

Proposals of Sir John Ross to reach the North Pole.—The following is an extract of a letter from Capt. Sir John Ross, R. N., to Capt. W. H. Smyth, R. N., President of the Royal Astronomical Society:

"Sir: I beg leave to submit the following plan and proposal to the President and Council of the Royal Astronomical Society, for their consideration. The measurement of an arc of the meridian has been long a great desideratum, and the failure of every attempt that has been made at Spitzbergen for this desirable object, as well as of the attempt made to reach the North Pole, has been because the summer has been selected for that purpose; whereas the spring should have been the season chosen, namely, the months of April and May for both services, but which could not be put in execution by the means hitherto adopted. I have now to inform the President and Council of the Royal Astronomical Society that I have submitted a plan to the Admiralty for carrying into execution these double and desirable objects, by wintering at Spitzbergen, and employing my officers and crew under the direction of the talented son of the celebrated Professor Schumacher, whom I have engaged for this purpose; while, at the proper season it is my intention to attempt to reach the North Pole on sledges drawn by Swedish horses, being a modification of the plan proposed by Mr. Scoresby, and of which that highly talented and well informed individual has given his unqualified approbation. And, from the year's experience I have had in Sweden in that mode of travelling, I can safely assert that there is no other officer in the navy that possesses those advantages so necessary to complete success in a greater degree, and for this purpose I make this statement in the hope that, when duly considered by the President and Council of the Royal Astronomical Society, they will be pleased to signify to me their opinion on the importance of the objects in question, and such a recommendation for its being put into execution as they may think fit."

Arrival of Mechanics.—The New York True Sun says that among the recent arrivals are 600 carpenters. Within the last year over 1,200 tailors are known to have landed from England alone to say nothing of those who reached New York from Germany. The number of oastlers and drivers of stages and carriages, thrown out of employment in Great Britain and on the continent, by reason of the Rail Roads, is enormous; the number cannot be less than 6,000. A large portion of the corps of whips will find their way to the United States. The immense number of stone masons and stone cutters in Germany, and all along the Rhine, is very great. For years they have been employed at 25 to 30 cents (good wages in Europe) on the public works—building up Ehrenbrighstein, Moos and other fortifications. All this is now stopped, and of the thousands of stone workers who are out of employ, a large number are preparing to embark for the United States.

Sarcasm on a Solicitor.—Lord Thurlow often treated the bar with great rudeness, and his demeanor to the other branch of the profession sometimes awakened recollections of Jeffreys. A solicitor once had to prove a death before him, and being told upon every statement he made, "Sir, that is no proof," at last exclaimed, much vexed, "My Lord, it is very hard that you will not believe me; I knew him well to his last hour; I saw him dead in his coffin, my Lord, he was my client." Chancery—"Good God, Sir! Why did you not tell me that before? I should have not doubted the fact one moment, for I think nothing can be so likely to kill a man as to have you for an attorney."

Pride in Children.—Pride in children needs to be checked, but it should be accompanied with great prudence, or mischief may follow. I will relate one of the most successful attempts to suppress it of which I ever heard. Frederic, Duke of York, a son of George the Third of Great Britain, was married to the Princess royal of Prussia, a lady as much celebrated for her charity, as she was for her piety and good sense. One day walking to Outlands, in Surrey, when they had a country seat, she saw an interesting little ragged girl and inquired of her concerning her home and friends.—She found that she was a child of a poor widow who had been left with a large family to provide for. The duchess took this child home with her, to train her up in her family. After clothing the child, she had the rags taken and washed, and put by in a box. If on any occasion, the child became haughty toward any of the domestics, the correction was to bring out the rags, and dress the child with them for that day. Such treatment could scarcely prejudice the child against any thing else but pride.—*Christian Watchman.*

Flummery.—Some of the literati affect to believe, that a person to become eminently great and distinguished, must spend five or six years in the hall of a college or university; but we don't believe a y such thing. Some of the greatest and most powerful men the world ever knew—some of the most gallant and fearless warriors, and consummate statesmen, the world has ever produced—never saw the inside of a college. Idle, vagrant loafers—scandalous classical bigots, and egotistical literary hobies, may prate as much as they please about a "liberal education, and the study of the classics," but it will avail nothing. It is all—flummery!

