, on an average. They are examined (1) as to their physical condi- progressive in this matter down there, tion, and in this particular they rated as however, and had in 1880 327 more watches low as 40 and as high as 90 out of a pos- and clocks than in 1879. Probably a porsible 100. There was only one who rated as tion of our jewelers' trade is from Kanahigh as 90, and he was the boy that carried wha county. This would not seem in-off the prize. He scored a clear 5 points credible were the figures which we are considering taken in a year in which a session of the Legislature occurred, but

Berkeley county has 1091 watches and 380 population as Kanawha's. The numcrease of \$643, or \$107 and some cents per watch,-this notwithstanding the average assessment in 1830 was not quite \$9. That

In the year intervening between the In reading the average was as low as listing of personal property for taxation in only 6 above the questionable line, 1879 and 1880, the number of time-pieces and the value from \$375,182 to \$382,641 In writing the average was only 58, only The average value in 1880 was about \$8, one boy reaching as high as 75, and the and in 1879 not quite \$7, while the average winning boy only 65. In arithmetic the average was only 63, the latter figure. While Ohio county rethe lowest boy falling to zero (two noughts) turned but 2,025 watches, and clocks,

discrepancies. Ohio county, with her horse cars, coal and mill wagons, mergalia's various draft animals are listed a the lowest being 8, the next lowest 10, \$\frac{1}{3}\$ each, on an average, and ours at \$\frac{1}{3}\$ the next 41, while only 2 scored \$5.

Twenty counties in the State, namely: Barbour, Berkeley, Braxton, Greenbries Kanawha, Lewis, Marion, Marshall, Ma son, Monongalia, Monroe, Preston, Roane, animals are rated at only \$33 a head and several of the others at similarly low

tion of "horses, mules, &c.," is \$39 each, so that Onio county is somewhat above the average. The highest average for any one county is in Greenbrier, where the animals are taxed at \$48 each, and the lowest is in Webster, where the average assessment is \$30. Now, that there is really we have so often remarked that the so wide a discrepancy, it would be hard to common schools in the matter of thorough convince any one. No doubt there are slight differences in the market value horses, as well as in their condition, in different parts of the State, but that the average in one county is really one and three-fifths times as great as in another county, seems incredible. There are equa ment by mere political preference, as was or greater differences in the returns from parts of the country. Under this old system the boy who received a medium averstance, Jefferson county returns 2,832 hog county has but 174, valued at \$5 each; bu Wayne county's 2,287 are listed at \$2 75 The general average in the State is bu

In pianofortes, organs and melodeons our people seem to have been fortunate in securing a great many instruments for a not quite \$90 each, as reported to the as What kind of instruments are represented by these returns it would be hard to guess, as a very ordinary piano would, after several years wear and tear eat up the average of a good many such nstruments, and any number of them at anything but a rediculous figure, would require the minor instruments to be listed at so low a sum as to open the eyes of the cheap ergan cabinet-makers themselves.

We do not call attention to the disparity between these returns of personal property for taxation, and the real value of such property, in the hopes that the wrong may be righted. There is probably no State that is much freer than our own from the complaint that personal property escapes taxation. Securities, are sent out of the State; articles lose a large percentage of their value the day the assessor calls and regain it the day after; nominal convoyances are made, and in many instances property is simply not returned at all. Much of the difference between one

county and another is due to the greater care of the assessors in the one than in the other; much again can be traced by an examination of the figures to the higher rates of taxation in some counties than in others. This plan works evil both ways the higher the rate of levy, the lower will be the returns, and the lower the returns the higher as a consequence must be the

The worst feature of all this is its ten dency to induce capital to seek other avenues of investment than real estate, which must bear its burden of taxation more careful and conscientious research centiment in favor of the same honor and honesty in this respect that is demanded munity in which he lives.

BRANDY, brandy, bane of life,
Sp ing of torment, source of strife,
If I could half thy vices tell,
The wise would wish you sale in h——1"

Such is the refrain from the lips of the poor deceased toper, who would fly from his enemy if possible. Recollect it is a diseased liver that craves relief. Instead of 110. Our numerous dealers in watches of brandy or any other stimulant, use and clocks must have a large trade from Simtoner Liver Regulator, and it will afford relief.
