#### LOCAL MATTERS.

THE STEAMSHIP QUARER CITY.—This fine steamer leaves Brown's wharf this day at 3 o'clock, P. M.

THE WEATHER .- The thermometer in our office has been standing so long at ninety degrees, and there is at this time so little danger of its falling, that we have drawn the nail by which it was sus-

THE MAIL TO FLORIDA AND INTERMEDIATE POINTS Messrs. Archibald Gerry & Co., of this city, have received information from Washington that their proposition to carry the mail from this port to Pilatka, semi-weekly by steamers, touching at Savannah, Darien, Brunswick, St. Marys, Jackson-ville, Mandarin, and Picolata, has been accepted by the Postoffice Department, and their first steamer, the Helen Getty, will leave here on the 20th inst. for the above places. This line is of great importance to the trade of this place, as at present we are almost without any communication with the points touched at, which before the war added quite a respectable business to our merchants' trade.

THE PROSPECTS OF THE CITY.-A day or two ago we touched upon the exorbitant rents that are now demanded by householders, and at the same time we mentioned the great scarcity of stores, as well as residences, that at present exists in Charleston. Since then we have conversed with several on the topic, who believe, with us, that it presages a large and heavy business during the forthcoming winter, which, if correct, will be the commencement of one of the grandest commercial careers that has ever been experienced by any city in the Union. The reason for this rise in rents we presume to be the influx of persons from other portions of the country, who have come among us with the intention of entering into business permanently, and making our homes their homes; and although our · people cannot see where that business is to come from, or what is to make it or sustain it, "still they come," and with every variety of goods fill their stores and warehouses. Some of them have already been emptied and refilled, and we believe, if there is truth in eyesight, that many are undergoing that process every day.

The truth is, that for four years we have been an inactive and inert people, with so little trade among us that we have nearly lost that aptitude which continual work had given us, and that also, with the great troubles which the war brought upon us, has destroyed the capacity which we possessed previously. These facts, no doubt, cause many of us to look with filmy eyes upon the dark side of events, which prevents them seeing any ray of light until almost blinding brightness breaks upon them. On the other hand, they who have come as new settlers among us have not been borne down with troubles, nor incapacitated through a want of business, or enervated through idleness, for trade with them increased and more activity was created by the breaking out of the war. Their vision bright as ever, their spirits not depressed at its continuance but clated at its conclusion, they looked about to find some new spot or spots less populated than their own, where they could pitch their tents as dwellers, and improve and benefit by their labors. As a people, their sagacity in matters of business is beyond that of any nation of the world, and their advent among us presignified a commercial prosperity unsurpassed by any existing before. Time and our efforts will develop resources hitherto unthought of, which will give ample employment to all; and we would suggest to those who have not been fortunate so far in obtaining situations, to keep up a stout heart but for a little time longer and their most ardent wishes must be gratified.

THE ROW ON THURSDAY AFTERNOON. - From statements made to us, it seems, at one time of the afternoon, there were serious apprehensions of a great riot; and but for the activity of the officers and men of the U. S. Police connected with this Department, ill consequences might have resulted. The thanks of the citizens are, therefore, due to

THE EDITORIAL DEPARTMENT OF THE NEWS ARE under obligation to Mr. Jos. J. B. Frex, of the "Central Ice Cream Garden," for the truly choice and recherche refreshment sent them last evening. After the laborious duties of the day, such kind and thoughtful remembrances are particularly an preciated. We recommend all our friends to patronize this elegant establishment. A promenade concert will take place at the Garden on George street on Monday evening, the 18th inst.

Messas. Trout & Amesbury advertise, in this day's issue, the steamer Gen. Sherman for New York, to sail on Wednesday next. Shippers who wish to send by a good steamer, at reasonable freights, will do well to call on them, at No. 20 Cumberland-street.

Louis Cohen, No. 248 King-street.—This establishment is not only one of the largest dry goods houses in the city, but it contains a variety unsurpassed in any other store. The articles which fill its shelves have been selected with the greatest care by experienced judges, and customers are never dissatisfied with their purchases; in short. such efforts are always made to please those who call upon him, that a second visit generally follows a first purchase. With the ladies especially, the goods at this house are a great attraction; and the courtesy and general attention they receive from those whose duty it is to attend to lady customers, is always of the politest and most gentlemanly kind.

AIMAR'S PERPUMERY. - With the multitudinous business that is always being transacted in an apothecary's establishment there is generally some article that receives a little more attention than others. With Mr. AIMAR, Porfumery has always been a specialty, and we expect he has devoted more attention to it than any other man in the South. We appeal to the large number of ladies who have patronized him for the truth of this, and will prove it by the many who will call upon him after reading his advertisement in to-day's

THE ATTENTION of our readers is called to the advertisement of Coal and Building Materials, by H. F. Baker & Co., who are prepared to supply the public at low prices.

CHEAF TRAVELLING.—Penny trains are now "an institution" in London. They run early and late on the underground railroads. The working-man descends into a spacious subterranean depot, well lighted, in one part of London, takes his seat in a third-class "carriage," and, for two cents, in ten minutes is landed, miles away, in another part of London, whither, by "bus," would have cost him ten cents and an hour's ride. In this way the mochanic, in his pretty cottage in the country, or in a distant street, is really close by his work; and one great evil in a large city checked in part.

RECEIPTS OF COTTON AT NEW YORK.—The receipts of cotton at this port this week reached a daily average of 4376 bales,

TO OWNERS OF COTTON.

In Answer to numerous inquiries from abroad, we would say that we are prepared to take charge of, put in order and ship any lot of COTTON in the States of Georgia, South Carolina or Alabama, as we have local agents at almost every town, and a corps of most efficient men, selected for integrity, capacity, and experience, to take charge of every lot.

We will also pay all taxes and charges of every description, and make liberal advances on the Cotton. In short, we will take charge of the Cotton on receipts or orders, and give the owners no trouble whatever, from the time we receive it until sold and returns are made by our houses.
