

Scraps and Facts.

Mexico City, April 10: A thousand rifles and a large quantity of cartridges were consigned by the Washington government to the American ambassador...

Mississippi flood assigned as a real reason for the stiffening of prices; but that is only one reason. Another reason is the claim that the remnant of the crop is legitimately worth a great deal more than it has been bringing...

As to whether or not there was any justice in the act of Governor Bleese in removing Mr. Rhame, we are not prepared to say. According to our understanding of the matter from the facts so far developed, we are unable to see that Mr. Rhame was really liable for removal. Further developments may appear differently.

The Yorkville Enquirer.

Entered at the Postoffice in Yorkville as Mail Matter of the Second Class.

Four years ago Mr. Bleese went on the trail of Governor Ansel, made speeches and commenced raising a dust and people said Governor Ansel should meet him and fight. Some said that, but others said that Bleese's remark did not deserve notice.

Mr. John A. Harshaw of Guthrieville, has a fine patch of alfalfa of not quite an acre. It was seeded last fall, and is now well improved and heavily manured.

Mr. W. H. Herndon of Yorkville, has been concerned lately by the disagreement in quantity quality and price of alfalfa. He has a fine patch of alfalfa of not quite an acre.

While Sidna Allen, the Hillsboro ruffian, seems to have gotten away with it, for the time being, there need be no fear that his seeming good fortune in this regard will be permanent.

Some of the leading Woodrow Wilson papers are charging that Clark's victory in Illinois was the result largely of a combination with W. R. Hearst.

People who perform their whole duty to themselves and their families are generally more patriotic than those who claim to be working for the country, and they are worth more to society as a whole.

It is beginning to look like Colonel Roosevelt is entitled to a revised estimate. The carrying of a state like Illinois is calculated to raise doubts as to whether the very practical Republican party will deem it advisable to make the colonel take a back seat.

The Alabama Democrats have nominated Mr. Underwood as their candidate for president; but at the same time Mr. Underwood has not failed to clinch another nomination for congress.

What is Yorkville doing to battle with its vicious mosquito?—Charleston Post.

We would almost rather put up with the mosquito than to be compelled to quarantine against dear old Charleston.

The Columbia State has acted on the suggestion that it had close at hand a wide-openness of the "square meal, plenty-to-drink" town and published a few hints along that line.

The Charleston Post wants to know whether Mr. C. Overholt, who was lynched by the people who were whispering statements to the effect that it was Frederick O. Beach who assaulted his wife at Aiken, will now attempt to lynch the state of South Carolina.

The Boy Scouts.

The boy scout movement is rapidly making headway in this county and the number of scouts is increasing steadily.

On January 1 there were only 1,400 scout masters registered under the national organization and now there are about 4,500.

The organization unit is a patrol of eight boys, but one scout master may have the direction of an indefinite number of patrols.

The general purpose of the movement is to instruct boys in the mysteries and charms of outdoor life—to bring them into closer touch with nature and to teach them how to take care of themselves under conditions where the strictly town bred boy would be helpless.

One of the most fascinating features of the system from the boy standpoint is life in camp, and other features involving contact with the vegetable and animal kingdom as it exists in forest, field and stream.

Much, of course, depends upon the scout masters, who should be men of character, experience, information and ability, and whose association with the boys should be of a high order.

The idea of organizing one or more patrols of boys in the city of Yorkville, has been under consideration among the boys for some time.

As the boys are so interested in the matter, it is thought that it will soon materialize into practical results.

—Cadet Louis Duttler of the Civitas academy, was killed in Charleston, Tuesday, when he was struck by a trolley while crossing the street at target practice.

The price of cotton is advancing steadily and there is strong sentiment on the speculative exchanges that figures will go much higher. The Mississippi flood is assigned as a real reason for the stiffening of prices; but that is only one reason.
