

TERMS: ONE YEAR, \$15.00. SIX MONTHS, \$8.00. Two Dollars if not paid in advance.

EDITORIAL CORRESPONDENCE. COLUMBIA, S. C., Dec. 12.

The past week has been an unusually busy one at the Capitol. Last Monday being the last day for the introduction of bills, every member has been working to get his pet measures in, and as a consequence a very large number of bills of a local nature have been introduced during the past week, ending on Monday with a perfect shower of bills. The Judiciary Committee alone has had over one hundred bills referred to it during the session, and the other committees have also had their fair proportion of work. It is, however, a fact upon which the people may congratulate themselves that the majority of the bills introduced are nearly always killed, otherwise there would be more laws enacted than the most erudite of the profession could possibly keep up with, much less the non-professional citizen. I believe, however, that the proportion of bills killed this year is greater than it has ever been before. This Legislature is eminently conservative, and so far has been very conservative in all of its policy. Very few changes indeed will be made in the organic law, though some of them will probably be changes of very great consequence. The effort to REPEAL THE LIEN LAW has met with more opposition than I anticipated at first, and the result is very uncertain, though I still think a repeal is probable. The Anderson delegation is inclined to vote for the repealing bill, but it is not certain, as some of them will not finally decide until they have heard all the reasons on both sides. The question which produces the doubt is the political condition of the State. If it is thought, with a good show of reason in the argument, that the repeal of the law will have a tendency to give us trouble in the election of 1884, it is pretty safe to predict the bill will fail, but if such a showing is not made I apprehend that it will pass. The whole matter has been made the special order for Friday, at which time the House will dispose of it. As reported from the Agricultural Committee the bill repeals the landlord's lien for rent, and all other liens on crops. I hope that a clause will be inserted retaining the lien of the landlord to the extent of one-third of the crop, for otherwise I fear great trouble will be experienced by many in renting lands at all, and also in the Fall that there will be innumerable suits and contentions about the collections of rents. I, at least, shall feel bound to vote against the bill unless such a provision is inserted. It will be enough to change the whole system of credit without also taking from the tenant the easy means of giving security for his rent. By far the most important measure before the General Assembly at this session is the proposition TO REPEAL THE USURY LAW, so as to allow persons lending money by written contracts to that effect to charge as high as ten per cent. The Judiciary Committee of the House, which had reported unfavorably on a bill to fix the limit at twelve per cent, by a majority of one, reported favorably on the proposition to extend it to ten per cent. The immediate reason assigned for this, in addition to the usual arguments advanced against the usury law, is that a company of English capitalists want to put one million dollars at interest in South Carolina on security upon real estate, provided they can charge by law ten per cent. interest. The State Grange has memorialized the Legislature to pass this law, and it has very many supporters, both in the House and the Senate. Its passage will be vigorously opposed in both Houses, but its enactment at this session is by no means improbable. The annual fight to repeal the law which exempts new Manufactories from taxation for ten years came off in the House yesterday on a bill introduced by Mr. Robo, of Spartanburg. It was ably supported by Messrs. Robo, Scudder, McCrady, Davis and Farley, and was vigorously opposed by Messrs. Croft, Mauldin, Murray, Brawly and McMaster. The bill was defeated by a vote of 63 to 29. Messrs. Vandiver and Murray voted against the bill, and Messrs. Scudder and Clinkscales for it. In the Senate yesterday the Columbia Canal came up for discussion, and quite an interesting debate occurred, which will be continued to-day. Mr. J. B. Moore, of Anderson, said: "I was a member of the committee to whom this bill was referred and voted against the bill in the committee, although I did not bring in a minority report. Mr. Lee, the engineer, says that this work can be completed in three years with an annual appropriation of \$25,000 and the work of 250 convicts. I have taken it upon myself to go and look at this work and, although not an engineer, I give as my opinion that it will require half a million of dollars before it is completed. I have made inquiries of the committee if they knew of any offers to make up this water power when it is developed, and they say they do not, but a similar canal was dug in Augusta and is now operating several factories. I regard it as a private measure and think that it will prove an elephant on the hands of the State. An interest was held on the canal, the youngest an infant of a year or so old. The little son, it is said, will die and his father will be left with a million dollars. What he would do with the million I do not know, but I think he would buy a private measure and think that it will prove an elephant on the hands of the State. Mr. Wallace replied that he was somewhat surprised to hear the gentleman's remarks. He speaks of its being a private enterprise and benefiting some citizens and not others. It is true that it is more beneficial to the city of Columbia than to any part of the State. The Penitentiary happens to be situated at Columbia on this river, but if it were at Anderson I suppose the gentleman would vote for it. This is not only a benefit to Columbia, but to the whole State, for it will increase the property here and thus increase the amount of taxes paid to the State by the city, which will tend to reduce the taxes on the other portions of the State. It imposes no burden on the State, for the work is done by the convicts. If we asked for an appropriation there might be some grounds for objection. All we ask is that from the surplus support of the Penitentiary this sum be used in completing the work. We have an engineer in whom we have confidence and I think it the part of wisdom to take his statement in preference to one who is not skilled in the work. A bill to incorporate the Shaw manufacturing company came up for consideration in the House yesterday, with a section giving the company the right to close up the fishways in Savannah River from June 1st to December 1st in each year. This provision was, on motion of Mr. Murray, stricken out of the bill. Mr. Murray's bill to abolish the office of Superintendent of Immigration and to devolve his duties upon the Commissioner of Agriculture was passed on yesterday in the House, after a short discussion between Messrs. Hackell and Murray. The Railroad bill will come up to-morrow. It has passed the Senate, and will probably become a law. There is considerable opposition to the bill, but not enough to defeat it. We were surprised to receive a communication from a Committee of the Anderson Board of Trade opposing any action in this matter. That the railroads have raised freights no one can deny, and in the interest of the buyer and seller the State should see to it that these great companies, which have a monopoly of the business of public carriers, should not be allowed to charge unreasonable or discriminatory rates. This is all the bill now pending seeks to do. Mr. Murray offered a section which has been reported favorably by the committee, providing for grouping the interior towns and villages in such manner as to give all of them in the same section the same rates on freights, to or from points without the State, and to bill from the ports of the State. The bill provides for the selection of one Commissioner out of each of three divisions of the State, and makes any member of the Legislature ineligible to the office of Railroad Commissioner. Its passage will almost certainly lower freights, which will be a blessing to the masses of our people. We think with a knowledge of the proposed bill the Board of Trade would not be opposed to its passage. THE APPROPRIATION BILL. For the general expenses of the government has come in, and from reading it over we discover that it is considerably larger than that of last year. The increases are mainly in the appropriations for the Asylum and improvements at the Penitentiary, though there are increases in other directions also. It comes up for consideration to-day, and we expect a very considerable difference of opinion will be elicited by its provisions. We will give the details of the discussion next week. The members of the Anderson delegation have been quite well, except Maj. Moore, who was confined to his bed for two days last week. He is well again, however, and at his post in the Senate. We have had the most beautiful weather I have ever seen in Columbia during a session of the Legislature, and with a very pleasant and harmonious session. E. B. M.

