MOB VIOLENCE A FAILURE.

The New York Herald notes that the strikers at various places who have resorted to mob violence to keep closed the works where they left their employment are losing it. It is nearly always the case. The strike that begins with mob violence is lost at the beginning. The sympathy of the public is soon alienated from strikers who practice mob violence and when public sympathy is lost a strike is hopeless.

The best weapon in the hands of strikers is justice, not dynamite, six-shooters or bludgeons. The public may be depended upon to lend its sympathetic aid when the cause of the strikers is just and when they rely upon justice alone. The wanton taking of human life or the wanton destruction of property or the unnecessary interference with the comfort and convenience of the innocent public must certainly injure the cause of labor, however reasonable or just its demands may be.

The people have a horror of violence and the men who indulge it soon fall under their indignant disapproval and the cause in whose behalf it is invoked soon shrivels in their regard. This has been so often shown we marvel that a class of agitators have not long since learned the wisdom of better methods.

The recent strike for suffrage in Belgium illustrated fully how quickly public opinion comes to the rescue when a cause is just and properly conducted. Nearly half a million men stopped work, but the leaders took every precaution to guard against violence. Turbulent spirits were given to understand that the great cause at stake could not be established through force and that disorder would not be tolerated.

Within a few days the battle was won and the men went back to work, having secured everything for which they contended, and a new era was ushered in for them and their country.

How different it would have been if the leaders had encouraged anarchy. The Belgian army would have put down the strikers, thousands of lives might have been lost and their cause would have been suppressed for half a century.

Mob violence is a failure. Truth and justice are sure. The greatest enemies of labor are the agitators who encourage murder and destruction of property.

What Counts. What counts is what we feel within, not what we do without.—Life.
