and could both save them and recover the property. They were referred to the bank's counsel. To him they stated their case, said that they could take the lawyer to house where the men were engaged in altering the number of the bonds, and asked for the service at present only enough money to pay their expenses. The bank's counsel refused to give them any encouragement, saying that the bank did not care about the thieves, but wanted the money. He referred them to the other detectives who were engaged in the case, and bowed them out. Messrs. Young and Kolso refused to have anything to do with the case, and the Sun says that the two volunteers on their own hook, and will continue to work it up. The story is said to be information given by a woman, a short time before the Ocean Bank robbery went to her for money, and persuaded her to give it on the assurance that a "big job" was coming. The man and woman have quarreled since that time, and the woman has given information which has led to watching certain characters. The latter persons, it is said, have been told of the suspicions entertained, and have partially confessed to complicity in the robbery. It seems strange that these things, if true, should be told before the arrest of the suspected thieves, but further information is promised to be forthcoming in a short time.

CHARLESTON.

MONDAY MORNING, AUGUST 9, 1899.

The "Party" Squabble.

The letter of Senator Sawyer in reply to the rejoinder of Dr. Mackey, which appears in our columns this morning, will, we hope, close this branch of the newspaper discussion between the leaders of the opposing wings of the South Carolina Radicals. One hint may be allowed to give to the white people of the State to know that a man is capable and honest, than to learn that he is or is not a sound Radical Republican. Dr. Mackey and Senator Sawyer and Representative Bowen rate each other roundly, each accusing the others of being traitors to the Radical party and false to the dusky voters who hoisted them into office. But not a word is said of the integrity and probity of the rival politicians. Whether Mr. Sawyer, or Dr. Mackey, or Mr. Bowen is preparing to sell out, "the party," we neither know nor care; but we should like to know whether the Radical leaders think that the men who hold the high places in the political synagogues are personally worthy of confidence and trust. This is the point which most interests the readers of THE NEWS.

Tampering with the Fire Department—A Dangerous Experiment.

The Chamber of Commerce, at a special meeting held on Tuesday last, adopted a resolution requesting the City Council "to defer any action for the present" on "a bill to declare certain colored fire companies a part of the Fire Department, and to establish a Board of Colored Firemasters in the City of Charleston." This resolution was concurred in by the Board of Trade at a meeting held on the same day, so that a clear and emphatic expression of the opinions of the principal taxpayers in the city. The letters of the Presidents of the Chamber of Commerce and Board of Trade, announcing the adoption of the resolutions, were read before Council, and received as information upon motion of Alderman T. J. Mackey, who at the same time said that he intended to bring up the bill in a modified shape at a subsequent meeting. This was well enough as far as it went, but Alderman Mackey, who is the putative father of the bill, said besides that he did not intend to have it so modified as to prevent the colored companies from enjoying all the rights of incorporated companies. The bill then, though sleeping, is not yet dead, and in view of its importance and mischievous tendency, it is to be regretted that the Chamber of Commerce and Board of Trade did not ask at once for an indefinite postponement of all action upon it. So long as the bill is in a condition to be brought up at any moment by any demagogue who may wish to obtain a little popularity at the expense of the city, we have no assurance that we shall be able to retain an efficient Fire Department or to insure at reasonable rates any portion of our property. The bill should be killed, and this will be done at the next meeting of Council if there are in that body as many honest and unselfish men as would have saved the Cities of the Plain from destruction.

It is useless, perhaps, to urge that the immediate effect of the passage of the proposed bill will be a large increase in the cost of the Fire Department. Setting down the expenditures of the year at the estimates of the Clark administration, it is doubtful whether the city will be able to meet all its engagements. But the estimates will, we believe, in more than one instance, fall far short of the actual outlay, and now it is desired to elap on \$18,000 or \$20,000 more for the benefit of colored fire companies. No increase in the strength of the department is necessary. We have now more men and more engines than are required for a city of the size of Charleston. The only advantage of the additional number of companies will be the additional expense, and an increased probability that the city will be unable to pay the October interest upon the city debt without a large and long loan from some capitalist who has confidence in the solvency of the city and the honesty of His Honor the Mayor.

But Alderman Mackey and his friends probably care but little what becomes of the city debt, nor are they likely to reflect that two quasi-independent Fire Departments—the one white and the other black—cannot peacefully coexist in Charleston. The attempt to make the negro fireman the equal of the white fireman will, if persevered in, cause ill-feeling, if not trouble and bloodshed. And it may lead to a practical disbanding of the white Fire Department. This is a consummation devoutly wished by some of the Radical crew—the Mackeys, we presume, are of the number—was a quick way of giving the negroes full swing, with a chance to annex them-

self as firemen while the city pays the bill. But we are informed that, if the white Fire Department be broken up, the underwriters will refuse altogether to insure property in Charleston, or will double or treble their rates. This danger is staring us in the face, whatever our politics or physical complexions. We repeat it. A perseverance in the scheme of establishing a colored Fire Department in Charleston, as proposed by Alderman T. J. Mackey, will, in all probability, lead to the breaking up of the white Fire Department. And the breaking up of the white Fire Department will either make it impossible to insure our property at all, or raise the rates that insurance will be out of the question. This is a consideration which goes home to every man who has a dollar in his own. It will not touch the feelings of those who have all to gain and not a cent to lose. With the Mackeys it may have no weight.

Even the old colored fire companies are now, we understand, opposed to the passage of Alderman Mackey's bill. They see what the feeling of the community is, and they have sense enough to perceive that they will be the losers in the end if they deliberately run counter to the interests of the tax payers of the city. Unlike Alderman T. J. Mackey, these colored men have no party axe to grind. They do not wish to form a new Union League in the guise of a Fire Department. They do not wish to organize a body whose functions will be "repeater" voting and controlling elections, instead of running with the machine and putting out fires. They do not wish to see themselves brought down to the level of those who will only be firemen on parade days and when money may be drawn. We do not believe that the proposed bill has more friends among the respectable colored people than it has among our white citizens.

The motives which led Alderman T. J. Mackey to introduce the bill are clear and plain, and if he can lash Council into adopting the bill he must be the first person to be held responsible for whatever troubles or dangers may follow.

The Locomotive Business.

We cheerfully give place in to-day's News to a letter from "Veritas," defending the action of Governor Scott in the little matter of that Laurens locomotive. We have but a word of comment. If Governor Scott be indeed as innocent in this transaction as "Veritas" would have us believe, how comes it that the Attorney-General, a brother Radical, and hailing from a climate at least as loyal as that of the Governor's own Ohio, has officially affirmed, in writing, the precise statement of facts given in THE NEWS? Now, as between the learned law officer of the State and our zealous and disinterested Executive, which are we to believe?

The letter from a planter of Edisto Island, printed in another part of to-day's News, will be gratifying intelligence to the thousands of our readers who are interested, more or less directly, in the island crop. The suggestion that those to whom the planters are looking for needed advances should at once take measures to satisfy themselves of the real extent of the danger from the caterpillar, is timely and sensible; and we trust that it may be acted upon without delay.

Lost and Found.

LOST ON SATURDAY NIGHT, BETWEEN THE UPPER WARD MARKET and Edisto-street, a POCKETBOOK containing three one-dollar bills, one two-dollar bill, and small change, together with a letter from Mrs. Anderson, and several receipts and due bills. The finder will leave it at this Office, or at ABRAM HUGHES', No. 133 East Bay-street. Liberal reward will be given.
