"MAKE HAY WHILE THE SUN SHINES!"

It is very easy to make Hay while the sun shines if you have A DEERING MOWER and RAKE.

THE many advantages the Deering Mower has enables the operator to work it with much more ease than any other machine, and no time lost in going around stumps and trees. This machine is so constructed that the driver is at no trouble in lowering and raising the cutter bar in passing stumps and trees. With no effort scarcely he brings the cutter bar to an upright position without stopping the Machine. There are many other advantages the Deering Mower has that we will show you when you want a Mower. The Pitman Rod of this Mower has only two pieces, while all other Machines have from ten to twenty-five pieces to wear out and be replaced. The Mower is not all in looking up an outfit. It is essential to have a good Rake, and the Deering Rake is the simplest Rake on the market. A comparison of our Rake with other makes will convince any farmer that it is the Rake he needs. The device for dumping are so constructed that a child can operate it without any assistance. If you are in need of an outfit let us show you our Mower and Rake and be convinced. Now is the time to sow your stubble land in Peas and harrow them in with one of our TORRENT HARROWS.

We are still headquarters for all lines of Hardware, Nails and Wire.

### Grand Jury's Presentment.

On Wednesday, 11th inst., the Grand Jury made the following presentment to the Court of General Sessions and was discharged:  
To His Honor, Ernest Gary, Presiding Judge:  
The Grand Jury begs to submit its presentment as follows:  
We have passed on all bills turned over to us by the Solicitor except two, where the witness failed to appear, and which we will return to the Solicitor.  
By committee we have examined the various offices of the county and find them well kept and the books conveniently arranged and easy for intelligent public inspection.  
We find that only a few of the magistrates are making monthly reports to the Auditor and Treasurer as is required by law.  
We made a careful investigation of the past indebtedness of the county and find it to be \$9,981.77, including Court House and Jail, and with no disaster to public buildings and bridges the entire indebtedness of the county will be wiped out this year.  
We find that a number of the townships and school districts are carrying large balances into the succeeding scholastic year amounting to a total of \$15,000. This has had the effect of shortening the school term in the townships, reserving these large balances.  
The committee examined the several dispensaries in the county and found the books well and correctly kept, and properly balanced. The request books are being kept at each of the dispensaries.  
By committee the poor house and farm were inspected and a partial report made. We find that the inmates are well cared for and contented, and the farm is in good condition. The following suggestions are made: That the barn be re-covered; that new pillars be put under some of the houses; that the steward keep an account of all feed furnished the County Supervisor for feeding county teams used in working the roads and other purposes, and also an account of whatever sales are made of any products of the poor house farm. We are of the opinion that the steward does not give as much of his time to the care of the farm and inmates of the poor house as he should. We will probably make further suggestions at the fall term of the court as to the keeping of the books and other things.  
The Court House and Jail were also visited by committee. The prisoners were found to be properly cared for. We recommend the following repairs on the jail: That the verandas be repaired and painted; that the coping around the eaves and the valleys in the roof be repainted, and some small leaks be stopped; that the heater should have some repairs made on it before another winter. We find that the County Commissioners have neglected to carry out the suggestion made to them last year by the Grand Jury that certain leaks in the roofing or coping of the Court House, which are causing the outer walls to become stained and discolored. We again urge upon them the importance of attending to this work. We suggest that the roof on the balcony over the front door of the Court House be repainted and a skeleton floor be laid over it to protect the tin from wear caused by being walked on. We also suggest that the outside windows and door frames be repainted and the wainscoting in the offices be revarnished.  
We are pleased to see that the County Commissioners continue to do permanent work on the public roads, but in some instances think they should have graded around the hills instead of doing so much work on old road beds upon heavy grades. We recommend that they have the loose rocks and other rubbish that is dragged into the middle of the road by the scrapes thrown out and as far as is in their power prevent people working land along the roads dragging rocks, etc., into the roads.  
In conclusion we desire to thank His Honor, the presiding Judge, the Solicitor and other officials for their assistance to us in the discharge of our duties.  
Respectfully submitted,  
J. B. Douthit, Foreman.  
June 11th, 1902.
