A WAITING GAME IS PLAYED

By Everybody-Smaller Manufacturers Suffer for Shortage of Material. Sales of Pig Iron Few at Top Prices. Light Rails Going up-Effects of Paddlers Strike.

PITTSBURGH, Pa., Aug. 2.—The American Manufacturer will say to-

This has been another ominous week

of quiet.
Manufacturers have been on a still hunt for siray lots of material, but without results. The market is cleaned up of every ton of unsold stuff everybody is playing a waiting game. The smaller manufacturers who buy month to month are suffering from the shortage of material and many of these are beginning to close down or to lay off workmen as a result. Larger concerns having plenty of cash with which to do business are more fortunate, but are constantly complaining of the shortage.

Sales of pig iron for immediate or future shipments have been few and at top-notch prices. While \$20 is given as the association price for Bessemer pig iron in the valleys, the last sale reported was made at \$20 25. The association's agent reports that there is ao metal for sale, and hence the quotation is nominal. An advance to \$21 per ton is freely predicted.

Light rails have been sold as high as

\$42 per ton, and standard section at \$42. Muck bar iron has been disappearing from the market, the last quotation being \$2 25 per hundred pounds. The scarcity of puddlers and the strike at several plants have caused a restriction of output. The demand has been ahead of the output for several months. In the eastern and central parts of Pennsylvania puddiers have been advanced to \$4 per ton, a price unknown for many years, the wages paid at the beginning of the year was \$2 75 per ton for the same work.

Pig irons advanced \$1 per ton in Chicago. Plates are \$2 higher, and mer-chant steel is from \$2 to \$3 higher on some grades.

STEEL FOR INDIA.

Big Contract to be Filled by the Pennsylvania Steel Company HARRISBURG, Pa., Aug. 2.—The

ennsylvania Steel Company to-day shipped forty-three carloads of bridge and construction steel to one of the Pennsylvania railroad docks in New York City, and from there it will be sent by ship to India. It comprises one-half of the iron to be used in the building of the huge viaduct across the Gokteik gorge, about eighty miles west of Mandalay. The company will get \$700,000 for the piece of work.

Twenty-five of the steel company's own force of expert workmen will ac-company the steel on its long trip across the ocean, to superintend the work of construction. The steel com-pany's contract calls for one-half of the structure to be built and shipped dur-ing the first week in August, and the company is almost a week ahead of the time set.

The remaining half of the big of signment will be shipped late in the fall and the construction will be begun in November after the close of the rainy

Has no Information.

CLEVELAND, O., Aug. 2.—Grand Chief Arthur, of the Brotherhood of Locomotive Engineers, said to-day that no official information had reached him concerning the request of the Lake Shore engineers for increased pay. "The grand officers of the Brotherhood," said Mr. Arthur, "will take no action in the matter unless the request should be refused by the company. In that case we should endeavor to adjust the matter for the men." It is stated that nearly 98 per cent of

the engineers on the Lake Shore are members of the Brotherhood. About 1,000 men would be benefitted by the

American Tobacco Co.'s Purchase. CHICAGO, August 2.—Representa-tives of the American Tobacco Company have purchased the plant and business of August Beck & Company, for \$200,000. Only a few weeks ago the American Tobacco Company purchased the plant of Gradle & Strotz. The American Company, it is said, holds an option on the plant of Spaulding & Merrick, the largest of the three firms engaged in the manufacture of smoking tobacco in Chicago. If the American company secures this plant it is their intention to enlarge it and operate all the Chicago factories as one.

Cotton Duck Combine.

NEW YORK, August 2.-Members of the cotton duck trade in this city are in receipt of information that the project to form a general combination or trust has been practically brought to a ssful issue, and that a meeting will be held in Baltimore to-day or toorrow to complete the new organization. The greater number of cotton duck mills have their headquarters in Baltimore and some of the large com-

A Young Girl's Experience.

