Leakless Inner Tubes
 Goodyear Laminated Tubes
 Built Layer on Layer—Extra Thick

Here is something every motorist should know. Goodyear Laminated Tubes are built of many thin layers—each of pure rubber—vulcanized together. No flaw can be hidden as in a thick piece of rubber. It is seen and eliminated. Every layer is perfect.

Such a Tube can't leak. And our valve patch can't leak, because it is part of the Tube and not stuck on.

Remember that. Many a tire trouble is due to leaky Tubes. Tube prices this year are reduced 20 per cent. So these layer Tubes, extra-thick, now cost about the same as others.

Always Gray
 Goodyear Laminated Tubes are not colored. They are gray—the natural pure rubber color. Color requires a large percentage of mineral adulteration. And minerals hold heat, a Tube's worst enemy.

14% Heavier
 Goodyear Laminated Tubes are extra heavy. They have always outworn any tire. But this year we have added 14 per cent to their average thickness—all pure rubber.
