THE GREAT BOAT RACE.

OXFORD WINS BY THREE LENGTHS.

A Graphic Description of the Struggle and the Defeat. The New York papers, of Saturday, come to us filled with telegraphic accounts of the Oxford and Harvard boat race, which took place on the preceding day.

LONDON TURNS OUT. A telegram dated London, Friday afternoon, says: Over one million persons witnessed the great international race between Harvard and Oxford to-day.

Along Barnes' Reach the Harvards refreshed their strokes (Mr. Loring) with river water, thereby retarding the boat. The Americans then tried to spur, but found the effort ineffectual, and the Oxford gained more of its lead, eventually winning by four lengths, ending up in the last few strokes and pulling up fresh.

The Oxford arrived at the ship at five o'clock, 30 minutes after making the four miles and a-half in 22 minutes, 40 seconds.

When the gun sounded, the Harvard crew, after a moment's rest, drew up by the side of the Oxford boat, and applauded their victors by clapping their hands.

There are various theories of the cause of Harvard's failure. It is rumored that their diet has been lately vegetarian, but it is not true.