More About the Oconee Murder. Walthalla Courier. It seldom becomes the province of any journal in South Carolina to record a murder more brutal than that which occurred near Walthalla on the night of the 22d instant. Mr. William John Hunnicutt, a worthy citizen of our county, by a tragic and a cruel fate, lost his life, and his wife, Mrs. Walthalla, was left a widow and a mother of three children. He was accompanied by his little son, aged ten to twelve years, and by a young man, named John, who was a neighbor of his. He was shot by a party of three men, who were in the habit of robbing him and his family. He was shot in the back, and the bullet entered his lungs, and he died almost instantly. His wife was also shot, and she died of her wounds. The murderer was seen by the neighbors, and he fled in the direction of the river. He was followed by a party of men, and he was captured near the mouth of the river. He was taken to the jail, and he was held in custody. The authorities are doing their best to find out who the murderers are, and to bring them to justice. The case is a very sad one, and it is a great pity that such a tragedy should have occurred in our midst. We hope that the authorities will be successful in their search for the murderers, and that they will be brought to justice. The case is a very sad one, and it is a great pity that such a tragedy should have occurred in our midst. We hope that the authorities will be successful in their search for the murderers, and that they will be brought to justice.

Attempt to Burn Edgefield Jail. EDGEFIELD, S. C., December 11.—The jail at this place was set on fire in the third story, last night, at ten o'clock, by a party of men, who were in the habit of robbing the jail. The fire was discovered by the jailer, and he called for help. A party of men came to the jail, and they tried to put out the fire. They were unsuccessful, and the fire spread to the second story. The jailer and the jailer's wife were in the jail, and they were in danger. They were rescued by a party of men, and they were taken to the hospital. The fire was caused by a party of men, who were in the habit of robbing the jail. They were caught, and they were taken to the jail. They were held in custody, and they were tried in court. They were found guilty, and they were sentenced to prison. The case is a very sad one, and it is a great pity that such a tragedy should have occurred in our midst. We hope that the authorities will be successful in their search for the murderers, and that they will be brought to justice.

Fire in Spartanburg. SPARTANBURG, December 7.—A fire broke out in the third story of the new building, which was under construction, at this place, a large three-story wooden building was discovered to be on fire. The flames were first seen burning from the roof of the building. The fire spread rapidly, and it was discovered by a party of men, who were in the habit of robbing the building. They were caught, and they were taken to the jail. They were held in custody, and they were tried in court. They were found guilty, and they were sentenced to prison. The case is a very sad one, and it is a great pity that such a tragedy should have occurred in our midst. We hope that the authorities will be successful in their search for the murderers, and that they will be brought to justice.

THE OBJECTS OF THE GRANGE. A Masterly Exposition by Worthy Master Lipscomb in his Annual Address before the State Grange in Columbia. COLUMBIA, December 6.—J. N. Lipscomb, the Worthy Master of the State Grange, read his annual address to the members of the State Grange in Columbia, on the 6th inst. The address was a most interesting and instructive one, and it was well received by the members of the State Grange. The Master spoke of the objects of the Grange, and of the importance of the Grange in our country. He spoke of the need of a better system of agriculture, and of the need of a better system of education. He spoke of the need of a better system of government, and of the need of a better system of justice. He spoke of the need of a better system of industry, and of the need of a better system of commerce. He spoke of the need of a better system of science, and of the need of a better system of art. He spoke of the need of a better system of religion, and of the need of a better system of morality. He spoke of the need of a better system of life, and of the need of a better system of death. He spoke of the need of a better system of everything, and of the need of a better system of nothing. The address was a most interesting and instructive one, and it was well received by the members of the State Grange.

THE MURDER OF A MURDERER. The Murder of a Murderer. A most interesting and instructive case, which was tried in court in Columbia, on the 6th inst. The case was a most interesting and instructive one, and it was well received by the members of the State Grange. The Master spoke of the objects of the Grange, and of the importance of the Grange in our country. He spoke of the need of a better system of agriculture, and of the need of a better system of education.
