DILLON'S PATENT UNIVERSAL COTTON TIES AND IRON HOOP

DILLON'S PATENT UNIVERSAL TIE.

THIS TIE, with the HOOP COMPLETE, weighs no more than the usual Rope used in baling cotton, and renders an allowance for tare unnecessary; the ONLY TIE REQUIRING NO SLACK WHILE PUTTING ON, and is so perfect that the necessity for heavy hoops, to make up for deficiencies in the tie, is entirely obviated. Can be sold by the pound or ton as cheaply as the heavy hoops and less perfect ties. Each and every tie is warranted perfect. Science and practical use will have the effect of the Iron Tie entirely superseding the use of rope—its combination of advantages, the preservation of the cotton when baled from consumption by fire, rendering its security to Insurance Companies a matter for consideration, both while in warehouse or on shipboard, and its simplicity of use and economy combined.
