

The Green-Hill Mountaineer. This time-honored and esteemed paper makes its appearance in a new dress pleasing to the eye and creditable to its worthy proprietor.

The Temperance Advocate. We notice with pleasure the enlarged and otherwise improved appearance of the Temperance Advocate.

The Southern Lutheran General Synod. Composed of one delegate, clerical and lay, for every six members of each Synod, convened in Archdale-street Church, Charleston, last Thursday.

The Secretary, Mr. Chas. W. Greene, of Jackson, Tenn., will furnish any information desired. We would advise our local societies to be represented.

The Southern Lutheran General Synod. Composed of one delegate, clerical and lay, for every six members of each Synod, convened in Archdale-street Church, Charleston, last Thursday.

Synod was opened with communion, and other appropriate services. The report of the President was read by Rev. T. W. Dosh.

The election for permanent officers of Synod resulted as follows: Rev. S. A. Repass, Chairman; G. M. Beitzhoefer, Secretary; Wm. Hiltiwanger, Treas.

Episcopal Convention. The Eighty-second Annual Convention of the Diocese of South Carolina assembled in Charleston Thursday last and was duly organized.

Rev. J. D. McCullough was elected Secretary, and Mr. T. H. Horry, Treasurer. Rev. A. Toomer Porter was appointed preacher to the next Convention, and Rev. W. O. Prentiss, Alternate.

The report of the Standing Committee, in which touching reference is had to the death of Bishop Davis and the Rev. C. P. Gadsden, closes with the following admonition: "The Committee close their sad record with one grave fact. They have not received one candidate for orders during the past year. They commend this solemn fact to the conscience of the Church."

Legislators out of Funds. With an eye to business the General Assembly adjourned only on a recess, and now a call is being made for another session on the plea that the public finances need looking into, or rather after. What good can possibly come of an extra session, one outside of the detestable body of legislators can see. The only solution is that they are out of funds themselves—the public interest is not in all their thoughts—and they hope not only to devise some ways and means to recover something on their back due certificates, but at the same time increase the chance for a bigger dig into the Treasury whenever it is in funds.

Advantages of Five Liberal Republicans. Five Liberal or moderate Republicans passed through Fredericksburg en route to the Cincinnati Convention. They were very "liberal" at the depot, treating promiscuously "Free drinks, &c., for all their friends. These drinks were much "up-lifted," and felt themselves and the importance of their mission and position—and the whiskey also.

to five years in the penitentiary. Willis told the whole tale straight out from beginning to end. And a dark, stirring, and startling tale it is. Hamilton, who is an appearance, dress, manners, &c., an intelligent and polished gentleman, is now in jail in Augusta, preparatory to being taken to the penitentiary. Thomson is the county seat of a new county, and has, as yet, no jail.

The Nomination. Did we collect all that has been written and expressed North, South, East and West, gratulatory of the nomination made by the Cincinnati Convention, and then had the ability and time to condense the pith, our limited space would not near suffice. The satisfaction is wide spread, and every day only increases the conviction that the selections made are the best.

The book for subscription is open at the office of the Working Christian, where I shall be happy to confer with friends concerning this matter. Any friend addressed to "Palmetto Orphan Home," care of Working Christian, Columbia, S. C., will receive prompt attention.

THOMAS R. GAINES. Columbia, S. C., May 9th, 1872.

The Ku Klux Cases in the Supreme Court. The Washington correspondent of the Charleston Courier, under date of May 3, says:

The United States Supreme Court will, it is said, render a decision in one of the cases from South Carolina, known as the Ku Klux cases on Monday next. Several of the appeals brought in this class of cases have been dismissed as not properly brought. But in a call arising under a writ of Habeas Corpus, the application to the Supreme Court is sustained, and the Court will render judgment in such case, and the impression is that the Court will decide that the suspension of the writ of Habeas Corpus is illegal. The Court will also decide, it is thought, that the regulation of the elections, and determining who shall vote, belongs to the States, by virtue of the Fourteenth Amendment of the Constitution.

Should the Court render such decisions, a conflict will arise between it and Congress, and the latter will attempt the abolition or modification of the Court, as has been repeatedly threatened by leading Radical Senators. That some difficulty with the Court prior to the Presidential election was anticipated by the supporters of General Grant, could be seen by the assault which General Sickles made upon the Grant men recently at the Cooper Institute in New York.

Unless the Radical Republican party be beaten at the November election, the United States Supreme Court will be done away with, or rendered subservient to the interest of a Radical Congress.