A gang of runaway negroes were arrested near La Grange, Georgia a few days since, by a few young men. They were armed with scythes blades and being approached, they brandished their weapons and sworn they would not surrender. They were fired upon repeatedly, without effect, and as often would they rush upon their pursuers and force them to give back, notwithstanding their advantage in arms and ammunition. Nor did they suffer them-

selves to be taken, until their leader was completely disabled and another of the number severely, and the third slightly wounded.

Extract of a letter received in Charleston, dated, BEAUFORT, (S. C.) May 24, 1847.
Your Cotton, like that of many others, looks badly of late, so much so that I have sent to the Point for seed; but the overseer had, unfortunately, none to spare. Application was made elsewhere, but none could be obtained except here, were I succeeded in getting a few bushels. The Cotton still drooping, the boat was sent here for more, but I have been enabled to procure but a very few bushels. Many crops have been much injured, and there is no seed to replace the dead plants. Mr. —'s fields are in this condition; even Cotton that has just come up is dying.

Transplanting Peach Trees.—A writer in the Horticulturist, thinks that it is not advisable to transplant peach trees the first year after budding. This was once my opinion; but I have found that trees planted in the spring, that had been budded the previous fall, did better than if left one year longer. They are more certain of growth, and transplanting them makes little difference in the growth. I transplanted some last spring in the latter part of April or the beginning of May, that have grown more than six feet high. I was first led to this practice from a nurseryman, to whom I applied for some trees, and I thought it at first, nothing more or less than an excuse to sell me the young trees, as he had no older ones of the sort I wanted. But I have found by experience that it is the best way; and all that a person has to do is to take care that they have living buds, not what is called by some dormant ones. In a lot that I planted out last spring, I believe I had but one which missed, though I had three or four that did not start till late, but they made nearly three feet.

Mammoth Vine.—The Horticulturist of May gives an account of an enormous vine at Burlington, New Jersey, on a farm called West Hill, about two miles from the town. A letter in that periodical, says of it: "At three feet from the ground, it measures six feet one inch round the trunk, and at ten feet high it is positively three feet in circumference! It is a native male grape, and has been the wonder of the neighborhood as long back as the memory of man reached. It is still healthy, and its giant folds run over and cover four trees, one of which is a full sized white oak, and the others are quite large. "A spring 6 feet 1 inch long, will enclose two tolerable corpulent people; and these dimensions are as large as a good sized washing tub.—You may thus form an idea of its great growth. This vine grows near a springy soil on upland, its roots no doubt penetrating to the water.—May not this teach us a lesson to give the rootlets, wherever it is possible, access to a spring of running water; it may be a question, too, whether we do not cut down our vines too much."

GOOD SENTIMENTS.
Agriculture is the nursery of patriotism. A wise government will not be slow in fostering the agricultural interest. Let every farmer who has a son to educate, believe and remember, that science lays the foundation of every thing valuable in agriculture. Science must combine with practice to make a good farmer. The opposition against book farming rests on the shoulders of two monsters, ignorance and prejudice. If you separate science from agriculture, you rob a nation of its principal jewels. Agriculture, aided by science, will make a little nation a great one. All the energy of the hero, and all the science of the philosopher, may find scope in the cultivation of one farm. A skilful agriculturist will constitute one of the mightiest bulwarks of which civil liberty can boast.

THE FARMER'S CREED.
We believe in small farms and thorough cultivation. The soil loves to eat as well as its owner and should be nurtured. We believe in large crops, which leave the land better than they found it—making both the farm and the farmer rich at once. We believe in going to the bottom of the things, and therefore in deep ploughing, and enough of it; all the better if with a subsoil. We believe that the best fertility of the soil is the spirit of industry, enterprise, and intelligence; without this, lime and gypsum, bones and green manure, marl or plaster will be of little use. We believe in good fences, barns, good farm houses, good stock, and good orchards. We believe in a clean kitchen, neat wife in it, a spinning pianno, a clean cupboard, dairy, and conscience. We firmly disbelieve in farmers that will not improve, in farms that grow poorer every year; in sturmed cattle, in farmers' boys becoming clerks and merchants, in farmer's daughters unwilling to work; and in all farmers who are ashamed of their vocation.

