

MONEY TO LEND

On Real Estate. Thirty-one Acre Tract land one-fourth mile from city limit, a real bargain.

LIFE, FIRE and every other form of Insurance.

ABBEVILLE INSURANCE & TRUST CO.
W. L. PEEBLES, Manager.

BROWNLEE.

The crops of this section are needing rain, some farmers are re-planting, while others are trying to hoe and plow to keep the plants growing, while still others are taking life easy—are fishing. Three picnic crowds were fishing this week, and we hear they had good luck.

Mrs. Allen Martin, who was taken to Anderson Hospital a few days ago is at home, getting along as well as could be expected.

Mr. and Mrs. F. E. Patterson, from Monterey, spent the day with Mr. and Mrs. Arthur Campbell Thursday.

Mr. George Hodge was a visitor to Abbeville Tuesday.

Miss Helen Prince, of Carswell, who has been visiting her grandmother, Mrs. Henry Hill, and little cousin, Addie Hill, returned to her home Sunday.

Miss Minnie Hodge, Misses Ruth and Grace Daniel spent Sunday with Mrs. Mattie Taylor.

Miss Edna Prince of Antreville, is spending awhile with Mrs. Adger Hodge.

Miss Vernon Hall spent Saturday and Sunday with Miss Ruby Patterson.

Mrs. Edd Smith is on our sick list this week. We sincerely hope she will soon be better.

Mr. J. O. Cann, was visiting his friends in Broadway, Ferguson town and Antreville this week.

Mr. and Mrs. Ben Hall and children spent Friday with Mr. Harkness.

Messrs Jim Ferguson, William Giles were visitors to Abbeville Monday.

Miss Ethelene Patterson spent the day with her little cousins, Misses Katie and Nellie Cann.

Little Everette Lanier Giles has been very sick this week. We hope he will soon be better, for we know it is bad to be sick these hot days. We that are well should be grateful for it, and remember to visit the sick once in awhile. Sometime, I think some people ought to be sick a day or two to appreciate our health which is better, yes—better than wealth.

Mr. Sam Shaw from Georgia, is spending a few weeks with his sister, Mrs. A. Campbell.

DO YOU KNOW THAT

To-day is always the best day to clean up?

Fresh air, food, rest—these three combat tuberculosis?

The U. S. Public Health Service has reduced typhoid fever 80 per cent in some communities?

Overeating, constipation, lack of exercise, foul air, eye strain, may produce headache?

Polluted drinking water causes many deaths?

An efficient health officer is a good community investment?
Bad teeth handicap children?
Insufficient sleep endangers health?

CHEESE FACTORIES FOR PIEDMONT COUNTIES

Experts From Washington Visited River Falls, River View, and Marietta On Co-operative Basis.

Greenville, S. C., May 15.—Messrs. Dawn and McLain of Washington, D. C., dairy and livestock experts, W. W. Fitzpatrick, of Clemson College, and A. H. Chapman, farm demonstration agent for Greenville county, visited River View, River Falls, and Marietta yesterday morning with the view of selecting a site for the proposed cheese factory which in all probability will be built in this county by the United States government. The government experts wish to locate the plant where there is plenty of cool mountain spring water to keep the milk sweet. The temperature of several springs in the upper part of the county was taken, statistics were taken regarding the number of cows, and railroad facilities were looked into. The government men stated that they found conditions very satisfactory, but were unable to say just at this time which place will be selected.

It is planned to build three cheese factories, one in Oconee, one in Pickens, and the other in Greenville. Several plants were built in North Carolina last year by the government. All of these factories have proved very successful.

The factory will be operate on a cooperative plan, and the success of it will depend largely on the attitude of the farmers residing nearby. The plant will furnish a market for all the milk within a radius of five miles. A government expert will be placed in charge of the concern, and he will train some young man in cheese-making. As soon as the young man is capable of assuming absolute charge, the government expert will divide his time between the three plants in the upper part of the State.

