So little of importance was developed in the Southwest fields during the past week that only a cursory glance over routine operations is required in this review, says "D. S. W." An analysis of the general situation, however, shows a more truitful field for theorizing. The relative positions of production and consumption, as shown by the pipe line statement for October, published during the week, hold out a vast amount of encouragement to operator and producer. A cut of 600,000 barrels into the stocks in one month is no small silice and the same ratio of decrease has been maintained for the first ten days of the present month. The claim that the outlook is growing brighter can be substantiated by the figures and the small producer, who has held on to his little old wells and kept them going at little or no profit during the long months that the depreciation prevailed, has brighter prospects in view. There have been fewer small producing wells abandoned during the recent low market than for any similar cause in the history of the business. ing the week, hold out a vast amount

for all solutions.

In the past, a one or two-barrel producer in a white sand pool had no commercial value except for the amount of junk it contained. It is a question whether the aggregate of these wells that have been kept going have not had as much to do with keeping up the high production as the gushers in new pools. In the past four years, there has not been a new white sand pool discovered that could show a higher production than 10,000 barrels a day, and that only for a very short time.

All in all, the Elk Fork pool will average up better from the time it was opened than any other since the Sistersville field was at its zenith. From a survey of the present operations of the

survey of the present operations of the Elk Fork pool, based upon the observations of those thoroughly familiar with the surroundings, there is nothing left but the development of the southwest but the development of the southwest extension, after which it will take its place with the "has beens." It is not a question for argument; the pool has been one of the past four years, both fn the size of the wells and their stay-ing qualities. What the pool will do when fully defined, and all the wells put to pumpling is a matter for after

Six thousand barrels a day would be eral estimate of the production of cool, exclusive of the southwest exthe pool. exclusive of the southwest ex-tension. It is claimed, and there seems to be good ground for it, that the wells have had the life shot out of them and they will, for that reason, make indif-ferent pumpers. The past week found the first light well. E. Tuttle's No. 3 on the southwest extension, southeast of the Boremith-Strauss No. 5, came in very small producer, and to the thornbeast No. 3 Glenn, was no better.

a very small producer, and to the northeast No. 3 Glenn, was no better. The deep sand territory northwest of Mannington Turnished two gushers, wille the same formation in Tyler county supplied nothing better than small producers or dusters. However, the deep or Gordon territory is something that cannot be innored in a forecast of the future resources of new production. The probable area and the size of some of the wells gives it presize of some of the wells gives it presize. As to new pools, there are none in sight, either in the local or lower Southwest territory, and it is to be hoped, for the good of the trade, that the new year will be well advanced before a new one will be discovered. An operator, largely interested in the Elk Fork pool and other portions of West Virginia, came up from that country yesterday, having spent the greater portion of the week at the Elk Fork pool. To a reporter he stated that the older portion of the pool was on

greater portion of the week at the Elk Fork pool. To a reporter he stated that the older portion of the pool was on the decline. The gas pressure has been exhausted at nearly all of the older wells and more than one-half of the wells in the pool had been put to pumping. There is an abundant water supply since the late rains and three gas companies have lines running into the pool. furnishing plenty of fuel. The only show for any new production, he thought, was in the southwest extension, but the producing wells in that portion of the pool had cut their production almost a half in the past two weeks. The No. 3 well on the Tuttle farm confing in small, as cow indicated, was no small disappointment, as it farm coffing in small, as now indicated, was no small disappointment, as it
negatived the theory that a cross belt
connected the big wells on the Eddy.
Hill and Tuitle farms with the gushers
on the Pipes farm to the east. Had it
not been for the discovery of the
southwest extension, operations, he
said, in the Elk Fork pool would have
been practically at an end by the close
of the present month.

Curious Case of Smuggling. WASHINGTON, D. C., Nov. 15.curious case of smuggling on the Mexican border line has been discovered recently by the government officials at Nogales, Arizona, and equally curious action has been taken to suppress it. On May 5 last, land about Nogales was action has been taken to suppress it. On May 8 last, land about Nogales was declared subject to entry and among those who took advantage of the right was a man who made a town site selection directly on the international border line and immedistely erected a large house thereon with doors on both sides. By this means, according to official reports, the laws were evaded by backing up teams laden with Mexican goods to the rear door of the house, which did not require crossing the line, and the goods were then taken out of the door on the American side and carried away. The case was reported by the collector of customs and he asked that no town site be allowed unless there was a street set apart along the border to prevent this evasion. The general land office has now acted on this proposition and the president has made a reservation of a strip of land, sixty feet wide and two miles long, at Nogales, which it is hoped, will prevent such practices as that referred to and secure to the government its customs dues. The necessarys surveys for the purpose are now being made.

