RAINFALL

Slightly Below Average During August.

Temperature Exactly Same as That of the Month Last Year.

While the month of August was exceedingly dry and warm, exciting considerable remark, yet it is a fact that it compares fairly well for rain and mildness of temperature as compared with records for the same month during the past 13 or more years.

A remarkable co-incident is that the temperature for the month just ended corresponds to the exact figure with the record of August, 1888.

Prof. H. V. Egbert, of Buchtel college, speaking on the subject, said to a reporter for the DEMOCRAT Friday morning that the rain fall for the month had been 2.58 inches; average for the month, 3.40. The month has a deficit of .82.

This means that the rain fall during the month has been less than usual; but that the drouth has not been excessive, is shown by the following figures: Rain fall in August, 1888, 1.83 inches; 1893, 2.43; 1894, 2.28; 1896, 1.54.

The average temperature for the month has been more than normal, being 72 degrees. During July, the highest temperature reached was 94. During August, on the 19th ult., the temperature was 94, and on the 20th, 96, this being the highest temperature reached at this point during the summer. On seven days of the month the temperature was 90.

...NOTICE...

Some of the magnificent exhibition booths located on Main st., between Market and Mill sts., are not yet rented. From this day on they are free to every one, as the preference first accorded to business men outside of the Fair District expired on Thursday, August 31st. The charges for the privilege and the booths, including decorations and light, are exceedingly reasonable. This is a splendid opportunity for such wide awake business men as will know how to make the best of such a rare opportunity. Thousands of people will throng the streets on the days of the Fair.

The space on the east side of Main st., between Mill and Quarry, is also at the disposition of the committee. No booths will be erected there but this space will be rented out to such parties as may wish to put up tents, galleries, or any other exhibits of a reputable character, at a reasonable figure.

The secretary of the executive committee, H. L. Snyder, is now located in a booth opposite The M. O'Neil & Co.'s store on Main st., where applications for space can be made.

ALARMED.

Feared Copley Swamp Fire Would Spread.

Several Acres of Maple Timber Have Been Destroyed.

Copley swamp, three miles west of the city, is on fire, and about noon the situation was grave enough to cause some of the residents of Sherbondy Hill considerable fright.

About five acres of maple timber were destroyed, and considering the fact that the grass and herbage in the fields between the swamp and the city was very dry, it was feared that the fire might spread to the city. But since the rain began to fall the fears of the citizens on the hill have been greatly allayed.

The fire started up briskly on Thursday. Although it is at its worst today, the fire has been smoldering for the past few weeks.
