ASSUMED CONTROL

Pottery Combine's Operation Begun with New Year.

TRANSFER OF THE POTTERIES

In the Combine will not be Entirely Consummated Before the end of the Week—Wheeling Pottery Co. Still Taking Stock, Preparatory to its Transferment—Wheeling May Have a General Office of the Combine.

The pottery combine took charge of the plants it embraces with the beginning of the new year. The Wheeling Pottery company's plant on the South Side, the only local concern in the combine, received notice Saturday that the combine's control would date from January 1, but all the necessary details have not been perfected for the transfer owing to the inventory not being completed. It is likely the stock taking now in progress will be completed this week.

The combine is to be known as the American Pottery company, with a capital stock of \$27,000,000. The headquarters will be in New York with general offices at East Liverpool, O., and Trenton, N. J., and perhaps in Wheeling. The charter of incorporation was issued under the laws of New Jersey. No board of directors has yet been elected, nor has all the stock been subscribed, consequently until these things are arranged the combine lacks many definite details, but the plants are now practically under the combine's control. Most of the stock has been subscribed, and the combine will control ninety-seven per cent of the country's output of pottery ware. As has been previously stated, the Warwick pottery is not in the combine, but the option taken by the promoters of the combine on the North Wheeling pottery leads to the belief that this plant will awake from its idleness to be operated by the combine, for it isn't likely it would be purchased with any other intent.

Speaking of the pottery combine, President C. W. Franzheim, of the Wheeling Pottery company, said yesterday that the popular antipathy to combines in Wheeling arises from the blight cast on this community by the United States Glass company, which was a different kind of combination. It only owned about fourteen of fifty-four glass factories, and didn't put forth the cash in buying up plants as the tin plate combine for instance, when it recently turned over more than a quarter of million dollars to the stockholders of the LaBelle tin mills. The tin plate combine didn't shut up any mills, and likewise the pottery combine will operate its plants to realize on the investments made.