"THE BIRTH OF A NATION" TO PLAY 3 DAYS IN ANDERSON.

It will be welcome news to residents of the Piedmont, where the scenes of the story are laid that D. W. Griffith's world-famous spectacle "The Birth of a Nation", has been booked for a three days engagement at the Anderson Theatre, Anderson, beginning Monday night, May 22nd. Matinees have been arranged for Tuesday and Wednesday, starting at 2.30, and seats for the five performances will be on sale at the box office after Monday morning, May 15th. The night performances Monday, Tuesday and Wednesday will be started at 8.30. Special service is being arranged on all railroads entering Anderson and out-of-town patrons should consult their station agents for details.

"The Birth of a Nation" company, consisting of 50 people and two car loads of special equipment, comes to Anderson direct from a two month's run at the Tulane Theatre, New Orleans, and from the Jefferson theatre Birmingham, where it is being presented this week as a special feature of the Confederate Reunion. It is a mighty film-and music drama built upon Thomas Dixon's story of life and love in the Piedmont, "The Clansman", but it far surpasses the Dixon novel and play in vastness and grandeur. Eighteen thousand people and three thousand horses are seen in its great battle scenes and the total cost of the production was \$500,000. A symphony orchestra of 25 is carried by the company and an equal number of stage mechanics and electricians are employed in working the stage effects. Among the notable scenes and personages shown are: The Battle of Petersburg, Sherman's March to the Sea, Lincoln Signing His First Call for Volunteers, the Surrender at Appomattox, the Assassination of President Lincoln and the Rise of the Ku Klux Klan.

The prices for the Anderson engagement will be: Nights, Best orchestra and box seats, \$2.00; Upper box and front balcony seats, \$1.50; front seats downstairs and in remainder of balcony, \$1.00, second balcony (not reserved) 50c. Matinees: All box and orchestra seats, \$1.00, middle section of balcony, 75c; rear of balcony, 50c, and second balcony, (not reserved) 25c. Remittance payable to the Anderson Theatre must accompany all mail orders. It is a strict rule of the company that no seats be laid away unless paid for.

What a Railroad's Test Farms Show

The Central of Georgia Railway exists mostly in Georgia, but extends into Alabama. Agriculture is its chief hope of freight. To demonstrate better methods of agriculture, it has arranged to direct the operations on 27 small farms along its lines, with an average of 38 acres. These small farms are cultivated and fertilized in strict conformity with advice received from authorities of the Georgia State College of Agriculture and the Alabama College of Agriculture. The results are checked up by these same authorities. By this alliance the railroad seeks to demonstrate the usefulness of the colleges of agriculture in the prosecution of modern and successful farming.

The results of another year's operations on these small farms have become available. From the corn, cotton, small grains and cowpea rotation, with the occasional introduction of sweet potatoes and sorghum, the net profit per acre is \$15.93—a marked increase over the previous year, when each acre netted an average of \$11.01. The total crop for the year 1915 on the 1,031 1/2 acres, divided into 27 farms widely separated, amounted to \$35,463.15. After all the expenses of fertilizer, seed, labor, rent, taxes, etc., have been deducted there remains a total net profit of \$16,428.39. And this has been accomplished on farms no better than those neighboring them that have barely paid expenses or have failed to do so. Their example ought, of course, to convince and inspire.—The Progressive Farmer.

At Last—A One-Adjustment Cream Separator

BEFORE you buy any cream separator, come in and look at the Primrose. But one adjustment is needed to keep it in perfect operating condition. This adjustment is a simple one for keeping the bowl at the correct height—an adjustment that you or your wife can safely make.

The adjustment is made from the outside of the separator by either raising or lowering the bearing containing the hardened steel point, upon which the spindle revolves. A slight turn with a screwdriver, perhaps once a year, does the work.

The Primrose is a well-constructed, close-skimming, durable cream separator, one it will pay you well to buy. When can you arrange to see it?

International Harvester Company of America (Incorporated)
