# Monday Morning, Nov. 21, 1859.

The Teligraph. The news from Charleston, Va., is of an exciting character. A dispatch from Baltimore announces that an armed body of men are crossing the river at this point to rescue old Brown. We looked out at a late hour on Saturday night but nary armed man was visible, nor armed woman either. Of all the ridiculous nonnouse this is the most supremely sol Our prighbors over the river are in no arms but those of Morpheus, and were never more quietly and peaceably disposed.

Porsoxeo. On Friday night last, a man by the name of Clark, went into the confectionary shop of Mr. Snodgrass, on Union street, threw himself down upon the floor, and rolling over and over, apparently in great agony, said he had taken poison. Mr. Clark was requested to leave the premises, and take his easy flight to the stars from some port where the people had a faucy for coroner's inquests, and the ike. Mr. Clark recovering slightly, wantel to borrow five cents, avowedly for the purpose of paying his toll across the bridge, but really to sling into himself another dose of the poison which had already put him in such plight. As nobody secured inclined to make a permanent invest, even in so small a sum as five cents. Clark suddenly threw himself upon the broad of his back, and announced his intention of dying on the spot. He shut himself up like a jack-knife and opened again, he roared like a lion, and carried on in such a frightful manner that aphysician was sent for, and upon making an examination, discovered that the poor devil's stomach contained nothing but strychnine whisky. He recovered after a while, and suggered homeward, much to the relief of those who had been annoyed by his extraordinary conduct.

De CHARTIER'S RAILROAD .- There is cansual interest, says the Washington Examiner, now being manifested among the people in regard to the completion of this road. Whether correctly, or not, we cannot say, but we have heard it conjectured that the amount required to put the road in running order would not exceed two hundred thousand dollars. Now, if this be true, how easily could the matter be accomplished. Business men in the city of Pittsburgh alone would be justified in subscribing the amount specified, to say nothing of those residing along the line of the road, who are reported to be ready to contribute at any time when called upon. But the directors of the road appear to be asleep. They are said to be doing absolately nothing more than waiting for something to turn up, by which they will be put in possession of the necessary means.

Boy THE RIVER .- The recent rains have aused the river to commence swelling again, and there is a prospect of a good stage of water until the cold blasts shall come and freeze us up. The Liberty, Capt. Booth, left on Satur-

day with a good crowd of people and as much freight as she wanted. The Mary Cook passed down loaded to the guards and full of passengers. She never condestended to stop, owing perhaps, to the driving rain that was falling and the consequent ill prospect of getting anything to take with her. The St. Cloud, a splendid new boat from Pittsburg cast anchor up towards the bridge, and stood there, bidding for something destined to St. Louis. The Eunice, Capt. McLure, arrived from Cincinnati, with a good trip. She will

BED ENIGRANTS .- Two hundred and fifty German emigrants were transferred at Benwood, the other day, and sent on to Missouri. They filled four car loads. The shipping arrangements for this class of travel are so well conducted by the Baltimore & Ohio, Central Ohio and Columbus & Xenia and Little Miami Railroads, that but two changes of cars are made between Baltimore and St. Louis, one at Wheeling and the other at Cincinnati. The lines mentioned above are making this through

leave for Louisville.

emigrant travel a feature.

SATURDAY MARKET .- The morning dreary; not much in market and lots of people to buy it. The total variety consisted of meats, fish, potatoes, cabbage, tarnips, parsnips, carrots, green apples, dried apples, dried peaches, chickens, turkeys, lard, butter, eggs, corn, a few baslets and some ladies' collars. Dried apple brought Ccts. a quart; dried peaches 12cts.; butter 15@18cts. P fb.; lard 12cts.; eggs 18cts, per dozen; chickens 20@30cts. P pair; turkeys 60cts apiece; corn 50@ 55 ets ? bushel; meats unchanged.

Dep A DISAGREEABLE DAY .- It rained all day Saturday. A vigorous wind too prevailed, driving the descending fluid into the faces of all who ventured into the streets. Everything wore a woebegone look, even to the poor overworked horses whose ears occupied almost a horizontal position and whose hair was rough and irregular like the feathers on a Frizzly chicken. It was a sort of a day we don't want to see again.

En Suspicious .- We learn that certain suspicious looking boxes, consigned to the vicinity of Harper's Ferry, have been detained at Benwood Station, supposed to contain blunderbusses "and things," for tescue and insurrectionary purposes .--Previous to the Harper's Ferry outbreak, and since, a number of coffins, suplosed now to have contained arms, passed over the road.

GOING TO SEE HIS FATHER .- John Brown, Jr., son of Ossawattomie Brown, came up the river to Parkersburg, on Saturday, with the ultimate intention of visiting his father at Charlestown.