R. S. ROBERTS,
As just received, and is receiving, a fresh supply of the following Goods, at the **Cheap Cash Store,**
Calicoes, 64 cents to 75 cents a yard, Nankens, Georgia, 124 cents a yard, Checks, 124 cents a yard, Crash for Towels 124 cents a yard, good Bleached Linen Table Diaper 104 cents a yard, Bird Eye Diaper, in a quality, 374 cents a yard, Ladies Muslins & Balzories for Dresses, Black Silk Nett Gloves, Brown Linens for gentlemen's and children's wear, Bed Tick, a superior article, Umbrellas and Parasols, Bleached and unbleached Homepens, Cottons Spool Thread, only 5 cents a spool, Grass Cloth Skirts, may 26 3t 18

UNITED STATES ARMY.

RECRUITING SERVICE.

WANTED for the United States Army, ABLE BODIED MEN, between the ages of 18 and 35 years, being above 5 feet 3 inches high, of good character, and of respectable standing among their fellow-citizens. None need apply to enter the service, but those who are determined to serve honestly and faithfully, the period of their enlistment, viz: "during the war" with Mexico.

This Table shows the amount of pay which enlisted soldiers, according to their respective grades, are entitled to receive for their services.

Grade	Pay per Month (Dollars)	Pay per Month (Dollars)
To the Sergeant Major, Quartermaster Sergeant, Chief Musician, and Chief Bagler each	17	17
To the First Sergeant of a Company	16	16
Ordnance Sergeant, and Chief Cook	13	13
All other Sergeants—each	9	10
Corporals,	8	9
Baglers,	8	
Musicians,	8	
Farriners and Blacksmiths,	11	11
Artificers,	11	
Privates,	7	8

A bounty of TWELVE DOLLARS will be paid to each recruit enlisted for the Artillery or Infantry arm.
By the 9th section of an act of Congress, entitled "An Act to raise, for a limited time, an additional military force, and for other purposes," each non-commissioned officer, musician, or private now in service, or who may hereafter be enlisted during the present war with Mexico, and who shall receive an honorarium, or discharge either by expiration of his term of enlistment, or for disability incurred in the course of his service, will be entitled to a warrant for One hundred and sixty acres of Land, which he will be at liberty to locate in any body, upon any of the public lands that may be subject to private entry; or he may, at his option, when honorably discharged, receive treasury scrip to the amount of one hundred dollars, bearing six per cent interest, payable semi-annually, and redeemable at the pleasure of the Government.
Besides the bounty pay, as above stated, one ration per day is allowed every soldier, which is amply sufficient for his subsistence; also, a large supply of comfortable and genteel clothing. Good quarters and fuel are at all times furnished; and every attention will be paid to making those men who may enlist, and are determined to serve their country in good faith, comfortable and contented with their situation. The best medical attendance is always provided for the sick soldier; and no deduction of pay is made during the period he is unable to perform his duty. Should the soldier be disabled in the line of his duty, the laws provide a pension for him.
By the above it is seen that the pay and allowances are respectable, and that, with prudence and economy, the monthly pay of the soldier may be laid up—as every thing requisite for his comfort and convenience is furnished by the Government, including his sugar and coffee.
The sum of TWO DOLLARS will be paid to any citizen, non-commissioned officer and soldier, who shall bring to rendezvous an able bodied recruit, who shall be regularly enlisted. The citizen should present his recruit to the Lieutenant or Captain, and not to the Recruiting Sergeants.
Plauter's Hotel, Edgfield C. H. S. C.
Recruiting Rendezvous, June 1, 1847.
June 2 3t 19

NOTICE.
MR. ROFF, who has held conditionally an interest in the right of Edgfield District, to Hutchins' Reaction Mill Wheels, (Patent) has never complied with said condition, therefore he holds no interest, and has no right to sell or make any contract for said wheels. We, the undersigned are the owners, of said right, and a right purchased from any other, unless our agent, will not be good.
Mr. J. T. WEBBER, we authorize, with full power to act as our agent.

