J. T. Bradley issues the last number of the Solomon City Times this week. He is convinced that Solomon is too dry a place for a good newspaper. He will continue there in the practice of the law. It is said that that profession keeps him very busy. We shall sadly miss the smiling countenance of the Times.

Horrible: We saw Maffitt the other day, in an unexcited manner, leveling his shooting instrument at a country-man. He was shooting rays, or gathering them or doing some sort of such thing, in his endeavors to make a picture. Dear reader he will do the same thing for you if you wish and do it up "brown."

The Greelcys are on the rampage. They propose to have an organ in Salina. They are canvassing the town for a campaign paper and have already received enough patronage to insure the success of the sought-for object. There is nothing like it. Let us have the paper and see what merit there is in the white hat. The paper is to be christened the Salina Tribune.

Mr. D. D. Dare Saturday closes out his entire stock of furniture at auction. The furniture is some of the best stock brought to this country and consists of bureaus, bedsteads, lounges, chairs and all goods in the line. Mr. Dare goes to Beloit and the stock will be sold. As he will find no competition there he thinks to be better suited in trade. Our good wishes go with him.

T. H. Derrington has a frisky team and that frisky team exhibited its friskiness by galloping friskily down the avenue on Monday without the consent of its owner and driver. It went like lightning to the corner of Ash street and Santa Fe, when it was "brought up standing" by the side-walk, the tongue of the wagon having fallen and taken purchase under the walk. No damage luckily was done to the team and only the doubletree of the wagon was broken.

One of the sensations of the day is the departure in the late hours of night of a handsome girl who was to have been married the day following to a very worthy young man in Salina. The denouncement is not yet made known. Whether she was spirited away by some rival "lover" or whether she voluntarily disappeared in the shadows of night to escape the sometimes irksome chains of matrimony, is a tale to be told by some one other than the writer hereof.

Quite a number of our Texas cattle traders are going to Brookville to live. J. M. Forehand and R. F. Doughton are making arrangements to build a stable there. Several new buildings are to be put up immediately. The desire of the Texas seems to be to make a lively trade there this summer. The stock yards at Brookville are very commodious and well constructed, which is sure to make that town a good shipping point. Brookvilleites are counting heavy good business and easy times, for this season at least.

Strawberry short-cakes! Who does not like them? In the long ago, we went after each day, lamed our spinal column in stooping to conquer those luscious berries, and crawled over numberless acre plots in picking them, till our nether garments were scarcely better than those of the sans culottes. However, our unremittent toil was handsomely rewarded by a mother's light, brown, rich, sweet, luscious and perfectly spiced short-cake. It is not that little berry now. "Little berries" does not have half a chance for losing its annual tax on the red berries in this otherwise favored land.

Copious draughts of pure, unadulterated rain descended upon "this ere landscape" last evening affording much satisfaction to tillers of the soil and greatly discomfiting all the croakers. It seems certain that this supply of moisture will make the yield of the crops certain. All the farmers look good about their eyes and even their gaits are more business like and not one half so weary as before. The raininess of the season has just come at the right time, so far. Many crops will go through to the harvest time without another drop. A drought will not be one of the plagues of this country this summer at any rate.

George has it! Probert has it! What? The nicest and costliest soda fountain in the State of Kansas. It is from Tuft, the Arctic man. Polar bears and ice bergs compose the crest. "The Zenith" is its cognomen. The favorite combination of this style is with body of Italian marble, relieved by upper panels of nine different kinds of marble. It is adorned by heavy silver plated pillars extending from the black marble base of the apparatus to the top, and the whole is surmounted by a fountain of running water in a tented glass, upon which rests a silver cup supporting a Parian marble statuette. In artistic effect, finish, and in excellence of workmanship it is unsurpassed by any apparatus of its size in the market. Drink deep from this fount and be satisfied. It is a beauty.

A gay and festive bachelor of the Esculapian profession has been catechised severely the past week concerning a jewel which has customarily adorned his manly breast, but by a sort of ledgerdom, has become superimposed upon the feminine breast of a "hash slingist." His answers were evasive, clothed somewhat in poetry and in imagery, and not at all satisfactory to a discriminating and intelligent public. Pope has it: "What dire offenses from amorous causes spring." This however has not the least application to either the jolly masculine nor the pretty feminine in question. We will consult the oracles concerning this phenomenon and faithfully report the revelations. Until that time we earnestly hope the poignancy of sarcasm will be withheld by "the boys" that the M. D. may have peace of mind for a season.

King City, McPherson County, Kans., June 17th, 1922.

