Atrophy.

J. H. B.—I have a young horse, five and all at once got sore in his feet. As we thought they were hot we scaped his feet in warm water for two or three days. When we thought it in the shoulder we blistered it and put a string in his oreast, but he is getting no better. What can we do for him?

Answer.—The disease is that known as laminitie. Stand him for two hours in warm water and hen put on a lineseed meal poulities. Repeat this once a day. Have the shoes removed as soon as the soreness has passed away; stand on wet clay all day and blister the coronet if he is not improving. Let me hear from you again. Keep him on low diet and give him once a day dram doses of nitrate of potash in selves from contagion and The only safe remedy known is day dram doses of nitrate of potash in the water.

HORSE NOTES.

Severe bits often make foolish horses. The right kind of care will add materi lly to the value of any horse.

The character of a man is pretty well epresented in the kind of horses he keeps.

A single bad habit may change the value of a horse more than you would imagine. If you are breeding light horses, breed for speed, if heavy horses, breed for strength. The disposition of a horse depends to a

horses are almost indispensable at this time of the year. The man who does not provide them for his teams certainly stands in his own light.

To keep the feet in good condition the shoes should be removed once every six weeks or oftener. The ruination of many horses feet can be laid to the careleseness or penuriousness of their owner in not getting the shoes reset often enough. The history is the shoes reset of the shoes steed the shoes ste blacksmith who can make the shoes stick on the longest is regarded the highest by too many of our horse owners.

All the firemen, headed by Foreman All the firemen, neaged by Foreman McCabe, went on active duty, and Tom became a target for all sorts of missiles. He finally grew angry, and dropping his love sons, set to issning challenges in his most decisive way. Other tom cats loomed up and flung back these challenges at him.

At 2:30 A. M. Fireman John Stinson offered to go up the tree and drive Tom away, so that the fireman could get some sleep. He seized a branch above his away, so that the fireman could get some sleep. He seized a branch above his head, set one foot against the trunk of the tree as high up as he could reach, and tried to swing himself up. The branch broke and he fell heavily to the sidewalk. His right arm was doubled up under him and broken at the wrist. He went to the New York hospital. The report of the occurrence which was sent to the Fire hall did mention what heaven of the cat and did mention what became of the cat, and Chief Shay sent it back to have the ouis-sion rectified. The cat sang on until day-break, and then cleared out.

"Charley, won't you tell me all about the tariff?"

R. F. E. Fairmont, W. Va.—I wish you to give me some information. I have a live-year-old mare with a colt three months old. About three months ago there appeared behind the right hip bone joint a small sunken place the size of a half dollar. It has increased now until you can lay your hand in the sunken place. There is no lamenees or apparent soreness about it. It looks like aweany. I would like to know what it is. There is no cause for it that I know of. What is it and how should it be treated?

Answer:—The disease is that known as atrophy, very often produced from one of the blood vessels becoming plugged by a thromb or from other causes which would produce the formation of a thrombi, the part wasting away from want of nourishment. The best treatment is the use of plenty of friction over the part diseased. This is best done with a good stiff brush laid on by the application of some mild linament to be well rubbed in three times a day. Moderate exercise and low diet is adviseable.

The line was too long, but with a death rattle in his throat in stammered:

That swept his decks. His information wan't built that way.