My daughter's nerves were terribly ont of order. She was thin and weak; the least noise startled her, and she was wakeful at night. Before she had taken one package of Celery King the change in her was as great that she could hardly be taken for the same girl. She is rapidly growing well and strong, her complexion is perfect, and she sleeps well every night.—Mrs. Lucy McNuthersh Ving cures Constipation and all discuss Valley, Pa.

Celery King cures Constipation and all denses of the Kerves, Stommen, Liverand Kidneys. Sold by druggists. 25c. and 6ct. 4

Would Surely Try Mra. Pinkham's Medicine If They Only Know, Says Mrs. King

year ago I was taken very sick. Doctorscould do me no good only to deaden th pain which I had almost constantly. I got some of your Compound and took one bottle

and received benefit from it at once. I have taken it ever since and now have no backnehe, no pain in my side and my stomach and bowels are perfectly well. I can honestly say that there is nothing like it. If I could only tell every woman how much good your medicine has done me, they would surely tryit."—MARTHA M. KING, NORTH ATTLEBORO, MASS.

The way women trifle with health shows a degree of indifference that is pastunderstanding. Happiness and usefulness depend on physical health; so does a good disposition. Disease makes women nervous, irritable and snapplah. The very effort of alling women to be good-natured makes them ner-vous. Write to Mrs. Pinkham, she will help you to health and happiness.
It costs nothing to get Mrs. Pinkham's advice. Her address is Lynn, Mass.

panies in that city are financially interested in this movement. Options on even plants expired on the last day of July, but it is understood that arrange

ats were made to take them up. The name of the new corporation will be the Mount Vernon-Woodbury Cotton Duck Company, with a capitalization of \$23,500,000.

TWO ELECTROCUTIONS

In Auburn, New York, Prison-Both

Were Successful.

AUBURN, N. Y., August 2.—Oscar E. Rice, a white man, and John Kennedy, a negro, were put to death by electric-ity in the prison here to-day. The two executions took place within twenty minutes. Rice was supported to the electric chair at 5:18 a. m., in a state of collapse, but Kennedy walked without assistance. A current of 1,750 volts was sent through Rice's body for fiftyone seconds. The same current was kept on ninety seconds longer for Kennedy. The executions were successful and there was no unusual incident.
Oscar E. Rice stabbed and slashed his

wife Mary with a pocket knife in their home in Westfield, Chautauqua county, on the afternoon of March 25 last. The voman ran into the roadway, where she fell. Rice threw stones at her while she lay helpless and then cut his own throat. Rice's wound was not very serious, but the woman died.

John Kennedy stabbed John Humnings nine times in Hummings' room in Buffalo, on October 9, 1898. Hummings died almost instantly. Both men were negroes. The murder was com-mitted because Hummings, who lived with a woman named Minnie Lewis, ejected Kennedy from the woman's Kennedy resisted and was worsted in a fist fight. He borrowed a clasp knife from his room-mate and returning to Hummings' place stabbed him to death.

New Species of Bass. Special Dispatch to the Intelligencer.

MARTINSBURG, W. Va., Aug. 2.—A new species of bass is being caught in the Potomac river near here. Thomas Hughes, a veteran fisherman, caught six in a short time. The bass is of the large mouth kind. It is greenish in color and is said to be broader than the black bass. About 500 of these bass were put in the river a few years ago. Mr. Hughes says he has to give up fishing now on account of the polluted condition of the river, which has driven the fish up the side streams. Very little of the polluted water is getting in the river now below dam No. 6, where it is fed into the canal, yet, Mr. Hughes says, the fish cannot stand even the small quantity that gets below the dam. The water has assumed a coffee like Fishermen find that the pollution is of such a progressive character, that they have to go further down the river each year in order to catch fish.

