MEXICO IS READY.

War the Absorbing Topic of Conversation in the Mexican Capital.

CITY OF MEXICO, Jan. 15.—There is great excitement here, and nothing is heard on the streets and in the newspapers but war talk.

A meeting of the cabinet has been called. It is thought war will be declared. Mexico, it is said, has 18,000 men on the Guatemalan frontier ready for action.

The official communication of Guatemala to the demands of Mexico over the international boundary dispute was delivered to the national palace this morning. It is very voluminous and covers many pages of closely-written matter. Its contents will be made known at the meeting of the cabinet.

It is generally understood that its import is the same as indicated in the telegram received from Mexican Minister Godoy at the time it was delivered to him by the Guatemalan government. Its tone is evasive and negative, and the foreign department said that the declaration of Mexico's position may be expected inside of four or five days, by which time the reply of Guatemala will have been considered in all its bearings.

While not showing any heat over the reply of Guatemala, the Mexican authorities hold firm as ever to their position, and it is very generally understood that early next week an ultimatum will be sent to Guatemala by the corvette Zaragoza, which will at once declare war on that republic unless it accepts the demands of Mexico in every particular. In any event, the Zaragoza, it is expected, will bear a note to Minister Godoy instructing him to request his passports from Guatemala. Should his answer be negative, he will be protected and landed on Mexican soil by the corvette, which will then be detailed for the transportation of troops and the munitions of war.

The war department in this capital is all activity. The entire office forces are working over-hours and unusual animation is seen on every hand. The number of troops already on the frontier is 18,000, and several brigades are in readiness to be pushed to the front at a day's notice. Throughout the republic the same conditions are noted and there is no doubt that Mexico could put 50,000 men on the Guatemalan frontier within a week or ten days.

Considerable feeling is manifested in this city over the visit to the national arms factory of a member of the Guatemalan legation in company with the Italian minister. The parties appeared at the factory without previously announcing their intention of making the visit. Being without instructions, the commander of the factory telephoned to headquarters for information. The reply was that under existing circumstances it would be inconvenient that the diplomats be given admission, and while the commander was profuse in his apologies the visitors had to go away as ignorant as they came in regard to the operations of Mexico's big establishment and the figure it might cut in the near future.

PLAN OF CAMPAIGN.

Mexicans Contemplate an Easy Conquest of Guatemala.

SALINA CRUZ, MEX., Jan. 25.—It is reported here that arrangements are being made by the Mexican war authorities for the Guatemalan invasion as soon as hostilities are declared. The theory is that the armed corvette, Zaragoza, the gunboat Oaxaca and all the Mexican boats on the Pacific coast will be employed in landing troops at San Jose, Guatemala, or some other convenient point. These forces will be pushed across the country toward the capital, about fifty miles from the coast, where it is expected the hard fighting will occur. At the same time the famed Mexican rural force will be ready to start for the various points on the border now occupied by Mexican troops. The rurales will aim to clear up things as they go, and be on hand and ready to co-operate with the sea forces by the time they have arrived before the city of Guatemala. The artillery and other heavy guns will be shipped by sea, and as the Guatemalans will probably do all in their power to prevent the landing of the Mexican forces, it is evident that the artillery mounted on the Mexican ships and that designed for besieging service will be immediately brought into play.

The Guatemalan forces are altogether too small to put up a good fight at more than one or two points, and so Mexico will have little trouble in gaining land. The evident policy of Guatemala will be to concentrate all the forces possible on the coast and northern frontier at the strategic points and have the forces fall back upon the fortifications at the Guatemalan capital if unable to hold

their own against the Mexicans. That this will be possible is not easily seen, in view of the afloat plan which Mexico is evidently laying to rush in to capture their chief city at the very start. Should the Guatemalans destroy the means of subsistence in the track of the invading Mexicans, the rurales will be used for foraging purposes as well as for general fighting when needed.

TREND OF TRADE.

G. G. Dun & Co.'s Review of Business and Industrial Outlook.

New York, Jan. 25.—R. G. Dun & Co.'s weekly review of trade, which issues to-morrow, will say:

Events have not helped business this week. About \$1,880,000 gold has been withdrawn from the treasury, mainly for export, and the gold reserve has been reduced to about \$58,000,000. Since December 8 the treasury has lost in thirty-nine working days about \$33,000,000 gold, and daily increasing distrust is liable to affect markets unfavorably.

Industries have not yet found sufficient demand for their products to prevent further decline in prices, and this week the average for all commodities has again touched the lowest point ever known. The number of hands does not increase, and a strike has cut off for more than a week about half the business of Brooklyn, to some extent affecting trade here.

Heavy sales of wool, 6,567,150 pounds, against 5,681,350 two years ago, are in part the result of growing confidence among manufacturers that they will be able to meet foreign competition, and in part because prices are not thought likely to go lower, so that some have purchased beyond their orders for goods. The market is broader, about half the sales being territory wool for mixture with Australian.

Wheat has sold at the lowest point ever known for the May option and spot has declined 4 cents for the week, liquidations of the immense holdings of the Fair estate being rumored.

Corn has declined 2 1/2, though receipts are shrinking. Liquidation in pork has brought a sharp decline.

At bottom, business hesitates because the future is clouded, and the consuming demand has not increased in January as was expected. In belief that it would, industries had enlarged production, and until it does the excess of producing capacity tends to depress prices. Both in iron and steel, weakness is seen at Philadelphia. A better demand appears for bars in Pittsburgh, but at Chicago they are unexpectedly dull. No transactions in rails are reported, and in general the demand in finished products is considered disappointing. The minor metals are a shade stronger, but tin plates are lower, with considerable business.

Failures this week have been 303 in the United States against 430 last year, and 59 in Canada against 55 last year.

at the ball and heel—even some of the best black stockings. Wash them with Pearlina, and you'll have the black color restored. Does that look as though Pearlina would "injure the clothes?"

Things like these, hundreds of them, all more or less important, make Pearlina the best thing to wash with.

Then, on top of that, it saves labor, saves rubbing, saves wear and tear, time and money.

Send Peddlers and some unscrupulous grocers will tell you "this is as good as," or "the same as Pearlina."

IT'S FALSE!—Pearlina is never peddled, and if your grocer sends you something in place of Pearlina, be honest—send it back.
