

We make the following suggestive extract from the splendid oration recently delivered by Hon. George H. Pendleton before the Literary Societies of the University of Virginia:

Gentlemen, if I have truly depicted the progressive condition of our race—if I have rightly appreciated the dignity of human life—two practical questions arise to every thoughtful mind: Is our age worthy of the world? Are we worthy of our age? Is our age adding to the store of learning? I use the term in its broadest sense—as comprehending every advance in every department of human experience—and thus ameliorating the condition of man. Or are we, like thankless spendthrifts, living upon the accumulated treasures of those who have gone before us? Not to press forward is to go back. I have already said that the more material developments of physical science are particularly active in this age. Never before has the condition of the people been so good. Bad enough it still is. Immeasurable are the opportunities for improvement. Yet the march of reform has been, with some exceptions, steadily onward. Indeed, in this fact lies our chief danger. It may easily make us forget that "all change is not reform." It may easily lead us to mistake the cant of affected humanitarians for a generous and active and noble charity. It may easily lead us to an undue partiality for the present and a forgetfulness of the illustrious past. This generation cannot equal the names which graced the realms of imaginative or philosophical thought in the preceding century. We look in vain for that galaxy of literary talent which threw such an effulgence of glory over the last decade of the eighteenth and the beginning of the nineteenth century.

Where are our Byron, and Scott, and Moore, and Campbell, and Wordsworth, and Cowper, and Coleridge, and Shelley, and Southey, and Mrs. Hemans? Who is giving us in prose fiction works to compare with Waverley, or those stories scarcely inferior, by the author of Pelham and Ernest Maltravers? Who shall strike with equal hand the chords of human sympathy which have so often responded to the touch of Dickens?

Where are our essayists who compare with the matchless Jeffrey and Sydney Smith, and Professor Wilson and Macaulay, whose brilliant contributions gave to the periodicals a commanding position in English literature? Where are our historians who can contest the palm of excellence with Alison and Macintosh.

Who on the continent to-day equals, even aspires to rival, the philosophical recollections, the glowing thought, the brilliant imagery of Madame de Staël, or Goethe, or Chateaubriand, or Lamartine, or Humboldt?

We may have an occasional flash from Guizot or Thiers, but these are the dying embers of fires which glowed in the last generation. Those names belong to a great past.

In our own country, who presses forward to fill the place of Washington Irving or Cooper? Who will renew the pleasure of Knickerbocker and Leatherstocking? Who among our young men are to be the successors of Prescott, and Bancroft, and Motley—of Bryant, and Halleck, and Longfellow, and enriched by a higher cultivation the places cleared by their pioneer labors?

Who aspires safely to rival—I will not say excel—the commentaries of Kent and Story, or those immortal judgments which we owe to the genius, and learning, and fidelity, and purity of Marshall and Taney?

Young, ambitious men crowd the halls of legislation and aspire to political honors. Who of them are studying the characters and seeking with all their might to attain the excellence of Webster, and Calhoun, and Clay—of Wirt, and Pinckney, and Benton, and Choate, and Siles Wright—of Giles, and Tazewell, and John Taylor, of Caroline, and Nathaniel Mason—or going back to less approachable models, of Jefferson, and Madison, and Monroe?

It is true, we are building up States in the wilds of the Rocky Mountains with wonderful rapidity. It is true, we span the continent with rail and wire, and send our thoughts in an instant across the waters of old ocean itself. It is true, we are advancing with unequal speed toward the summit of national power and renown. So much the greater reason why we should not lag behind in the path-way of purely intellectual and literary eminence. So much the greater reason why we should ever remember that there is something better than material prosperity, something worthier than physical power or accumulated wealth. Let us find both hope and incentive in the fact that the ages of greatest physical activity have been those of the greatest intellectual impulses.

A large number of destructive fires, on Monday night, are reported. At Oswego, the Union Elevator, with 40,000 bushels of grain—loss \$127,000, insurance \$99,000; at Rochester, the National Hotel stables—loss \$22,000, insurance \$15,000; at Oil City, Penn., seven frame buildings and the office of the Daily Times—loss \$30,000, insurance light; at Providence, R. I., a large tenement-house, by which fifty-two families were rendered homeless. A fire is also reported to have destroyed the greater portion of the village of Gold Hill, Nevada.

