

COMMERCIAL.

Exports.

NEW YORK.—Steamship Monaca—200 bales Cotton and 200 bbls Rosin.

CHARLESTON MARKET.

COTTON.—Since our last statement, which was up to the 6th inst., inclusive, the receipts of Cotton here have amounted to eight bales Sea Island and sixteen hundred and seventy-five bales of Upland Cotton—nearly the entire amount having come by the South Carolina and Northeastern Railroads. In the early part of the week the market was decidedly heavy, but in the last day or two there has been much firmness exhibited, and yesterday some parties claimed that the market was a half cent better on most grades. The sales have been very limited—not amounting to over two hundred and fifty bales from the 7th to the 14th insts., both days inclusive. The small sales are mainly in consequence of the limited supply held on hand—the greater portion of the receipts still going forward without a sale at this place. There is much cotton in the country to come forward, but the unfinished condition of our railroads prevent its coming to the city. We quote as follows:

Good Ordinary..... 30c
Low Middling to Good Middling..... 32c
Sea Island.—A few bales of this description has been sold in the last few days, and the prices range from 60c to 85c for ordinary Mains to good Sea Islands.

COTTON STATEMENT.

Table with columns: Stock on hand Sept. 1st, 1865, Receipts from 1st to 6th inst., Receipts from 7th to 13th inst., Total receipts to 13th inclusive, Exports to 6th inst., Exports from 7th to 13th inst., Total exports.

NAVAL STORES.—About 600 bbls. of Rosin has reached this market during the week, and we have heard of sales of 250 bbls. of this article, at the following prices: No. 1 at \$11.00, No. 2 at \$8.00, No. 3 at \$6.00.

ORANGE.—About 3000 bushels of this article has been received in the last two days, all of which has changed hands on private terms. We quote the price at \$1.20 @ \$1.25 per bushel. We were also informed that 2000 bushels on the way here had been sold, but the price did not transpire.

OATS.—Some 2700 bushels have been received, and the article may be quoted at 60c @ 70c.

FLOUR.—The supply of this article is ample for the demand. Super is held at \$10 @ 10.25, and Extra at \$11 @ 11.50.

HAY.—The last sales of this article were at \$1.25. The receipts since our last have been 300 bales—all North River.

SALT.—The supply of this article is quite limited, and Liverpool Salt is held at \$3.25 @ 3.50.

FREIGHTS.—To Liverpool 3/4c for Upland and 1/2c for Sea Island. Two vessels on the berth are, we learn, nearly full. Coastwise, to New York, in steamers, \$4 per bale for all weighing four hundred pounds and over, and \$5 per lb for all bales under that weight. Naval Stores 6c @ 7c per bbl. In sailing vessels to New York, 3/4c @ 1 lb is the going rate.

New York Money Market.

Foreign exchange is not offering so freely and it is held at about 109 1/2 for prime bankers. Bills at 60 days on London are selling at 108 1/2 @ 109 for commercial; 109 @ 110 for bankers' do. at short sight, 109 1/2 @ 110 1/2 for Paris at 60 days, 5 1/2 @ 5 1/4; do. at short sight, 5 1/2 @ 5 1/4; Hamburg, 35 1/2 @ 36; Amsterdam, 40 1/2 @ 40 1/4; Frankfurt, 49 1/2 @ 49 1/4; Bremen, 78 1/2 @ 78 1/4; Prussian, 70 1/2 @ 70 1/4.

Of specie the City of Washington takes out \$214,160, and the Hansa \$3000—total \$217,160.

The dry goods imports at New York compare as follows with former returns:

Table with columns: For the Week, Entered at the port, Thrown on market, Since Jan. 1st, Entered at the port, Thrown on market.

PUBLIC FINANCES.

The following semi-official statement has recently appeared of the present and prospective condition of the Treasury:

There is to be redeemed prior to January 1, 1866, of Certificates of Indebtedness, and no other debt, say \$47,450,000.

Four months Army Payments, \$12,000,000
Four months Navy Payments, 8,000,000
Four months Civil List, 8,000,000

Total, in currency, \$116,450,000
On the other hand, the Treasury resources may be stated as follows:

Currency on hand September 1, \$42,800,000
Internal Revenue (122 days), 105,896,000

Total, \$148,696,000
Surplus over the four Department, \$139,246,000
The stock of gold was, Sept. 1, after providing for the 10-40 interest, \$45,435,000.