STATE OF SOUTH CAROLINA—EDGEFIELD DISTRICT. IN THE COURT OF ORDINARY.
Julius C. Pardue, Complainant vs. Daniel P. McVary, Adm'r of Daniel P. Walker, dec'd, & others, as executors, Defendants.
JULIUS C. PARDUÉ, having this day filed his petition before me, setting forth that he is a creditor of Daniel P. Walker, dec'd., to a considerable amount, and that Samuel P. McVary, administrator of that estate, has removed beyond the limits of the State, without having accounted, it is therefore ordered, that the said Samuel P. McVary, adm'r, as aforesaid, and Penelope Williams and Nathaniel Burton, administratrix and administrator, of Gibson J. Williams, dec'd., who was surely to said administration, do appear before me in the Court of Ordinary, to be held at Edgfield Court House, in the District aforesaid, on Tuesday the 29th of June inst., to show cause, if any they can, why they should not render before me, an account of said administration. Given under my hand, at my office, on the 1st June 1847.
JOHN HILL, O. E. D.
June 2 4t 19

Brought to the Jail
Of this District, on the 14th ult., a negro man, who calls himself JIM, says he belongs to Mr. Pinkney Brown, who resides in Baldwin county, Geo., within ten miles of the town of Milledgeville. Jim is of a dark complexion, about 26 years old, 5 feet 7 1/2 inches high, has a scar on his forehead, and one on his left jaw. Says he has been away from home about two months.
The owner is requested to come forward, prove property, pay charges, and take said slave away, otherwise he will be dealt with as the law directs.
C. H. GOODMAN, J. E. D.
June 2 4t 19

SOUTH CAROLINA—EDGEFIELD DISTRICT. IN THE COMMON PLEAS.
Henry B. Gleason, Declaration vs. James H. Jones, & Co., Attachment.
THE Plaintiff in the above case, having this day filed his Declaration in my office, and the Defendant having neither wife nor attorney, known to reside within the limits of this State, on whom a copy of the said Declaration, with a rule to plead, can be served. On motion of Mr. Gray, Plaintiff's Attorney, it is ordered, That the said Defendant appear and plead to the said Declaration, within a year and a day from the date hereof, or final and absolute judgment will be awarded against him by default.

TO THE PUBLIC.
THE undersigned would respectfully announce to Travellers and persons visiting Hamburg, that he has taken for a term of years, the Hotel, long known as **Hubbard's American HOTEL,**
Which it is his purpose to keep as such a house should be kept, and will only promise to all who favor him with a call, that he will do all in his power to please; and where as much comfort and quiet may be expected as can be found in any Public House.
A careful and attentive Hostler will be kept constantly in the Stable, and Horses shall be attended to in a way that shall give entire satisfaction.
A liberal patronage is respectfully solicited.
WM. KETCHAM,
Hamburg, March 8—10 7t 7

DR. JACKSON'S PILE EMBROCATION
Warranted to Cure.
HEMORRHOIDS, OR PILES, is a disease produced by local irritation, costiveness, purgative stimulants, undue determination of blood to the hemorrhoidal vessels by excessive riding or walking, or a congestive state of the liver, and peculiarity of the constitution itself.
It is usually considered under three forms, or varieties, as follows—Blind Piles, White Piles, and Bleeding Piles.
This disease is so common, and so very well known, that a description of its symptoms is not deemed necessary.
The success that has followed the use of the Embrocation in the cure of it is disease, has been truly astonishing. Physicians now advise their patients to try it, as the only
Pile Medicine.
In addition to its being a positive remedy for the Piles, it never fails to cure that INTOLERABLE ITCHING, which is so very common, and has its location in the same parts as the Piles.
Read the following, from the editorial columns of Alexander's Weekly Messenger—
"Found at last—A cure for the Piles—Physicians and Chemists have long been anxious to discover a medicine that would cure one of the most troublesome diseases, the Piles. Success has at last been the result. DR. JACKSON'S PILE EMBROCATION not only stops all bleeding, allays pain and inflammation, subdues that intolerable itching, but effectually cures, like a charm, and in a very short time, persons whose lives have been rendered miserable for years.

Leghorn Bonnets.
ONE CASE fine LEHORN BONNETS, at \$2 75 each, just received and for sale by **R. S. ROBERTS,**
may 19 3t 17

New Trusses for Rudeness.
RIDDEL'S TRUSS AND ABDOMINAL SUPPORTER.
THE Subscriber having bought the Patent Right of Riddell's Trusses and Abdominal Supporters, recommends them to the public, as the most valuable, and perhaps only instrument of the kind that performs a cure in almost every case of Rupture. It is adapted to the anatomical structure of the Pelvis, and is admirably calculated to relieve these cases of Prolapsus Uteri, or falling of the womb, which make the patient suffer so much to the universal destruction of health. The Abdominal Supporter is eminently serviceable in Piles, never failing to cure them by removing the cause.
Persons having Negroes ruptured, may have a cure guaranteed, and the terms not more than one third of what the fund would be increased in value. Where the cure cannot be effected, from the destruction of the parts by time, the Truss will enable the wearer to encounter the most severe work of any kind. Patients would do well to attend to this notice.
Price of Truss, \$5, with guarantee, and \$60 or \$100, or as may be agreed on by a Doctor.
R. S. ROBERTS,

