The 33d section of the Bankrupt Act The 33d section of the Bankrupt Act of 1867 provided, that in cases commenced after one year from the time the Act went into operation, no discharge should be granted, unless the assets of the debtor should pay fifty per centum of the claims against his estate, unless the assets in writing of a majority in number and value of the creditors who had proved should be had.

His Honor Judge Bryan has decided

His Honor Judge Bryan has decided that the Act of Congress of 27th July, 1866, had modified the Act of 1867, so that it is not necessary that the assets should pay fifty per centum, but that they should be equal to fifty per centum of the claims proved.

of the claims proved.

This view was presented to the court by Messra. Simons & Simons, and Messra. Memminger, Jervey & Pinckney, as the true reading of the statutes; and Judge Bryan, after hearing the argument, desided that the construction was right. cided that that construction was right, and granted the discharge.

It will thus be seen that many debtors

who have been restrained from applying for the benefit of the Bankrupt Act since 31st December, 1868, upon the generally received opinion that a discharge could not be had unless their assets should pay fifty per centum of their debts, can enjoy its advantages if their assets be equal to fifty per cent. of their debts.

CORN AND COTTON. - Commenting upon the cultivation of corn and cotton in this region, the New York Herald says:

"Before the war it was the great mis-take of the South to be obliged to buy from year to year the actual necessaries of life and rely for payment thereof upon the growing staple, and when the crash came she was like an unprovisioned garrison, filled with brave men with empty stomachs. The South must rely more upon her own fields for her breadstuffs and provisions and less upon the grain and bacon of the great West. If a lesser breadth of cotton be planted, the price of the staple will be corresthe price of the staple will be correspondingly increased, in consequence of a diminished supply, and in any event, provided, in the meantime, plenty of corn and grain be planted, they will have plenty of food for man and beast, without paying five-fold for the same to the West and California. The danger of the South in the future lies in having too much cotton and too little

The Elgin Watch Company advertise a new and reliable improvement in their watches, consisting of a patent dust excluder, effectually closing the works and enabling the watch to run without being cleaned, as long as a movement can pos-sibly do without it. This is a valuable addition to the Elgin watches, and will be appreciated by farmers, mechanics, and others, more or less engaged in out-door employment. The company are said to have doubled their sales in California and the mining regions since the introduction of the dust excluder. The excluder is an entirely different thing from the dust rim upon other American watches, which affords but a partial protection to the movement, and is only found on the Elgin watches.

THE RESPONSIBILITIES OF THE LIVER .- The liver has a very important part to perform in the animal economy. Its function is two-fold. The fluid which it secretes tempers the blood and regulates the bowels, and upon the quantity and quality of the secretion depends, in a great degree, the adaptation of the blood to the requirements of the system and the due removal of the refuse matter which remains in the intestines after the work of digestion has been accom-

of the system and the due removal of the refuse matter which remains in the intestines after the work of digestion has been acc. inplished.

One of the principal uses of HOSTETTER'S STOMACH BITTERS is to tone and contrel this somewhat unruly organ. The antibilious properties of the preparation are scarcely secondary to its virtues as a stomachic. Its operation upon the liver is not violent like that of mercury, but gradual and gentle. Instead of creating a sudden tunnil in that sensitive gland, it regulates its action by degrees. Hence, it is a safe remedy for bilious disorders, while mercury, being a tremendous excitant, is not. The more naturally and quietly a diseased organ can be restored to its normal condition the better, and it is the peculiar property of this harmless vegetable alterative to reinforce and regulate without exciting or convulsing.

The success which has attended its use as a remedy for affections of the liver is proverbial. Persons of a bilious habit, who take it habitually as a protection against the attacks to which they are constitutionally liable, pronounce it the best liver tonic in existence. The symptoms of an approaching fit of biliousness can hardly be mistaken. A pain in the right side or under the shoulder blades, a saffron tinge in the whites of the eyes, sick headache, a feeling of drowsiness, low spirits, loss of appetite, constipation and general debility, are among the usual indications of a morbid condition of the liver, and as soon as they appear, the Bitters should be resorted to in order to ward off more serious consequences.

DR. A. L. SCOVILL is the inventor of several medical preparations which have become very popular, and have been liberally used. Read the following letter from Dr. Scovill, referring to it:

letter from Dr. Scovill. referring to it:

Messrs. J. N. Harris & Co.—Gents: I make the following statement from a porfect conviction and knowledge of the benefits of ALLEN'B LUNG BALSAM in curing the most deep-seated Pulmonany Consumption! I have witnessed its effects on the young and the old, and I can truly say that it is by far the best expectorant remedy with which I am acquainted. For Coughs, and all the early stages of Lung complaints, I believe it to be a certain cure, and if every family would keep it by them, ready to administer upon the first appearance of disease about the Lungs, there would be very few cases of fatal consumption. It causes the philegm and matter to rise, without irritating those delicate organs, (the Lungs,) and without producing constipation of the bowels. It also gives strength to the system, stops the night-sweats, and changes all the morbid secretions to a healthy state. Yours respectfully, A. L. SCOVILL. Sold by all Medicine Dealers.

DISEASES OF THE BLOOD. "The life of the flesh is in the blood," is a Scriptural maxim that Science precess to be true. The people talk of bad blood as the cause of many diseases, and, like many popular opinions, this of bad blood is founded in truth.

truth.

The symptoms of bad blood are usually quite plain. Bad digestion causes imperfect nutrition, and, consequently, the circulation is feeble, the soft tissues lose their tone and elasticity, and the tongue becomes pale, broad and frequently covered with a pasty white coat. This condition soon shows itself in roughness of the skin, then in ERUFTIVE and ULCERATIVE diseases, and, when long continued, results in scrious lesions of the Brain, Liver, Lungs or Urinary Apparatus. Much, very much, suffering is caused by impure blood. It is estimated by some that one-fifth of the human family are affected with Scrofula in some form.

"BAD BLOOD."

'THE LIFE IS THE BLOOD."

ROM it we derive our strength, beauty and mental capabilities. It is the centre of our being, around which revolves all that makes existence happy. When this source is corrupted, the painful effects are visible in many shapes, prominent among which is SCROFULA.

This is a taint or infection of the human organism, and probably no one is wholly free from it. It exhibits itself in various shaper—as Ulcers and Sores, Decayed Bones, Diseased Scalp, Sore Eyes, Weak and Diseased Joints, St. Vitus' Dance, Foul Discharges from the Nostrils, Eruptions, Glandular Swellings, Throat Affections, Rheumatism, Heart Affections, Nervous Disorders, Barrenness, Disorders of the Womb, Dropsy, Syphillitic Affections, Liver Complaint, Sait Rheum, Dyspepsia, Neuralgia, Loss of Manhood and General Debility.

It has been the custom to treat these diseases with Mercury and other Mineral substances, which, though sometimes producing a cure, often prove injurions, and entail misery in after life. The long known injurious properties of these so-called alteratives and purifiers has led the philanthropical man of science to explore the arena of nature, the result of which has been the discovery of vegetable products which posses the power of eradicating these taints from the Blood.