A Night or two ago, somebody tore down the sign of Grieshober, clock repairer, at the corner of Market and Quincy streets, and amazed the inmates of the house. This place, which was called into notice by a novel advertisement in the Argus newspaper, under the head of "Rat Exchange," has been the scene of many little disturbances lately, and it was rumored on Saturday, that an effort would be made to wash the house out during the

Common Sense rules the mass of the people, whatever the misnamed and misanthrope philosophers may say to the contrary. Show them a good thing; let its meritabe clearly demonstrated, and they will not hesitate to give it their most cordial patronago. The masses have already ratified the judgment of a physician, concerning the virtues of 10S-TETTER'S BITTERS as may be seen in the immense quantities of this medicine that are annually sold in every section of the land. It is now recognized as greatly superior to all other remedies yet devised for diseases of the digestive organs, such as diarrhea, dysentery dyspepsia, and for the various fevers that arise from derangement of those pertions of the system. Hostetter's name is rapidly becoming a household word, from Maine to Texas, from the shore of the Atlantic to the Pacific. Try the article and be satisfied. Sold by all druggists in the world. We heard of no sales to-day, though negotiations were making for different lots by the city packers. Receipts from different sections are had—some lots from as high up as Springfield, Ills., are coming in, although packing has already commenced at that point.

From the scarcity of stock in some parts of Illinoies, in proportion to the amount of corn, this grain is being shipped East already, and excellent prices received for it. At Mattoon station, some 5,000 acres of corn are in sight; one man has 3,800 acres of it. Strawn, stock feeder near Jacksonsville, has 2,500 acres of corn this season. The corn crop in the aggregate is undoubtedly a very large one

At Chicago, the Democrat of the 16th says pork packers are buying all the hogs that arrive there, though the number is not large. The receipts by railroad at that point have been about 7,500 head during the last three days. Prices paid are from \$3 90 to \$4 50.

FOR SALE. THE STAR NAIL WORKS.

In Ironton, Lawrence Co., O. IN CONSEQUENCE OF THE DECRASE OF TWO of the stockholder, the Star Nail Works are now offered for sale at a great bargain: These Nail Works are situated in the Iron Region, in the southern part of Ohio, about 30 miles above Portsmouth, and 140 miles above Cheinnatt. The main building is 150 feet in length and 116 feet in width, substantially built, and contains new and haproved machinery, consisting of 3 steam engines, 39 nail machines, a machine for making nail kegs; also, 10 boiling furnaces, and 3 heating furnaces, together with the necessary rolls, and has a capacity to manufacture 250 kegs of nails every 12 hours. In addition to the above, and to be sold with the Nail Works, 40 acres of Coal Lands, 6 miles distant by Railroad, and delivering coal at the nills at a cost not exceeding one dollar per ton; and has peculiar advantage for shipping nails to various points, as the Ohio River at this point and below is seldom obstructed. The location is regarded as the best in the country for supplies of pig iron and coal, and there are 50 blast furnaces within 30 miles, 9 of which bring their iron direct to town by the Iron Railroad; and the surrounding hills abound with coal and fire clay of easy access. Any further description is deemed unnecessary, as purchasers will desire to examine for themselves. CONSEQUENCE OF THE DECEASE OF TWO

sary, as purchasers will desire to examine for mean-selves.

If not sold previously, the above property will be offered at public sale on Thursday, the 24th day of November, 1859. Address, PETERS, JAMES & CO., Or JOHN PETERS, Ironton, Ohio, Oct. 6, 1859. oct25 '59-1m\*

Something New, True, Intelligible and Important.

FOR THE CURE OF THE SICK

at his office. He solicits patients who have been given up everywhere else as incurable. The reader might here ask, does he really cure such cases, or are his statements false? Has he cured such cases in Wheeling? In reply he would say, he has cured and is curing every day just such cases. He has cured and is curing a class of diseases that have baffled the skill of the medical profession in all ages of the world. The reader might here inquire by what means such cures are performed? Not by irritating the delicate membranes of vital organs by drugging the stomach, but by direct application of the poeitive and negative palarities of Elictricity. Again, it might be asked, has not Electricity been employed as a remedial agent for years, both in Europe and America, with indifferent results? And, are not numbers now using it in our years, both in Europe and America, with indifferent results? And, are not numbers now using it in our midst with no better results? This is all very true, and when we consider the nauner in which it has been applied the results have been more favorable than could have been expected. It has been considered beneficial in a few case only and uncertain even in those, There has been no fixed principles for applying the agent, and therefore no uniform results could be anticipated, but owing to the friendly relation existing between Electricity and health. remarkable cures have sometimes been performed. The current is generally applied through the hands or feet in such power as to convulse the whole nervous and muscular was as to convulse the whole nervous and muscular system and frequently produce irreparable injury. Sometimes it is applied by metalic conductors to different parts of the body, which is equal to a process of cauterization. Dr. Jonce has seen the effect of such treatment for years and the result has generally proved injurious to the patient, conclusively proving that no one should assume the responsibility of administering so powerful a remedy without understanding its effect upon the human organization.

Dr. J.'s mode of applying Electricity is new, and no guess-work, no uncertainty or doubt as to result that will follow. The diseased are invited to call witness the wonderful cures he is daily performing. avulse the whole nervous and m