Dr Brandreth's Pills.
CITIZENS OF THE U. STATES.—Let it be remembered that Brandreth's Vegetable Universal Pills have now been before the citizens of the United States for nearly six years, and used by hundreds of thousands. They are so well known that it need scarcely be mentioned that they are a "Purgative Medicine," so "justly balanced" that the "experience of a century" has proved that they may be taken in any dose, according to Nature's requirements, and this rule refers to both sexes and all ages. They have been used in every variety of derangements of the human body, and yet, when properly used, never failed to restore to health, except in those cases where nature has exhausted before the pills were commenced with.
Experience has taught that Brandreth's Vegetable Universal Pills remove all corrupt humors from the body, in an easy, safe, and effectual manner; produce no effect but what will fructify the system, and perfect purification of the blood, and thereby cure the disease, (whatever name it may be called,) and give perfect health to the whole system.
Remember, Druggists are not permitted to sell my Pills—if you purchase of them you will obtain a counterfeit. B. BRANDRETH, M.D.—Dr. Brandreth's Principal Office 241 Broadway, N. Y.; other offices in New York.
The genuine only for sale in Edgfield District by **R. S. ROBERTS,** Edgfield Court House, KENNES & TRAZER, Hamburg, and SWLEY'S Store, Meeting street.
Every Agent having the genuine has a certificate of Agency, signed by the Doctor himself.

Beckwith's Pills.
The Proprietor, many years ago, while searching for a remedy for his own ill health which the prescription of the day had failed to benefit, to hit upon the composition of these Pills, and they proved entirely successful in restoring his health.—Their composition was freely communicated to many Physicians, and it was not the design of this invention, that they should extend beyond the private practice of himself, and that of his medical friends. Applications for them, however, began to multiply, and he was advised by many of his professional brethren, and other gentlemen of character and distinction, to prepare a quantity of them and place them in the hands of an apothecary. Even this seemed insufficient, and he was urged to send them, by means of agencies, throughout the country. Calumel had long been a common domestic remedy. There was scarcely a family in which a vial of it was not to be found, and in which it was not used with a degree of freedom from which a well-informed Physician should shrink. A strange infatuation too seemed to exist among many of the Faculty. Hardly a case was presented for whether acute or chronic, in which Calumel was not given, in some stage of the disease, without fear or reflection; and thousands are still suffering from its pernicious effects. Calumel is, without doubt, a most valuable medicine, and in some cases may be regarded as essential, but it should not be stricken from the list of domestic remedies, and be administered only under the prudent and judicious advice of a thoughtful Physician. Upon trial, by many Physicians and others, these Pills were found to be a substitute for mercurial preparations in a large number of cases, and hence their popularity, and the large demand for them. The idea of obtaining a Patent for them was never entertained, nor has it been sought to; this day it is believed that by giving them a popular form and circulating them through the country, thousands would be benefited by their use. Calumel, when used, never but of the prescription of a physician, and never used, unless it has been compounded with a medicinal ingredient, and is not given, in some stage of the disease, without fear or reflection; and thousands are still suffering from its pernicious effects. Calumel is, without doubt, a most valuable medicine, and in some cases may be regarded as essential, but it should not be stricken from the list of domestic remedies, and be administered only under the prudent and judicious advice of a thoughtful Physician. The idea of obtaining a Patent for them was never entertained, nor has it been sought to; this day it is believed that by giving them a popular form and circulating them through the country, thousands would be benefited by their use. Calumel, when used, never but of the prescription of a physician, and never used, unless it has been compounded with a medicinal ingredient, and is not given, in some stage of the disease, without fear or reflection; and thousands are still suffering from its pernicious effects. Calumel is, without doubt, a most valuable medicine, and in some cases may be regarded as essential, but it should not be stricken from the list of domestic remedies, and be administered only under the prudent and judicious advice of a thoughtful Physician. Upon trial, by many Physicians and others, these Pills were found to be a substitute for mercurial preparations in a large number of cases, and hence their popularity, and the large demand for them.