The Bishop of Chester has refused to consecrate a church at West Derby, near Liverpool, on account of the elaborate character of the decorations. The walls and roof, and almost every part of the church, are covered with painting and gilding, and there is an altar-piece which the Bishop considers objectionable. The founder of the church, a Mrs. Reade, who has spent £30,000 upon it, and refuses to alter to suit the Bishop's views, threatens him with a law-suit.

THE DAILY PHOENIX.

"Let our Just Censure"

Attend the True Event."

BY J. A. SELBY.

COLUMBIA, S. C. SUNDAY MORNING, JULY 10, 1870.

VOL. VI—NO. 96.

Special Notices.

A BROADSIDE FOR HUMBUGS.—Incompetence and assurance generally go hand in hand, and of all the tribe of protentious know-nothings with which society is afflicted, the unscientific "medicine men" who attempt to tamper with the health of the community are the most dangerous and the most impudent.

So much by way of Text. Now for a special and particular application. It appears that a mushroom growth of so-called "Bitters," is springing up under different names in various localities, particularly in the Southern and Western States, which the vendors have the hardihood to recommend to our going people upon whom they think they can impose, as a substitute for Hostetter's Stomach Bitter, long recognized by every class as the purest and best medicated stimulant and invigorant the world affords.

The concoctions referred to being composed of worthless material, offer a larger margin for profit than that celebrated Tonic, and hence the anxiety of dollar-worshipping dealers to foist them upon the public in its place. But "forewarned is forearmed," and all parties whom these distinguished (I) beings are endeavoring to coax and inveigle into substituting trash for a standard remedy, are hereby informed of the selfish and sordid motives which underlie the representations in question.

The great popularity and vast sales of Hostetter's Bitters cannot, of course, be seriously impaired by these "tricks of trade," but as the debilitated and suffering have a direct interest in the matter, it is only an act of common humanity to put them on their guard.

THE "PAIN KILLER."—The foreign and domestic demand for Perry Davis' Son's great medicine—the Pain Killer—has never before so large as it has been of late; and we think the time has arrived when the declaration that the city of Providence, in the State of Rhode Island, of the United States of America, has furnished the entire habitable globe with a medicine, which, in point of universality of demand, extent of usefulness, complete efficiency for all the purposes for which it is designed, and wide spread, enduring popularity, has never been equaled by any medicine in Europe or America.

The universality of the demand for the Pain Killer, is a novel, interesting, and surprising feature in the history of this medicine. Its "fame has gone out," into every quarter of the habitable globe. The Pain Killer is now regularly sold in large and steadily increasing quantities, not only in general agent every State and Territory of the Union, and every Province of British America, but to Buenos Ayres, Brazil, Uruguay, Peru, Chili and other South American States, to the Sandwich Islands, to Cuba and other West India Islands; to England and Continental Europe; to Mozambique, Madagascar, Zanzibar and other African lands; to Australia and California, Bangoon and other places in India. It has also been sent to China, and we doubt if there is any foreign port or any inland city in Africa or Asia, which is frequented by American and European missionaries, travelers or traders, into which the Pain Killer has not been introduced and been sought after.

The extent of its usefulness is another great feature of this remarkable medicine. It is not only the best thing ever known, as everybody will confess, for bruises, cuts, burns, etc., but for dysentery or cholera, or any sort of bowel complaint it is a remedy unsurpassed for efficiency and rapidity of action. In the great cities of British India, and in the West India Islands and other hot climates it has become the standard medicine for all such complaints, as well as for dyspepsia, liver complaints and other kindred disorders. For coughs and colds, canker, asthma and rheumatic affections, it has been proved by the most abundant and convincing trials and testimony, to be an invaluable medicine. The proprietors are in possession of letters from persons of the highest character and responsibility, testifying, in unequivocal terms, to the cures effected and the satisfactory results produced, by the use of this great medicine.

WALTHAM WATCHES.

THE extensive use of these WATCHES for the last fifteen years by Railway Conductors, Engineers and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects, is to decide the question as to the real value of these time-keepers.

