Through the wheat crop in Ohio is a poor one this year the crop of the United States is a big one. The estimate of the wheat crops of the United States is placed at 800,000,000 bushels. It is asserted that with the beginning of September the receipts of wheat in Minneapolis will be 3,000 car loads per day and that this will continue until August 1913. The estimate is 400,000,000 bushels with a like number of bushels of spring wheat. September wheat in the Chicago market sold Tuesday at 92 cents or a drop of over 30 cents from recent quotations. Every school teacher in the state will be interested in a ruling given to State School Commissioner Frank W. Miller by Attorney General Hogan. If teachers desire to make a voluntary contribution they may do so. "I see no objection to officers of institutes receiving from teachers who voluntarily desire to make a contribution in order to provide for a greater number of instructors, better means of instruction, or the continuance of the institute over a greater period," said General Hogan. "This, however, should be explained to the teachers in advance."

Ray soon saw a suspicious looking fellow on the street, tackled him and in a short time the fellow confessed and gave up the mesh handkerchief. In the meantime Marshal Wining had been notified of the theft, and the fellow had hardly been released by Todd before Wining had him. Before Squire Weaver the young man pleaded so earnestly his first offense at go with another mother that he was let go with a lecture that would stir a heart of stone. He is to report to the Squire once a month how he is doing. When you see or hear that an agent of any kind is in the vicinity look the doers.