Why, the Idea! WASHINGTON, D. C., Nov. 15.—Consul Wildeman, at Hong Kong, Informs the state department that the largest stems of import from the United States to that place are flour and petroleum. Regarding lumber he says there would be no trouble in selling, if shipped subject to approval. Americans, he adds, have the reputation of practicing frauds in selling goods, and especially is this true of whisky of American manufacture that is sold in Hong Kong. The exports from Hong Kong to the United States for the year ended June 30, 1857, amounted in value to \$1,950,785, the principal items being rice \$427,995, refined stight \$22,250, ten \$105,795, "Chinese" provisions \$125,950, "Peanut" oil 103,216, Mr. Wildeman says there is a great deal of talk about adopting the Eold standard for Hong Kong, as merchants complain of the fluctuations of aliver, and the matter will be brought before the colonial legislature. tiems of import from the United States

Another Minister Gersont of the Pulpit. DENVER, Col., Nov. 15 .- Rev. Myron Reed, paster of the Broadway Temple, has created something of a sensathe created something of a sensa-tion while discussing the killing of the lite Indians by Deputy Game Wardens in Colorado by declaring that he in-tends to see that Warden Wilcox and his deputies are tried for murder. He also denounced the preachers who have remained allent in the matter.

Didn't Lost the Treasury. SAN FRANCISCO, Nov. 15.—General Fuentes, of Gustemals, who was artested on Saturday, denies that before leaving that country he looted its treas-

ury. He,says: "This matter and also the further false statements that Prospeco Morales and I have taken \$280,000 from the bankers and government of Quezelango the courts must investigate, and I trust will punish the guilty. The revolution was initiated for the purpose of upholding the constitution and laws of the republic of Guatemain. We guaranteed protection of person and property to all, and this guarantee we have kept faithfully. It is enough for me to state that during this revolution the rights of property and personal liberty have never been violated. ury. He says: "This matter and also

Ostrage Grimly Avenged.
VICTORIA, B. C., Nov. 15.—The German warship Falke, which was disman warship Falke, which was dispatched from Australia on receipt of the news there of the murder of the trader Von Hagen, returned recently from Germany, New Guinea, having grimly avenged the savagery of the natives.

The Falka steamed directly to the village in which the murderers of the late acting governor were known to be secreted and without a word of parley opened fire with artillery. This so terrified the natives that they at once carbed heating the state of th

opened fire with artillery. This so terrified the natives that they at once carried into Stephens Port, the German capital, the two Solomon island boys worked for the murder and who had broken from imprisonment, imposed for the killing, two years ago, of the German explorer Ehlars and his party. The Falka continued to shell the village despite this creditatory measure, and left no building standing.

Just Inke Other Fools.

INDIANAPOLIS, Ind., Nov. 15 .- Ce cil Robinson, fourteen years of age, shot and instantly killed his seventeengear-old sister, Mattie, last night, at the Robinson home, on Jefferson ave-nue. The shooting was accidental. the Robinson home, on Jefferson avenue. The shooting was accidental. Young Robinson pointed the revolver in the face of his sister, not knowing that it was loaded. When he pulled the trigger the weapon discharged a bullet into the girl's head, The young man was locked up, but was released when it was established that the shooting was an accident.

Made a Paint Bluff.

SHELBYVILLE, Ky., Nov. 15.-Willis B 'Campbell was shot and killed by Policeman Oscar Dundon, Campbell was an ex-policeman and very danger-ous when drinking. He was intoxica-ted and boisterous, and the officer ask-ed him to keep quiet. He pulled his pis-tol and snapped it at the officer's face, when the latter shot him through the heart.

MR. N. M. OSBURN, well known at Woodstock, Mich., was troubled with a lame back. He was persuaded to use Chamberlain's Pain Balm. It gave him rellef in one night. This remedy is also famous for its cures of rheumatism. For sale by druggists.

J. C. BERRY, one of the best known J. C. BERRY, one of the best known citizens of Spencer, Mo., testifies that he cured himself of the worst kind of piles by using a few boxes of DeWitt's Witch Hazel Salve, He had been troubled with piles for over thirty years, and had used many different kinds of so-called cures; but DeWitt's was the one that did the work, and he will verify this statement if any one wishes to write to him. FINANCE AND TRADE

The Features of the Money and Stock

NEW YORK, Nov. 15.-Money on call steady at 1%@2 per cent; last loan 2 per cent; closed at 14@2 per cent. Prime mercantile paper 3%@4% per cent. Sterling exchange firm, with actual

