The manager of a French provincial theatre has set a wholesome example, which the profession might do worse than follow.

Farmers who have bones and know not what to do with them, should break them up, put them in a tight cask, cover them with wood ashes—that is, fill up the cask with the ashes—moisten steadily with water, cover and, after the cask has stood one season, the contents will come out in the spring dissolved, and prove far better than so much guano.

It is claimed that warts on cows and horses can be removed by simply rubbing them occasionally with hog's lard. They disappear, as if mysteriously. It is easy to try.

A well-to-do farmer's wife at Cedar Rapids, Iowa, has a remarkably sociable manner of crusading. She stands in the streets and throws a brick through the window of a saloon.

It is said that the reason that rabbits have short tails, is because they were the last to enter the ark, and old Noah slammed the door on them and cut their tails off.

London had in the second week of August 91,000 paupers, and the births in the same city for the same week were 2,365, while the deaths were only 1,368.
