DR. WOODS ON BEER.

Dr. J. T. Woods, three years in the United States service as surgeon in charge of important brigade and division hospitals, five years professor of physiology in the Cleveland Medical College, now chief surgeon of the Wabash system of railroads, says:

I have never had reason to think that any beneficial results came from the use of beer as a common drink. It does not follow because we cannot measure results that there are none. That beer is foreign to nature's demands is plainly evident. The whole organism at once sets about its removal. Every channel through which it can be got rid of is brought into active play and does not cease its efforts until the last trace is gone. The reaching of a certain end depends entirely on the frequency of the repetitions. The whole is made up of the parts; each and every drink counts one. These ones added together make the wreck, and to secure this result it is only necessary to make the single numbers sufficient. I do not see how to secure any one from its effects. In short, each leaves its footprint in one way or another, and the idea that because you stop before you stagger the system takes no note of the damaging material you put into it is a ruinous delusion. That confirmed beer drinkers are especially unpromising patients on whom to perform surgical operations, I am sure all practical surgeons will agree. There can be no question about it.

A Jewish rabbi in St. Louis was detected in illegal wholesale liquor dealing not long since and placed under \$500 bond. The rabbi declared that the drink was "pass-over" whiskey. The detectives found a quantity of stationery which stated that the rabbi was agent for wines, liquors and tobacco. The detectives said they had evidence that he had been supplying some fifty Jewish grocers in that city with various liquors.

The members of the Ocala Temperance Reform Club participated largely in the meeting yesterday afternoon.