The Chicago Times of the 20th gives an interesting account of what has been done up to this time towards rebuilding the burnt district of that city. From this statement we gather that the work of reconstruction is progressing with great energy. The number of men employed in the various branches of industry connected with the building of houses is rapidly and constantly increasing, and within a month more it is quite probable that at least two or three times as many men as now employed will be at work. Up to this time one and a half miles of buildings have been completed in the South Division upon the north and south streets, and the buildings in progress are already erected on the east and west streets fronting include nearly as much space. Nearly all the structures erected consist of first class buildings—iron and brick, and iron, brick, and sandstone predominating in their materials. Many handsome marble buildings have been erected. Besides this, there are at least temporary wooden buildings constructed equal in extent to another mile. In nine principal streets, including State, Dearborn, Clark, and La Salle streets, and Wabash and Michigan avenues, 6,577 buildings are completed, 2,756 are half finished, and 4,883 have been begun. Continued advances in the prices of real estate are also noted, and there is a large demand for cheap lots in suburban points in the more remote parts of the city. Evidently the people of Chicago have faith in their city and its future.

General News Items. The Wisconsin tobacco crop for 1872 is estimated at 10,000,000 pounds. There is in Clay county, Ind., a family with 12 pairs of twins and one odd one. Three thousand women are employed in the different departments at Washington. The fruitful town of Makanda, Illinois, shipped the past year 90,840 boxes of peaches, 120,000 pounds of strawberries, and 24,850 pounds of raspberries. Twelve iron steamships are now in course of construction on the Delaware, at a cost of more than six millions of dollars. The practice of insurance was known in time of Claudius Cæsar. A. D. 48. It is certain that the insurance of ships at sea was practiced as early as the year 45 A. D.

Don't Understand.—We are informed that after the late draw for jurors for the Court which convenes next week, a citizen of the town was told that his name had been drawn as one of the fortunate men to sit all day in close attendance for the usual \$1.50, but that he had been objected. This information was given as an apology, the reason for objection being that he was taken for another who it was alleged was not thought to be a fair man. The apology was unnecessary and out of taste—first, because the gentleman had no objection for the set or pay, and second, that the objectionable individual was a very near and dear relative. If there was any regret left at losing the distinction, the apology only added insult to injury. We would like to ask right here where was the power to reject a drawn juror? Does it not look like packing? We cannot understand it.

MUSIC HATH CHARMS.—This town is blessed with a full measure of music—having no less than three bands. When they all get in blast they should get up an edition of the Boston Peace Jubilee. Our Silver Cornet Band has been silent for some time, the hearts of the players were sad, the enforcement act laying a heavy hand on some of the performers, therefore they had no stomach for music. We are pleased to state that they are about resuming their practice in the endeavor to drive away dull care.

The Brass Band, although it has had troubles also, but not so great, has not intermitted a single night, and it is a wonder the performers hold out so well. Where do they get the wind from? Some nights towards the close of the week small hours we do notice with alarm that the notes are rather spindly, showing very clearly that however good the wind will be failing. We feel no little apprehension in regard to them, but trust they will even be able to blow out of the big end of their horns. That music hath charms we verily believe; it may be the fears as to deficiency of wind are groundless, the spasms are only caused by the action of the melody. That this may be so we note that the drums drop down to as weak a beat, and cease much sooner than the other sounds—and no wind is necessary for that operation.

SCRAPS—ALL FOR THE LADIES.—"Is Miss Blanking at home?" asked Mr. Sanders of the "Yes," girl who answered the ring at the door. "Is 'I love she is, sir." "Is she engaged?" "No, sir, it is engaged, you say? Faith and I can't tell you, sir, but she kissed Mr. Vincent last evening as if she had not seen the like in him, and it's engaged I 'b'ave they are, sir."

"You have been sorely tried," said a sympathizing friend to Joe Crowden, weeping over the coffin of his third wife. "Yes," responded the bereaved one, "I have always had the dreaddest luck with women."

The papers in Lima are all talking about a child born in that country with seven heads. Poor baby, suppose it should have the headache.

We should like to think the husband of the lady who made a bed-quilt of 4251 blocks, would at least sleep peace-fully.

A gentleman embracing his fiancée should be careful not to miss her "chest back hair."

SCARFS IN GENERAL.—A Dover, Tennessee, cow enjoys the luxury of two tails. Skoo fly!

A number of ladies at Hartford are about starting a joint stock insurance company. Anybody can tell you what to put in a newspaper: but the real problem is, what to leave out.

LOCAL. Messrs. GREENE & HOPKINS, Newspaper Advertising Agents, No. 4 South St., Baltimore, Md., are daily authorized to contract for advertisements at our contracted rates. Advertisers in that City are requested to leave their cards with this office.

How to GET RID OF FLIES.—Boil together equal parts, by weight, of glue and molasses, spread it over common brown paper, while hot with a brush. Place a sheet of paper in every room in your house. It will capture every fly in the room within the day. The paper can be thrown in the fire and a new one used, when covered with the captured flies.

ACKNOWLEDGMENTS.—4th Supplement to Bruce's Abridged Specimen Book of 1869, containing some handsome new type faces. The Proof Sheet, issued by Collins & McClester, Type Founders, Philadelphia, is very interesting, useful and elegantly printed monthly.

