The pauper whites will be treated the same way. The City Council is about opening a new Alms House for the colored people.

The case of the colored Canadian who applied for redress because the owners of the steamship Hatteras refused him a first-class cabin passage, on account of his color, was decided by United States Commissioner Cahoon this morning. There was a colored Republican meeting at Manchester, on Saturday night. It was addressed by J. C. Reportor, Commonwealth's Attorney at Norfolk, who is stumping the State under the auspices of the National Republican Committee. He was much applauded for the sentiment that, "Rather than not unclog the wheels of reconstruction, we should hang the President and Gen. Grant as high as Haman."

GALVESTON, August 26.—Interments on Saturday 26; for the week, 153. The New York merchants have sent \$1,000 to the Howard Association.

WASHINGTON, August 26.—The late Johnson-Grant correspondence relative to Sheridan's removal is published this morning in the New York Herald and Boston Post.

The White House gossip is, that Sheridan, on leaving the Fifth District in charge of Hartsoff, proceeds to the West, relieving Hancock, who then assumes permanent charge of the Fifth District. They talk of Swayne as Pope's, and Meade as Sickles's successor.

The Mexican Legation publishes documents showing that Escobedo's letters against foreigners were a forgery.

The excitement in the New York gold room had its origin in the Na-

tional Intelligencer's editorial, of this morning, which only tells an old story, that the members of the Cabinet, in view of Stanton's tenaciousness, had informally placed their offices at the disposal of the President. There is no probability of immediate Cabinet changes.

Grant's letter to the President says that the people, who have sacrificed lives and spent dollars for the country's preservation, are entirely opposed to Sheridan's removal. He performed his duties faithfully and intelligently, and his removal will be regarded as an effort to defeat the Congressional views, and embolden the opposition of those who attempted to break up the Government by arms. Gen. Thomas has repeatedly objected to being placed in charge of either of the five Districts. Hancock's Department was in the interior, and he should not be moved. Grant adds: "There are military, pecuniary, and, above all, patriotic, reasons why this order should not be insisted on."

The President, replying, is not aware that the question of Sheridan's retention has been submitted to the people, and it would be unjust to the army to assume that Sheridan alone is capable of commanding the Fifth District. Thomas' administration of the Department of the Cumberland will compare favorably with Sheridan's government of the Fifth District. Sheridan has rendered himself obnoxious by his manner of executing the laws, and more so by assuming authority not granted him. His rule has been one of absolute tyranny, without reference to the principles of our Government or the nature of free institutions. His course has seriously interfered with harmony and the speedy execution of the Acts of Congress; his removal cannot be regarded to effect or to defeat—the object of the change is to facilitate their execution through an officer who has never failed to obey the statutes of the land, and within his jurisdiction require like obedience from others. The President compliments Thomas and Hancock, and feels assured that, under Gen. Sherman's guidance, Sheridan will win honor by fighting the Indians. In conclusion, the President fails to perceive any military, pecuniary and patriotic reasons why this order should not be carried into effect.

Internal revenue receipts, to-day, \$836,000. A private letter from Fort Hays says one company of cavalry, at that post, has lost twenty-one men by cholera.

QUEBEC, August 26.—The Catholic Archbishop of this diocese died yesterday.

STOPPING THE FLOW OF BLOOD.—Housekeepers, mechanics and others, in handling knives, tools and other sharp instruments, frequently receive severe cuts, from which blood flows profusely, and oftentimes endangers life itself. Blood may be made to cease to flow as follows: Take the fine dust of tea and bind it close to the wound—at all times accessible and easy to be obtained. After the blood has ceased to flow, laudanum is advantageously applied to the wound. Due regard to these instructions would save agitation of mind, and running for a surgeon, who probably would make no better prescription.

REMEDY FOR HYDROPHOBIA.—"S." in the London Times, gives a remedy for hydrophobia, which, it is stated, was habitually used by the late Mr. Youatt, a well-known veterinary surgeon, who was bitten by mad dogs eight times. The remedy was to allow the common nitrate of silver, easily procurable, to filter in the wound. It decomposes the saliva, and in doing this destroys the virus. Sir Benjamin Brodie and the writer acted upon this in a case where a mad dog had licked the inside of a child's mouth, with complete success. The best mode of application of the nitrate of silver is by introducing it solidly into the wound.

Mr. John Tyler, son of him of the same name, is in Washington, trying to unite all factions against the dread radicals. He is in the habit of saying to every listener: "Seward, Johnson, and the rest of us, sir, will be a head shorter unless we stay this mad radicalism. Nothing but a union of the Conservative element will do, sir, under Mr. Seward's lead."

TOO MUCH OF A GOOD THING.—Live stock increases in numbers far more rapidly in Australia than the population, and the great question now is how to get rid of them. It is proposed in one place to erect a joint stock establishment "capable of boiling down 10,000 sheep a week."
