A Weekly Visitor TO THE FARM, WORKSHOP AND FAMILY CIRCLE.

It is proposed to publish at Columbia, as soon as a sufficient number of bona fide subscribers are sent in, a weekly AGRICULTURAL and FAMILY NEWSPAPER, under the above title. In this enterprise are engaged the best practical and scientific Agricultural writers in the State, while the Literary, News, Manufacturing, and religious departments will be under the control of the best Literary talent of the South. We shall also devote a space to the Mechanic Arts, which will be conducted by two of the best Mechanics in the South. The necessity for such a work at this time is evident to all. Our change of labor necessarily involves changes in the whole industrial pursuits of the South. To arrive at the best and most remunerative kind and mode will require experiments and discussion, and in no other way can the people be so well informed on such matters as through the columns of a journal such as we propose to publish. It will require 2,500 subscribers to insure the commencement of the enterprise. This number can be easily obtained if those who wish to sustain such a journal at the South will exert themselves among their friends. We promise them a WEEKLY VISITOR equal in contents and typographical execution to any in America. Price \$3 per annum, currency, or \$2 coin, to be paid 6 months in advance, on receipt of the first number. R. M. STOKES & CO., August 3

1866. INCREASE OF RATS.—The Farmer's Gazette (English) asserts and proves by figures that one pair of RATS will have a progeny and descendants no less than 651,050 in three years. Now, unless this immense family can be kept down, they would consume more food than would sustain 65,000 human beings.

See "COSTAR'S" advertisement above.

1866. RATS versus BIRDS.—Whoever engages in shooting small birds is a cruel man; whoever aids in exterminating rats is a benefactor. We should like some one to give us the benefit of their experience in driving out these pests. We need something besides dogs, cats, and traps for this business.—Scientific American. N. Y.