Four months Custom receipts, 56,120,000
Total gold resources, \$101,565,000
Deduct November interest on the 5-20s, 18,107,000

Surplus of gold for sale, \$83,358,000
But these resources are at command. Mr. McCulloch has still the power to sell:
5-30 loan of June 30, 1864, \$9,500,000
10-40 loan, 27,300,000

Total bonds for sale, \$36,800,000
Add surplus from Internal Revenue and cash on hand September 1, 33,246,000

Probable surplus of currency on Jan. 1, 1866, \$70,046,000
Besides this surplus, should be the bonds un-sold, he will have \$83,358,000 of gold to sell. In this situation Mr. McCulloch has published the following statement of indebtedness in payment of sundry large army and navy (indebtedness in addition to the amount already issued): \$30,000,000, \$45,000,000, making a total of \$75,000,000 additional advance and are firm at 4c for six per cent, compound interest notes, which will scarcely do this, as the currency is already, according to some outside political economist speculators, in the great abundance. The great amount of surplus coins—over \$50,000,000—which the Secretary has already secured, will allow of the sale of at least \$50,000,000, which at present prices will produce over \$70,000,000 currency.

New York Markets.

NEW YORK, Sept. 9.—Rice—Carolina in firm and in demand. Bangon is inactive, but prices are unchanged. Sugar—Raw Sugars are in good request, and prices are firmer. We quote good to fair refining at 12 1/2 @ 13c. Bedded are fairly active and firm. Hops—Are firm and in demand for home use. We quote old and new crops at 10 @ 14c, and 50c. as 30 quality. Cotton—A good demand has prevailed from manufacturers and prices are a little firmer. We quote at 4 1/4c for middling. Coffee—We hear of no sales, but prices are firm. Petroleum—Has been more active, the inquiry being for export prices have advanced and are firm at 4 1/2c for crude, 6 1/2c for refined, in bond, and 7 1/2c for do. free.

MARINE NEWS.

PORT OF CHARLESTON.

HELMBOLD'S FLUID EXTRACT BUCHU,

FOR WEAKNESS ARISING FROM INDISCRETION. The exhausted powers of Nature which are accompanied by so many alarming symptoms, among which may be found, indisposition to Exertion, Loss of Memory, Wakefulness, Horror of Disease, or Forebodings of Evil; In fact, Universal Languor, Fatigue, and inability to enter into the enjoyments of society.

HELMBOLD'S FLUID EXTRACT BUCHU,

In affections peculiar to "FEMALES" is unequalled by any other preparation, as in Chlorosis or Retention, Painfulness, or Suppression of Customary Evacuations, cleared on the Continent, and in all complaints incident to the sex, whether arising from habits of dissipation, imprudence in, or the decline or change in life.

HELMBOLD'S FLUID EXTRACT BUCHU,

Will radically exterminate from the system Diseases arising from Habits of Dissipation, and the effects of Indigestion, or no change in diet, no inconvenience or exposure, completely superseding those unpleasant and dangerous remedies, Copaita and Mercury, in all these diseases.

USE HELMBOLD'S FLUID EXTRACT BUCHU,

In all Diseases of these organs, whether existing in "Males" or "Females," from whatever cause originating, and no matter how long standing, it is in fact, and in odor, "immediate" in action, and more strengthening than any of the preparations of Bark or Iron.

HELMBOLD'S EXTRACT BUCHU

Is the Great Diuretic.

HELMBOLD'S HIGHLY CONCENTRATED COMPOUND FLUID EXTRACT SARSAPARILLA,

For purifying the blood, removing all chronic constitutional diseases, arising from an impure state of the blood, and the only reliable and effectual known remedy for the cure of Scrophulous, Scaly, Itchy, Pains and Swellings of the Bones, Ulceration of the Throat and Legs, Blotches, Pimples on the Face, Tetters, Erysipelas, and all scaly eruptions of the skin.

HELMBOLD'S EXTRACT BUCHU

Two tablespoonfuls of the Extract of Sarsaparilla added to a pint of water equal to the Libanum Diet Drink, and one bottle is fully equal to a gallon of the Syrup of Sarsaparilla, or the decoction as usually made.

HELMBOLD'S DRUG AND CHEMICAL WAREHOUSE,

210 N. 5th St. New York.

GOOD NEWS FOR ALL!

