AMONG late improvements in the manufacture of FLOUR, by far the most important is the recently-discovered method of BLENDING MIDDINGS. This wonderful invention is destined to revolutionize the entire Milling system in this country. By it a more thorough separation is effected between the outer husk and the farinaceous portion of the grain, and a Flour is produced of greater and more uniform purity and sweetness than can be made in the old style, and with no increase in cost. We have, at heavy expense, introduced this "NEW PROCESS" into our Mill, and are prepared to offer Flour greatly improved in color and quality over corresponding grades made in the usual method. Liberal deductions made on car-load lots. Aug 26 3mo STOVALL & HULL.
