FORTY NEW FAIR FEATURES SURE

Think of it! Forty new features promised at an Exposition where "features" have always predominated. Yet this is the bold announcement of the managers of the Ohio state fair, to be held in Columbus, August 30, 31, September 1, 2, 3, next, and present indications are that they will fully make good in every detail.

Entries in the competitive departments of the exposition closed Saturday last, with the largest entry list in its history, and not a class in the seventeen distinct departments but what will be well represented. Ohio's reputation as the leading exposition of the Union will not be jeopardized this season if the number and quality of exhibits entered is the testing index.

Magnificent educational exhibits, however, are not all of the coming exposition, as superb amusement and entertainment will be programmed both day and night, including Fairs' Manhattan Beach fireworks; Kopp's military band; Miss Wilma's Harmonica vocalists; Spellman's twenty stupendous shows; ten sterling free feature acts; three daily spirited harness races, while as its leading feature in this line announcement is made that those kings of the turf, Dan Patch and Minor Hoir, will on Tuesday, August 31, meet in a battle royal for the world's speed supremacy.

Other novel innovations of the exposition will be displays of the handiwork of inmates of the various state institutions, affording opportunity for all to become familiar with what Ohio is doing in caring for and educating her wards; installation of a complete domestic science department in the women's building; practical demonstrations of scientific food building; daily lectures by experts on topics of vital importance to agriculturists, and many others equally as interesting as the ones here mentioned.

Never before has such state-wide interest been shown in the exposition, and with the superb entertainment programmed, and the introduction of many novel educational features, it is a foregone conclusion that the coming exposition will outrank any of its predecessors from every viewpoint.

HUDSON AND FULTON

New York is going to pay tribute to their memories after many long years. It has been many years since New York City opened its numerous gates and invited the people of the United States and other countries to come in and celebrate and see the great city at its best.

Expositions, convention gatherings and reunions have been more or less spurned and neglected but now the Manhattanites think they have a real reason for fireworks, parades, speeches and illuminations, and are preparing to celebrate the four-hundredth anniversary of the discovery of the Hudson river and to pay tribute to Robert Fulton, whose steamboat was the forerunner of the great shipping now traversing the waters of the world.

The book contains portraits of Henry Hudson and Robert Fulton and briefly outlines the important events in their respective careers. Its pages contain night and day views of New York City. The principal feature is a double page map in three colors which vividly pictures the approach to the Erie terminals in New York by tunnels beneath the Hudson River and by Erie ferries-boats. On the map, a bird's-eye view of New York city and vicinity are shown, the principal large buildings, the important steamship piers, the European steamship route, and the water route to Boston. The books are mailed upon request to any passenger agent.

THUNDERSTORMS.

The thunderstorm now has its day. It rumbles across the sunny face of the mid-summer heavens. Sometimes it lowers the temperature and fills the air with freshness. Almost invariably it pricks the nerves of your little sister and maiden aunt. It splinters the city flag pole, it demolishes the village steeple, it burns the farmer's barn. But all this does not prevent the thunderstorm from being the most awe-inspiring phenomenon which nature ordinarily shows to man. The city dweller, scurrying impotently through caissons of masonry, does not have more than a hint of the true grandeur. One should be upon a hilltop or on a broad lake to realize the omnipotence of the storm.

The air is sultry. Great white "thunder-heads" plannate the heaven. Dark clouds bulk upon the horizon. These are indeed lightning. The dwarf can be heard as their howling on distant mountain peaks. The sun is overcast. The storm rushes onward. A glowering copper tinge marks its center. A hush broods over the lake's unrippled waters. Suddenly comes a blast of wind as if from the puffing cheeks of a giant. Then like a marching white waterfall—the rain. It pelts upon the lake until the drops seem to rebound. The thunder has ceased its rumbling. Now it comes with the lightning in a terrible zig like the tearing of a sail. Thus the storm mounts to its crescendo, steady, waxes, dwindles and fades—rumpling away across the countryside. The sun creeps out. The heavens shine with fresher blue. The universe is purified. If all this be not majestic there is none in nature.—Collier's Weekly.