RE-OPENING OF THE TRADE IN CHARLESTON

IMMENSE ATTRACTION AT THE

WHOLESALE SHOE HOUSE,

No. 133 MEETING-STREET,

ESTABLISHED IN 1836,

IS NOW RE-OPENED AFTER A SUSPENSION OF FOUR YEARS, WITH GREATER FACILITIES

THAN EVER.

THE PROPRIETOR NOW OFFERS FOR SALE

Boots, Shoes, Hats, Trunks, &c., &c.

AT WHOLESALE ONLY, AT THE LOWEST POSSIBLE QUOTATIONS, AND RECEIVING IMMENSE CONSIGNMENTS SEMI-WEEKLY FROM THE LARGEST AND MOST RELIABLE MANUFACTURES.

THE PROPRIETOR TAKES PLEASURE IN CALLING THE ATTENTION OF THE TRADE, THE LOCAL MERCHANTS OF THE STATES OF GEORGIA, TENNESSEE, ALABAMA AND FLORIDA, TO THE EXTENSIVE STOCK OF

BOOTS, SHOES, HATS, TRUNKS, ETC., ETC.

ORDERS NEATLY AND PROMPTLY ATTENDED TO.

EDWARD DALY,

AGENT FOR MANUFACTURERS.

Boots, Shoes, Trunks and Hats.

HAVING BEEN APPOINTED AGENT FOR THE SALE OF

Boots, Shoes, Trunks and Hats,

BY SEVERAL OF THE MOST PROMINENT MANUFACTORIES AT THE NORTH, AND NOW

LOCATED AT

No. 138 Meeting-street,

I offer this choice stock of Goods for sale by the

PACKAGE ONLY.

THE TRADE WILL PLEASE NOTICE.

EDWARD DALY, Agent.

Boots, Shoes, Trunks and Hats.

FOR COTTON, TOBACCO, WHEAT, CORN, &c.

COMPOSED OF DRIED BLOOD, BONES, SULPHURIC ACID, PERUVIAN GUANO, SULPHATE OF AMMONIA, POTASH AND SODA.

Large Silver Medal awarded 1859, by the American Institute of New York—Patented 1859—Perfect uniformity of quality—Testimonials from hundreds who have used it for years—Does not exhaust the land like Guano, but permanently improves it—One hundred pounds of Nitrogenized Superphosphate of Lime will equal in effect and lasting power one hundred and eighty-five pounds Peruvian Guano—Produces heavier bolls of Cotton, and greater weight of Wheat and other Grain, per bushel, than Peruvian Guano—Prevents Rust.

Messrs. Fisher & Haskell, Cotton Planters at Newbern, N. C., write, July, 1865, as follows:

"The Phosphate of Lime we purchased of you gives good satisfaction. Last year we applied fifty-five (55) tons to three hundred and seventy-five (375) acres of land for cotton, say about (300) three hundred pounds per acre. We rubbed the seed in the phosphate, and also sowed it in the drill with the seed at the time of planting. On a portion of the land we applied a top dressing of the Lime at the second hoeing, our confidence in the value of your Phosphate was confirmed by the fact that the crop was a heavy one, and the balance was bought for a friend, who was satisfied of its worth in cotton culture. At the time of writing this, our crop is looking finely, and promises an abundant yield. One portion of our plantation consists of highlands with a clay subsoil, running near the surface; the remainder is flat and inclined to be sandy. The owner of your Phosphate, we have now a good crop growing upon it. This is but the second season of cotton growing with us; still, from our experience thus far, we do not hesitate to recommend your Phosphate of Lime as a manure well adapted to the wants of the cotton planter."

Professor J. J. MAPES—Dear Sir: I bought twenty bags of your Nitrogenized Superphosphate of Lime, of your Agents, Messrs. H. & N. E. Solomon, Hamburg, S. C. (who solicited a statement of its effects), and applied it to forty acres of my poorest cotton land.

This land is on the public road, where its effects were seen. My neighbors, who are acquainted with the land, were astonished at the luxuriant growth of the cotton where I used your Superphosphate. It produced better cotton, and a larger amount, than on my good land; less work was needed in making the cotton than on my other land. Not a single bushel of rust was to be seen where I applied your Superphosphate, while the rust prevailed over every other portion of the crop.

Respectfully yours,

DAVID PAYNE.

NOTE.—Mr. Payne's good land compares favorably with the best cotton lands on the Saluda River. The Saluda bottoms are preferred for producing large quantities of cotton.

COTTON.