WILLIAMSTON FEMALE COLLEGE.—We call attention to the card elsewhere in reference to the above named institution. The advantages afforded by a course in this College are very many. A healthful climate and the celebrated mineral water are not the least. The Rev. Mr. Lander, the principal, has also the well-deserved reputation of being one of the best teachers in the country. Parents cannot do better than by sending their daughters to him.

MEMORIAL DAY, was celebrated with becoming spirit by the ladies of Columbia, Charleston and elsewhere. The soldiers' graves in the various cemeteries were dressed with wreaths and crosses of beautiful flowers, in which the cedar, the cypress, the bay, the willow, and the sweet immortal, were silent tributes of affection to departed memories. We hope that the ladies of Newberry remembered those who repose under their native heath.

In a list of claims presented to the referees in a New Hampshire town recently was this: "For time spent in Wilton in coaxing Mr. — to go home when drunk, \$5."

A local, describing a recent accident, says that "the ball entering the groin of the victim, and passed thence into his lumber region." The precise locality of this region is not stated.

An Arkansas landlord thus professedly advertises his hotel in the local papers: "And Joseph went abroad, and he said unto his brethren, 'I am Joseph; do not fear; my father yet liveth.' And his brethren answered him, 'You bet; the old man is doing badly, for he loathes at the Cosmopolitan.'"

A vain man's motto is, "Win gold and wear it." A generous man's motto is, "Win gold and share it." A miser's, "Win gold and spare it." A prodigal's, "Win gold and spend it." A broker's, "Win gold and lend it." A gambler's, "Win gold and lose it." A wise man's, "Win gold and use it."

MOUNT PLEASANT, S. C. May 15th. Messrs. Editors: Most anxiously are our friends looking for rain, and "hope deferred" (almost) maketh the heart sick; yet they must hope on, hope ever! Still, Copious showers are most vitally needed; the soil is like ashes, and the withered and drooping appearance of the plants attest the lack of moisture, so necessary to their subsistence and development. When it comes the thirsty earth will drink it in with avidity, and we must hope that it may not come too late.

The green-pea crop is very nearly gathered, and although the Northern markets opened at high prices, every summer carried her full quota. The railroads were also brought into requisition and the shipments were poured into those markets, consequently the fall was too rapid to enable most of the farmers to realize good average prices.

Messrs. Kinsman & Howell, of Charleston, have done much to forward this new industry. Their arrangements for supplying the best selected seeds, and the most approved fertilizers, have relieved producers of much of the anxiety and disappointment hitherto attendant on the efforts to secure this very important matter, while the facilities afforded by them for shipments, save their friends much personal effort, and they are enabled to bestow more attention to farm work other, wise lost by absence on this errand.

Other enterprises are being developed by this business of "Trunk Raising." In addition to the extensive establishment of Messrs. Knox & Wheeler, four miles from this point, where numbers of vegetable boxes are made, Messrs. Coates and Orison have erected a steam mill in this village for this purpose, and I observe that Messrs. Kanapax and Gonzalez, of Market-street, Charleston, have also added a factory for the same work, to their produce establishments; several others have embarked in the same line, and producers are thus fully supplied with all the packages they may require.

By the way, my attention was attracted by an implement, for which the gentleman above mentioned is the agent; as a very valuable one to planters—it is called a vernal fertilizer, and they claim that the fertilizer can be sowed in such proportions and weight to the acre, as may be required. A very important desideratum in this work. Yours truly, R. M. P.

THE AMERICAN FARMER'S ADVOCATE, a large sixteen page paper, is in every respect the most valuable of the farm and country community, being especially valuable as the official organ of the Agricultural Congress. Its price is only \$1.00 per year, and its publishers, the Advocate Publishing Company, of Jackson, Tenn., make the remarkable proposition to furnish it free with any \$2.00, or higher priced paper or magazine published in the United States.

THE GRAND CENTRAL.—It is said that this is the model hotel not only of New York, but the world. It is like a little town within itself; accommodates fifteen hundred people, and is supplied with everything that can contribute to their comfort, pleasure and safety. It is a great resort for hotel tourists as well as business men, and three or four dollars a day is the very reasonable charge.

Speaking of Advertising Agents, the publisher of the "Voyageur," at Minneapolis, Minn., says: "We have tried Geo. P. Rowell & Co., of New York, and they are the best we ever used."—New York, N. Y., May 15th, 1872.

Pimples on the Face, Eruptions, Itches, Scorpions, and all sorts arising from impurities of the blood, are cured by Dr. Pierce's Golden Medical Discovery.

BRANDY'S MEDICAL WORLD for May makes its welcome appearance on time, with the following attractive contents: Dreaming of Spring, Euphonia's Music Box (continued), Hints on Playing Instruments (continued), The Musical Press, 1872, Classic Music, The Musical Press, 1872, New Inventions, Quack! Quack! Quack! &c., &c. Published by the Brandy's World, Great Central Music Publishing House, Cleveland, O. \$1 a year. Specimen copies free.
