

Poetical.

Written for the Summer Watchman. THE WANDERER. Mother, dear Mother, pray kiss me again, The kiss on my forehead's grown cold, As long it hath been, since then it hath lain, So many the months that've rolled, So many the years that've rolled, Their burden of sorrow and sin with its stain, Suddenly over my soul.

BEAUMONT. [For the Summer Watchman.] A Talk with the Children. NUMBER FOURTEEN—GEESSE.

Christmas and New Year's day have come and gone. Court week has passed. Mr. Hubbard and his Constabulary force, with their seven shooters, have ceased to arrest our people. Our peaceable citizens who were arraigned on the Ku Klux Kavan, he has honorably acquitted. Our fremen have given their supper, and enjoyed their five speeches, and as things have once more resumed their normal condition, we propose to renew our pleasant little talks on different topics. Suppose we try geese, of which there are several species. There are in our country, three varieties of domestic geese. The variety which is most common is readily recognized by the male being always white and the female of a dark dun color, sometimes partly white. Another variety has a larger body and a neck more arched, with red bills, and feet like the former kind. The third variety are much larger, with longer necks and a black bill with a hump upon it, which gives it a peculiar appearance. They are called China geese. Both male and female are of the same peculiar dark color. All these varieties look beautiful on the water. Their cheerfulness, blue eyes, and grace upon the water, make them very attractive birds.

Nature has provided geese with a web between their toes, as a means of propelling themselves in the water, and strange to say, if a hole is cut in this film, so as to destroy a greater part of it, the web will all grow up again. Your Grand Pa once bought quite a number of geese, and fearing that they might stray off, marked them by cutting a hole three quarters of an inch in diameter, in the web of each right foot, but to his surprise, upon examining them a few months after, he found the holes all grown up and the marks entirely obliterated. Geese are remarkable for their conjugal affection, and may serve as a valuable example of constancy. When once they mate or marry, they are as true to each other as the most exact virtue can demand. They are very cheerful, never indulging in low spirits, as some silly people do, but enjoy life to the highest degree. They are given to one bad habit, viz. fighting. The spring season is their fighting period, and their battles are very severe, and the victory of the fortunate one is celebrated by loud cries and cackling. Geese are very vigilant, especially at night. The appearance of a strange person or a sound of an uncommon noise, will cause them to cry out in a loud cackle. It is said that the ancient city of Rome was once saved by the cackling of some domestic geese, which aroused the sentinels, just in time to prevent its being surprised and sacked. Wild geese are beautiful birds, either on land, in the air, or on the water. They migrate to our country in the winter, and their early approach is said to indicate a very cold winter. When on the wing, they utter a strange wild cry. There is but a slight difference between the male and female. They are frequently captured by hunters in the upper part of the State, and are quite an ornament in a yard of poultry. They never lay eggs, however, or raise young ones, but keep to themselves, and appear as strangers in a strange land. The largest and most beautiful of the goose tribe is the swan. They are much larger than the common geese, have long arched necks and are beautiful as they float, swim and dive. The old ones defend their young with great bravery and force, striking fiercely both with their beaks and wings, and have been known to break the arms of men, who have ventured to rob their nests. Your GRAND PA.

—Why is it the happiest of the fowls? Because it is in the midst of bliss it is in hell, and all the others are in purgatory.

PICTURES.
