REVERSIBLE FEED MACHINES.

Making Four Distinct Stitches.

THE FLORENCE

The great Desideratum of Durability, United with simplicity, at last achieved.

THIS Machine makes the justly celebrated I Lock Stitch (alike on both sides of the fabric) as also the Knot, Double Lock, and Double Knot—all stronger and more elastic than the Knot.

The only Machine having a self adjusting

shuttle extension.

It is almost noiseless.

The stitch can be changed without stopping

the machine.

Its motions are all positive.

The machinery is so simple that it cannot get out of order.

It w ll hem, fell, bind, gather, braid, quilt, and gather and sow on a ruffle at the same

ime. The Tension is a wheel and not an unreliable wire spring.

Each machine is furnished with Barnum's

LET COMMON SENSE DECIDE

What is the rational mode of proced in cases of general debility and nervous p tration! Does not reason tell us that indicain cases of general debility and narrous prostration? Does not reason tell or that indivious atimulation is required? To reason to violent purgation in such a case is at about as is would be to bleed a starving men. Yet it is done every day. Yea, this stephs and unphilosophical practice is continued in the teeth of the great fact that physical wea ness with all the nervous disturbances that accompany it, is more certainly and rapidly refleved by Hustelter's Stomach Bitters than by any other medicine at present known. It is true that general debility is often attended with torpidity or irregularity of the bowels, and that this symptom must not be averlocked. But while the discharge of the waste matten of the aystem is expedited or regulated, its stop must be recruited. The Bitters de both. They combine aperient and anti-bilious properties, with extraordinary tonic power. Even while removing obstructions from the bowels, they are and invigorate those organs. Through the stomach, upon which the great vegetable specific acts directly, it gives a healthy and parmanent impetus to every enfection greenlated, the blood reinforced with a new accession of the alimentary principle, the nerves braced, and all the dormant powers of the system roused into healthy action; has spasmedically, as would be the case if a more stimulant were administered both for a vene the system roused into healthy action; not spasmedically, as would be the case if a nive stimulant were administered, but for a continuance. It is in this way that such extended in the condition of the feeble, emaciated and nervous invalidably the use of this wonderful corrective, alterative and torice.
