WEDNESDAY, SEP. 16, 1903.

In Georgia a boom has been launched for Clark Howell for Vice President on the Democratic ticket at the next election.

President Roosevelt has found that the Western lamb and the Wall street lion will not assimilate except in a digestive way, and he has been compelled to abandon his financial legislation scheme.

Even up in Minnesota they are organizing to run the negroes out of the State. Following the lead in Massachusetts, Delaware, New Jersey, Illinois and Indiana, the Minnesota Republican is willing to howl for the negro only when he is away down South.

The State Agricultural and Mechanical Society of South Carolina is the only organization of its kind in this State, therefore let us all determine now to make the next State Fair a success in every department. Anderson County should and must be well represented there.

It was with utmost difficulty that a location was found for the colored Young Women's Christian Association, of Brooklyn, N. Y., property holders objecting that the proximity of the institution would depreciate their holdings. In the South this would have been an "outrage."

Senator Hanna's ex-slave pension bill is doing glorious work in the South. Thousands of dollars which might have been spent for strong drink have been collected from the ignorant negroes by a few enterprising members of the race, ostensibly to promote the passage of the Hanna bill.

George W. Truitt says the cotton crop of the South has been cut 1,000,000 bales in the past few weeks by hot weather. Commissioner of agriculture of Alabama says cotton is off 25 per cent in his State. Texas crop estimated from 500,000 to 1,000,000 bales shy. These reports being true the price of the staple should advance. In some sections the farmers are urged to hold their crop.

Some time ago progressive farmers of South Carolina thought they saw a competence in the cultivation of tobacco, and a great many went into the business, but what do we now find? Not that the raising of tobacco is not profitable, but that the trusts have taken hold, and the farmer and small dealer are apt to be left in the lurch. Surely, this is the day when the small producer is at a discount.

Some time since President Roosevelt refused to accept the resignation of a negro woman postmaster in Mississippi who had become weary of the office and wished to be relieved, and yet removed against her protest a white woman in Delaware who was thoroughly capable and satisfactory as postmaster, because she was personally offensive to a corrupt politician. Color blindness seems to affect the President's eyesight and his judgment alike.

The amount of money to be obtained by South Carolina for military purposes from the national government is a large one, and the extent of Uncle Sam's liberality has not heretofore been appreciated. In addition to over \$30,000 for equipment purposes, there will be over \$48,000 for equipment purposes, and this does not include a free equipment of magazine and carbine rifles and uniforms. Heretofore our State has received \$8,000 a year, a sum so small that little good could be accomplished.

The annual report of Commissioner of Pensions Ware places the total number of pensioners now on the rolls of the national government at 936,545, of which 792,356 are soldiers and 267,189 are widows and dependents. Mr. Ware announces that it is not probable that the pension roll will again cross the million line, the high mark having been reached a year ago. Five of the pensioners are on the roll on account of the war of the revolution, 1,116 on account of the war of 1812, 4,734 on account of the Indian wars and 13,874 on account of the Mexican war. The great bulk of the roll is as follows: Civil war invalids, 603,456; widows, 248,390; Spanish war invalids, 9,200; widows, 3,662; and the regular establishment invalids 9,170; widows, 2,938. The roll shows a net loss of 2,901 pensioners during the year. Out of a total of 304,809 applications on hand during the year 130,109 were admitted and 113,794 were rejected. The cost of the pension system per capita of population for 1903 is given at \$1.75.

Hon. Alvin H. Dean, State Senator from Greenville County, in a published interview says that at the next session of the Legislature he will introduce a bill providing for a law similar in its leading details to that of the Georgia vagrancy law. He has given the new law careful study and heartily approves of it. He says that the Georgia law has caused many vagrants to seek refuge in South Carolina and other adjoining States, and that these States will, he believes, be compelled to adopt a law similar to the Georgia law in self-defense.

We are at home again after a most delightful three-weeks vacation spent with relatives in the extreme north-western portion of Pennsylvania, and to say the trip was one of the most enjoyable we have ever experienced but feebly expresses it. Our route was via Washington, D. C., Harrisburg and Pittsburg to Sharon, Pa., where we spent most of our time, and from where we visited other places in Pennsylvania and Ohio. It was our first visit to that section of Pennsylvania, where iron, coal and oil are the chief products, and which exist in inexhaustible quantities. To a "cotton-tout," especially the country, with its varied and beautiful scenery, and its magnificent industries, it was a revelation, the contrast being so great in every respect to our own section. To attempt a brief description of what we saw and learned would require a page of the Intelligencer and would exhaust our vocabulary, therefore we will not undertake it. The country in that section of Pennsylvania and Ohio is mountainous, and at this season of the year the climate is delightful. The mid-day sun, where you are exposed to it, feels akin to the Southern sun, but the evening and mornings are very pleasant. The country is very thickly populated, and riding along the railroads the towns and cities seem to be continuous. Nearly all the railroads are double-tracked, and there is a net work of electric car lines, connecting many of the suburban towns with the cities. As a consequence transportation is very cheap, and you can ride many miles for 5 or 10 cents. Of the many places visited Pittsburg was perhaps the most interesting. It justly bears the name of the "Smoky City," for it is full of large manufacturing plants, iron and steel predominating. Its annual Exposition opened on the 1st inst., and, as it does every year, was attracting a large crowd of visitors to the city. Every class of business is represented in the exhibits, which are very attractive. We could have spent a month viewing the sights and manufacturing plants of the historic old city of Pittsburg. Every place we visited we met many of the prominent citizens, and found the people generally very sociable and hospitable. The country is very prosperous, and on account of its products and numerous manufacturing plants money is plentiful all the year. Wages are good, but living expenses are much greater than in our country. Nearly all the day laborers are foreigners, and they are very numerous. While they earn good wages, our observation led us to believe that they are not as well treated by the natives nor do they live as well as the negroes of the South.