Mr. J. J. MAPES—Dear Sir: In reply to yours of the 1st inst., I cheerfully state: I have used Mapes' Nitrogenized Superphosphate of Lime on my cotton, to either lot-manure or cotton seed; and I can recommend it to my neighbors with confidence, as a pure and effective manure, and would give it the preference to any other in the market.

Yours, respectfully,

THOS. DAVIS.

Mr. Charles W. Mixon, of Edenton, Chowan County, N. C., writes to Mr. Beckover: In regard to Mapes' Phosphate it worked admirably for me, the product being fully equal if not superior to both the manures before mentioned. It did not start the young plant as early as either the other manures; but it seemed to retain its color and pods much better, and no sprout of rust was ever seen where it was applied—all the land I planted in cotton being about the same quality and strength.

Extract from a letter from Colonel Gideon Dowse, of Bertella, near Augusta, Ga., August, 1860: and is now, superior in its effects, where I have applied it on my cotton, to either lot-manure or cotton seed; and, as compared to the land without manure in the same field (in my opinion the only true way to test it), it is as four to one in the number of grown bolls, and as ten to one in the young fruit and forms, in favor of the Superphosphate.

This opinion is formed from a close and critical examination by my overseer and myself. There is one result from its application, which, if it had nothing else to recommend it, is of incalculable value, and that is, it does seem to guard against that worst enemy of the cotton plant, namely, the rust.

I have applied it to land that invariably rusts cotton, and there is as yet not a sign of rust in it, while the same kind of land just adjoining it is completely ruined by it already.

This experiment confirms that made by Mr. Lomas, of S. C., last year; and I am fully persuaded that any plant manured with it does withstand a drought better and keeps green longer than with any other application that has come under my notice. I have seen cotton, corn, okra, melons and other garden plants, that have kept green during the terrible drought that has so completely destroyed all our gardens, and my nutmeg melons are as green and blooming as beautifully as in spring.

I have written this as the result of my judgment from close observation. When I shall have gathered my crops it will give me pleasure to give you the result from actual weight and measure.

Yours,

GIDEON DOWSE.

Extract from Weekly Day-Book: New York, October 29, 1860.

"We have, in the course of an extensive agricultural correspondence, gathered evidence of the superior value of Mapes' Nitrogenized Superphosphate of Lime upon the cotton fields of the South, where Peruvian Guano had been used with partial success. The bolls have been heavier, and of greater number, the yield of cotton per acre has been larger, and what is also of the greatest consequence, no rust is discovered in cotton fields where this article is applied, to which may be added its peculiar lasting power of fertilization, and its comparative cheapness. These facts have come to us in correspondence from parties who have used other like agents, and who give this by far the highest praise.

"We have arrived at the conclusion, after considerable experiment ourselves, and of careful search for the results of the trials of others, that Mapes' Fertilizer has more of the property needed in a general manure, in horticulture and agriculture, than any thing else of the kind we are acquainted with."

J. J. MAPES, Esq., New York—Dear Sir: I bought four tons of your Superphosphate of Lime for my cotton crop, also some guano, and have tried them side by side on the same quality of land. Not a particle of rust was to be seen where your Superphosphate was used; and I also applied stable manure on a portion of my land. The cotton had the rust when the latter was used. The yield of cotton was splendid when the Superphosphate was used, despite the extraordinary dry year. When I applied the other manure the yield was not good. I applied the Superphosphate at the rate of 100 lbs. per acre, and believe it would have paid better if I had put more per acre.

I sold my cotton in Hamburg yesterday at 1/2c per pound over the usual market price. The lint was considered very strong and heavy. I consider yours a reliable manure.

Yours, truly,

JAMES M. LANHAM.

Among the many patrons of this manure are the following gentlemen, who have testified in the highest terms of its value: Dr. N. Crawford, Columbia Co., Ga.; W. H. T. Walker, U. S. A., Mobly Pond, Ga.; L. Berckman, Augusta, Ga.; J. P. Brown, Big Lake Plantation; Carlisle P. B. Martin, Macon, Ga.; E. M. Pendleton, Sparta, Ga.; Colonel published by J. J. MAPES, General Agent for the Manufacturers, No. 184 Water-street, New York.

Price \$60 per ton (2000 pounds), in barrels. Liberal discounts allowed, and Circular, etc.; with name and business address, furnished gratis to responsible houses acting as agents.

BONNY DUST, GYANO, etc., furnished by cargo or by the ton, orders for the Superphosphate of Lime will be received by

August 14