More than 450,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others. The superior organization and great extent of the Company's Works at Waltham, enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watch-making originating in this country or in Europe, only those were finally adopted which severe testing, by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping. Among the many improvements we would particularize:

The invention and use of a centre-pinion of peculiar construction, to prevent damage to the train by the breakage of main-springs, is original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's patent pinion as being the best and faultless.

Hardened and tempered hair springs, now universally admitted by watch-makers to be the best, are used in all grades of Waltham Watches. All Waltham Watches have dust-proof caps, protecting the movement from dust and lessening the necessity of the frequent cleaning necessary in other watches.

Our new patent stem-winder, or keyless watch, is already a decided success, and a great improvement on any stem-winding watch in the American market, and by far the cheapest watch of its quality now offered to the public. To those living in portions of the United States where watch-makers do not abound, watches with the above mentioned improvements which tend to insure accuracy, cleanliness, durability and convenience, must prove invaluable.

Every watch guaranteed by the Company. To prevent imposition, buyers should see that every watch should bear either of the following trade marks: American Watch Co. Waltham, Mass. Am'n. Watch Co. Waltham, Mass. American Watch Co. Crescent St. Waltham, Mass. Appleton, Tracy & Co. Waltham, Mass. Waltham Watch Co. Waltham, Mass. P. S. Bartlett Waltham, Mass. William Ellery Waltham, Mass. Home Watch Co. Boston, Mass. For sale at retail by all respectable dealers. A descriptive circular giving much useful information sent to any address on application. No watches retailed by the Company. Address ROBBINS & APPLETON, Gen'l Agents, 182 Broadway, New York.

Ask to see the new FULL-PLATE WATCH bearing the trade mark "AMERICAN WATCH CO., Crescent street, Waltham, Mass." It is by far the best full-plate watch made in the United States, and surpasses anything heretofore made in this country for Railway Engineers, Conductors, &c. April 24 3mo

"BAD BLOOD."

"THE LIFE IS THE BLOOD."

FROM its derivation our strength, beauty and mental capabilities. It is the centre of our being, around which revolves all that makes existence happy. When this source is corrupted, the painful effects are visible in many shapes, prominent among which is SCROFULA.

This is a taint or infection of the human organism, and probably no one is wholly free from it. It exhibits itself in various shapes—as Ulcers and Sores, Decayed Bones, Dissected Scalp, Sore Eyes, Weak and Diseased Joints, St. Vitus' Dance, Foul Discharges from the Nostrils, Eruptions, Glandular Swellings, Throat Affections, Rheumatism, Heart Affections, Nervous Disorders, Barrenness, Disorders of the Womb, Dropsy, Syphilitic Affections, Liver Complaint, Scurvy, Rheum, Dyspepsia, Neuralgia, Loss of Manhood and General Debility.

It has been the custom to treat these diseases with Mercury and other Mineral substances, which, though sometimes producing a cure, often prove injurious, and entail misery after life. The long known injurious properties of these so-called "Purifiers" has led the philanthropic man of science to explore the arena of nature, the result of which has been the discovery of vegetable products which possess the power of eradicating these taints from the Blood.

The Sarsaparilla AND QUEEN'S DELIGHT

Is a blessing. Try it fairly, and your nerves will be restored to their wonted vigor, and your dejected countenance be made radiant with the consciousness of

RESTORED MANHOOD.

Being free from violent minerals, it is adapted to general use. The old and young may use it; the most delicate female at any time may take it; the tender infant, who may have inherited disease, will be cured by it.

For Purifying the Blood, DR. TUTT'S Compound EXTRACT OF SARSAPARILLA AND QUEEN'S DELIGHT.

When used in the Spring, it removes all humors which infect the system, and banishes the languor and debility peculiar to that season of the year. It acts promptly on the

LIVER and KIDNEYS.

Producing a healthy action of the important organs by which all the impurities of the system are carried off, and the result is

DR. TUTT'S Compound Extract of Sarsaparilla and Queen's Delight

Is the acknowledged antidote to all Blood Diseases. By its use the afflictions above enumerated can be permanently banished, and the

Source—the Centre of Life—the Blood, be maintained in all its purity and vigor. A Clear Skin, Good Appetite, Buoyant Spirits. Prepared by

WM. H. TUTT & LAND, AUGUSTA, GA. And sold by Druggists everywhere. April 14 6mo