outside inquiry or sign of interest in the market. A large proportion of the day's trading was in Sugar and this stock fell away at one time 2% points, but closed 1½ per cent above that. The rally was due to a ruling by the treasury department to apply the countervailing duty clause of the tariff bill to refined sugars imported from Denmark. The amount of sugar available for import from Denmark si not in itself large, but the treasury's decision was regarded as indicating a course likely to be pursued in regard to Duten refined sugars in which the supply available for import is large. This raily in sugar helped the market and was almost the only indication of real strength in any stock throughout the day. In the closing transactions Susquehanna & Western preferred suddenty mounted upwards to 34½, a net rise of 3½ and the bonds of that company also showed some sharp gains. No effect was exercised on the general market, but the Southern Paoifle preferred was relatively firm in the railway list on account of the increase in earnings shown by its first week's statement of 1½,558 or 45 per cent over last year. Last year's earnings for the same period were not large and there was one more business day included in the period than this year. But the showing was regarded as a strong one, nevertheless. People's Gas, which was a centre of depression and closed a point lower. The coalers were also weak, New Jersey Central most conspicuously so, falling at one time 2½ points, but railying a fraction. Consolidated Gas made one of its characteristic slumps of nine points to 180. This was eight points lower than the previous low point of the present movement. The acous railied 1½ at the close. The heaviness and duliness of the market were partiy in sympathy with London where the prices of the supreme court to hand down a decision in the Nebraska maximum freight rate case before its two week's recess. Closing prices are considerably above the lowest of the day in most cores. However, the lowest of the supreme court to hand down

Breadstuffs and Provisions

CHICAGO-Dullness was the most noticeable feature of all the grain and provision markets to-dag and with the exception of provisions, prices did not change much. Wheat closed 1/2 higher; corn closed %c lower and oats a shade higher. Privisions suffered from liquidation and closed 7½@15c lower. For the first two hours of trading in

wheat the market was an unstable one, with a range for May from 90%c down to 89%c. Opening strong at 90%@90%c, as against Saturday's closing price of 90c, May sold for an instant at 90%c, the high price of the day, then declined under the only really heavy selling which took place during the session to 89%c. It rose again to 30%c, but by 11:30 had declined to 89%c. The chief reason for the strength at the start was that Liverpool was %d higher, notwithstanding the drop in price at the end of the week here. There were some other reasons, however, that had more or less to do with it. The weather bureau predicted an unfavorable change. Since Saturday it had been moist and mild, and generally about as helpful to a weak plant as could be wished at this late period of the year, but the thermometer in the extreme northwest marked is helpful to a weak plant as the part of the worther and as against Saturday's closing price of mometer in the extreme northwest marked 10 below zero this morning and a considerable drop from recently com-paratively high temperatures in the winter wheat country was the predic-

winter wheat country was the prediction for to-night.

The London Times estimated the damage by frost to the Argentine crop at 10 per cent. The receipts in the northwest gave some indications of feeling through effects of smaller deliveries from farmers. Minneapolis compared with the Monday previous, had 353 carloads less. The day's receipts at Minneoplis and Duluth were 1,354, against 1,658 the Monday preceding, and 1,259 the corresponding day of 1896/ Chicago receipts were 113 cars, against 31 cars last year, but its addition to rail Chicago receipts were 113 cars, against 31 cars last year, but in addition to rail receipts was a cargo of 120,000 bushels by lake. The total receipts at western primary markets were 1.457,000 bushels, against 1.023,000 bushels a year ago, 'Atlantic port clearances were 322,000 bushels in wheat and flour. The quantity of wheat on ocean passage was increased 960,000 bushels and the shipments from all sources to Europe last week were 9.261,000 bushels, against 9,247,700 bushels the previous week. This latter item had a good deal to do in causing the seiling which resulted in the decline after the opening. The

in the decline after the opening. visible supply statement was an additional source of weakness. It showed an increase of 2,927,000 bushels. During an increase of 2,927,990 bushels. During the latter part of the session trading was very dull, though prices showed more steadiness. Liverpool closed %d higher. The corn trade news predicted an immediate falling off in Russian shipments as a result of ice. The strength which was, maintained gave the market much heeded support at times. May was bringing 90%c at the close.

Corn was dull with very little doing beyond changing December to May, and even that in limited quantilies. Ele-vator people were the most conspicuous sellers The feeling was easier from neglect than from any statictical

sellers. The teeling was easier, more from neglect than from any staticitical influence, but price changes were narrow. Receipts 332 cars. The visible supply decreased 1,646,000 bushels. Cables were 36d higher. May ranged from 50c to 234 (275)c.

The market for oats was very similar to corn in the character of its trading, very little being done beyond exchanging, selling December and buying May at about 13/c premium for the latter. Prices averaged a shade better. The cash demand was not so urgent. Receipts were 47 cars. Visible supply decreased 1,104,000 bushels. May ranged from 22c to 213 (2215c, closing a shade higher at 213 (422c.

Provisions were slow with prices weak. Lower prices at the yards were responsible for an opening decline in

weak. Lower prices at the yards were responsible for an opening decline in provisions and moderate selling by packers kept prices on the down grade. Shorts were the principal buyers. At the close January pork was 12½@15c lower at \$8 2008 22½, January lard 7½ 610c lower at \$4 25 and January ribs 7½@10c lower at \$4 22½, 2 Estimated receipts Thesday: Wheat, 170 cars, corn 690 cars; oats 465 cars; hogs 29,600 head.