Editors Salina County Journal: Judging from news recently received here, the people of Salina and vicinity are under the impression that King City is about to be, or partly has been removed to the new town of McPherson near the center of the county. Now then, since such reports are afloat, we make it a special business to inform the people otherwise, through the columns of your paper. Not one house has yet been moved to the town site of McPherson, and it is not at all likely that there will be soon, if at all. There was considerable excitement manifested by some of our citizens, but it is fast dying out. And while we wish our new-town men success, we also advise them not to count their "chickens before they are hatched." As for the county seat they will hope give other towns a chance. The people in the southern part of our county are not generally favorable to McPherson.

A correspondent of the Topeka Commonwealth writing from Raymond, Rice County, says: From here to Salina is sixty-five miles; the Kansas Pacific railroad company propose to build a road from Salina to this place. It is through one of the best and most lovely counties in the state. \$375,000 in county bonds can be secured enough to grade and bridge the road. The Kansas Pacific will only have to put on the iron and operate the road.

Some More Railroad. When other people come to you and ask you to let them build railroads to your doors, you may consider yourselves of some size and importance. This is not exactly the case we seek to state for Salina, but we wish to chronicle the fact that diverse interests, from a similar direction, were represented yesterday in our city, asking the assistance of Salina in each of their projects.

First came Hon. C. C. Hutchinson, of Hutchinson, Reno county, author of the renowned "Resources of Kansas," and an impromptu meeting was held at Seitz's drug store at 10 A. M., in this special interest. Mr. Hutchinson spoke at length and portrayed the many advantages of the road desired. The route is from Salina, through McPherson county, to Hutchinson and the salt springs of Southwestern Kansas, the route eventually to proceed to the great cattle region of Western Texas. His statements were received with a great deal of interest, and he impressed the people with the advantages in such a railroad. He said that his county feels the necessity for the road and would assist the road in a fair amount.

After dinner, another meeting was held at Judge Prescott's office for the incorporation of the Salina, Atlanta and Southwestern railroad company. There were there the redoubtable Col. Sam Wood, Col. J. M. Steele and other gentlemen on the proposed road. The road, as its name signifies, is to go from Salina to Atlanta and Raymond, Rice county, to the salt plains of Southwestern Kansas and into Western Texas. Col. Wood was the principal speaker and demonstrated clearly the feasibility and importance of the road. Rice county, he and other gentlemen told us, had submitted a proposition to vote one hundred and seventy-five thousand dollars, and there exists no doubt of its carrying. The meeting was an interesting one and fore-shadowed the desires of the people of Rice county.

Our own ideas are more favorable to the Hutchinson route. By way of Hutchinson there is more settled and older country, and an excellent agricultural section. The towns are established beyond a decrease and they and the counties will continue to grow. This can hardly be said of the towns on the Atlanta route, their trade is not fairly divided and other towns may take the trade now ours. The moves already inaugurated would seem to predict the building of a railroad north and south by way of Salina. Salina county stands in the position of being able to aid a good road and we do not question but she will do it when such case presents itself. In either event, when a railroad is built from Salina south, another will tap it from the north, or a road from the north will cause the building of one to the south. The prospects of Salina, we take it, for a north and a south railroad are first class.

The Celebration at Lincoln Center. At a meeting of the citizens of Lincoln center, held on the 13th day of June, A. D. 1922, for the purpose of completing arrangements of a previous meeting held at Lincoln Center on the 6th day of June, 1922, for celebrating the coming anniversary of our National Independence, the meeting was called to order by Henry Vernon, Esq., and thereupon Walter S. Wait, Esq., was chosen as chairman and L. W. Metcalf secretary.

Meeting adjourned sine die.

WANTED.—To trade two or three milk cows for town lots. Enquire of J. W. Daily, M. D., Salina, Kansas.

Brand, shorts, middlings and chicken feed in large or small quantities at the new Water Mill—very cheap.

WHERE TO EMIGRATE.—We answer, go to Southwest Missouri, because the Atlantic and Pacific Railroad Company offer 1,300,000 acres of land to actual settlers at low price and on long credit, besides furnishing free transportation over this road to purchasers; this road extends from St. Louis, through Missouri, to Vinita, Indian Territory, and is being pushed rapidly to its destination (the Pacific coast). It will be one of the trunk lines of the country—never blockaded by snow. The lands along the road are in a rich, fertile country, as productive as any in the State; the climate combines all the advantages of northern and southern latitudes; good climate, soil, health, water, timber, grazing, fruits and flowers, invite you to go to this region. For further information address A. Tuck, Land Commissioner, 523 Walnut street, St. Louis, Mo.