Postmasters and Pensions. Special Dispatch to the Intelligence WASHINGTON, D. C., August 2, Pensions have been granted to the fol-

lowing West Virginia applicants:
Original—Rufus B. Champ. Jones Springs, \$6; David Watt, Wheeling, \$6. Increase-Christopher C. Allies, Hun-

tington, \$12 to \$17. Reissue-Daniel Hill, Waterloo, \$17. New postoffices have been established in West Virginia, as follows:

Manown, Preston county, with Jesse M. Johnson as postmaster; Lilly, Summers county, with John W. Hedrick as

postmaster.
The office of Flinttown, Roane county, has been discontinued, the order taking effect July 31 last.

S. H. Odell has been appointed fourth class postmaster at Fowler Knob, Nich-olas county, W. Va., and William H. Layfield has been commissioned as postmaster at Cokeley's, W. Va.

Special Dispatch to the Intelligencer CHARLESTON, W. Va., August 2 .-Isaac Borstein, of this city, has filed a petition in bankruptcy in the United States district court here. He gives his liabilities at \$2,725, the greater part of which was centracted in Nashville, Tenn., with no assets. Petitions in bankruptey have also been filed by M. Ordway, of Hinton, and William Deryshire, of Bluefield, Ordway's Habilitles are \$1,388, and Derbyshire's are \$400. Neither has any assets.

Ingenious West Virginians, Dispatch to the Intelligencer WASHINGTON, D. C., Auugst Patents have been granted to the following West Virginia inventors: phonzo F. Blake, and E. W. Cox, Cox's Landing, window shade attachment. Thomas R. Carskadon, vehicle William L. Noble, Roe, rotary-knife William H. Riffel, Harold, handle for implements.

Belgium's New Cabinet. BRUSSELS, August 2.—The delay in forming a new cabinet is due to the difficulty experienced in selecting a new

officer and pledged to the principle of personal military service. M. De Smet de Mayer, who is attempting to form a ministry in succession to that of M. Van der Pereboom, which resigned yesterday on account of the rejection of the government's electoral proposals says the new cabinet will be mously in favor of an electoral embodying proportional representation.

THE PRESENT OUTBREAK

Of Yellow Fever Will Give Oppor-

tunity for Investigation.
WASHINGTON, Aug. 2.—The present outbreak of yellow fever at the Hamp-ton Soldiers' Home will give the army corps an excellent opportunity to extend an investigation they have been prosecuting for two years past into the nature of yellow fever and the best modes of combatting it. The marine hospital service which is in charge of the quarantine in the infected district has been doing similar work and Dr. pert in the Hampton home, is one of the two marine hospital surgeons who re-cently returned from Cuba, where they studied the disease in its permanent home and made collections of culture for future study in the Washington

The medical world at present is very generally of opinion that the specific bacillus of yellow fever has not yet been identified. Recent announcement was made by Sanarelli, an Italian scientist, that he had segregated the germ of yellow fever and this claim was later confirmed by a Brazilian bacterologist after somewhat less exhaustive research.

Surgeon General Sternberg, of the army, who is regarded as one of the foremost bacteriologists, made a close study of the subject and isolated a bacillus which he did not claim was the specific germ of yellow fever, but one worthy of closer study, calling it for onvenience the bacillus X." The army medical museum under General Stern here's directions took up the subject and Doctors Reed and Carroll recently issued a preliminary note on the museum's investigation in which they set forth the statement that so far as determined the bacillus of Sanarelli and the bacillus X of Sternberg were identical in their general form and their effects on the lower animals and that both seemed to be identical or very closely allied with the bacillus of hog cholers. The Lesions produced by the three germs were the same and samples of the suspected fever germs submitted to some of the most expert scinetists in the line of agricultural chemistry an animal industry were pronounced to be the germ of hog cholera.

This seemed to leave the question open, but Doctors Reed and Carroll are continuing their researches with the intention of locating the active principles in yellow fever, whatever it is. Meantime Dr. Doty, the health officer at New York, claims to have confirmed Sanarelli's discovery and is carrying on a series of curative experiments with a serum for the destruction of the Sanarelli germ. The army general medical officers say, however, that no germ which can stand a temperature of 351 degrees below zero can be the germ of yellow fever, which is known to cease its ravages on the appearance of frost. The Sanarelli germ was recently sub-merged in frozen air and came out ready for business.

The report of Drs. Wasdin and Ged-

dings, of the marine hospital, on their Cuban researches has not yet been made public, but it is understood they agreed with Sanarelli.

PLAIN, EASY READING.

It Will do you Good to Ponder

A Splendid Article Which all the People are Now Talking Much About.

What we say is plain, easy reading and will do you good. The people of West Virginia are saying a great deal about Morrow's Kid-ne-olds just now because Morrow's Kid-ne-olds have cured so many bad cases of backache,

sleeplessness and nervousness in this city. Morrow's Kid-ne-olds is a sci-entific preparation prepared in yellow tablet form, and acts directly upon the kidneys and nerves. Do not connect Morrow's Kid-ne-olds with any kind of kidney oills: they are yellow tablets

kidneys and nerves. Do not connect:
Morrow's Kid-ne-olds with any kind of sidney pills; they are yellow tablets and put up in wooden boxes which contain enough for about two weeks' treatment, and sell, at fifty cents a box at all drug stores.

We ask you to read what a gentleman has to say about the great merit of Morrow's Kid-ne-olds.

Mr. M. V. Graham, 1222 Fourth avenue, Huntington, says: "Some time ago I was feeling badly; I had pains across the small of my back and was generally run down. I had no appetite and could not sleep well at night and it seemed that I would be more tired in the morning when I would first get up than when I went to bed. I would have headache frequently. Some of my friends had been greatly benefited by Morrow's Kid-ne-olds and Morrow's Liveriax, so I got some at the drug store and was cured in a week after I began taking them."

Morrow's Kid-ne-olds are not pills, but Yellow Tablets and are for sale at Chas. R. Goetze's drug store. Morrow's Liverlax are small red granules and cure constipation and billousness. Kid-ne-olds fifty cents and Liverlax it wenty-fle cents each per box.

and cure constipation and billousness. Kid-ne-oids fifty cents and Liveriax twenty-five cents each per box.

TELEPHONE GO-BETWEEN.

What the Girl who Does the Rest After You Ring the Bell Says About Her Work-She Never Listens. New York Times: "No," said the little

lady at the telephone, "It is absurd to think that a telephone girl listens to the conversations that are going on over the wires. At the central office each girl has fifty wires, and you may imagine she is too busy to pay any attention to anything that is said except as she catches a word here and there. have to keep going over the wires to listen and see if people are talking still, if they have the people are taking stiff, if they have finished. But when you are going constantly from one to the other of the fifty you may be sure that you do not get a very connected idea of what is going on.

of the fifty you may be sure that you do not get a very connected dea of what is going on.

"Then you are not supposed to listen There is always some one looking after the girls at the central office and if they were found listening to the conversation the would be discharged—not the first time, perhaps, but after once or twice. Then, a telephone girl can't talk over the wires to any one on her lines except to answer questions, and she can't answer back if people get cranky. San't tell anything that goes on over the wires, either, if she happens to catch any of it. There are a great many important things that are said one way and another.

"I knew one girl, though, who used to get good tips on the races, and she used to play them, too. I don't knew how she did it. I shouldn't understand it, used to tend that wire sometimes, but I never knew what they were talking about. The only time when a girl might have a chance to listen at all if she wanted to would be Saturday afternoon, when there is not so much going on, only a few girls at the office and the wires are quiet. I knew one girl who was a switchboard operator, who had a man talk over her lines with his girl. One day she got the line for him, and he was telephoning and central called her up.

"Did you hear what that man was saying," she saled.

"No, she sald. I wasn't paying attention."

"He called me up, sald central, 'because he didn't get the connection right, you only to have heard all he had to say to that girl. Then she told her what it was.

"Can central hear me when I am talk-iner" gaked the man when he came out

You ought to have heard all he had to say to that sirt. Then she told her what it was.

"Can central hear me when I am talking? saked the man when he came out of the telephone box,

"Oh, no,' said the girl. 'Central can't hear.' But she did that time.

"It is to get to be a switchboard operator that most telephone girls try, though if all the managers at the central office are pleasant and easy to get along with they like the work there. A telephone girl likes her work, anyway. She is kept busy all the time, and she doesn't know where the time goes to. She is sorry to stay at home.

There are a great many large business tims that have switchboard operators now. They have anywhere from a doson or more rooms in a building to be connected, so that when a man wants to talk to anyone in the building he doesn't have to go up or down stairs, and a number of people can be talking outside at the same time over the four trunk lines.

"The switchboard operator's work is

number of people can be talking ouiside at the same time over the four trunk lines.

"The switchboard operator's work is easy compared with that of a telephone girl in the central office. Where the central girl will have fifty wires to attend to, and is rushed all day from one to the other, she will only have ten, and part of the time she doesn't have anything to do. It is pretty hard for her at first when she makes the change, and it is all she can do to keep awake with so little to do. But it is very satisfactory, for the switchboard operator has all the holidays; she never has to work on Sundays, she is responsible only to the firm she works for, and the rules are not so strict. Most of the girls try to get switchboard positions. Usually the firm that wants an operator sends to the central office, and they send some one. I knew one girl who got a position for herself. The firm that she went to sent up to the central office and asked them if they would send down Miss Smith.

"She's no operator,' they said there; we will send you some one else who is first class."

"We don't care about the operating."

"She's no operator,' they said there; we will send you some one else who is first class." "We don't care about the operating. We can judge about that for ourselves, said the firm, and she got the position. "No; wearing the receiver is not annoying, and telephoning doesn't affect the hearing, at least it never affected mine. I have known some girls whom it made deaf. Sometimes it makes your ear sore to wear it. They are training some girls now to wear the receiver on the right ear, so that they can use that ear in receiving. I don't believe I could hear except with my left ear, I am so used to taking the messages on that side. This is most convenient, too. You always see people use the other kind of receiver with the left hand, and put it to the left ear. Then you have the right hand free to write and the wire is not in the way.

"To be a first class operator, a girl ought to be caim and self-possessed, one of the kind who never gets rattled or losses her head. It is a strain when you have fifty wires to attend to, with people talking on all of them at once, some the people they want, while you hear of them complaining that they don't get shutting off this one and putting on someone else.

"Then business men are pretty apt to be cranky. They are nervous and in a heave and they don't see where and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they can't her work and they don't see when they

"Then business men are pretty apt to be cranky. They are nervous and in a hurry, and they don't see why they can't get the man they want to speak to first thing. They don't realise that central has forty-nine other wires and can't give them her undivided attention. Some girls will sort of joily a man along when he is cranky, and say 'number, please,' amiably and set him in a better temper, but if a girl is nervous and the man who is cranky calls up she is apt to snap out, 'Number,' as hatefully as she can.

"The telephone girl gets to know in a little while the people on her lines who

"The telephone girl gets to know in a little while the people on her lines who are pleasant, and she does the best she can for them always, though I must say the man who is very cranky gets waited on as soon as possible, for the girl is anxious to get him out of the way. It makes a lot of trouble for her if she is reported in any way, and she likes her work and will do the best she can to keen it.

work and will do the best she can to keep it.

"The telephone girl doesn't hear enough of the conversations that go on over her wires to know the business of the different people who are on the wires the most often unless she happens to see something about them in the papers, and then she remembers the names and knows who they are. She doesn't get any of the general information that any one else coming in contact with so many one else coming in contact with so man; different kinds of people would get,"
