NEW BUFFALO

July 19—Here is a caution to drivers who go along the road across the bottom near Nathan Bieber's, west of the bridge. For a distance of 300 or more feet the dirt is washed away underneath and is not observed by many drivers and too close driving on the edge, when passing other rigs, is very dangerous. When the dirt is very dry or very wet it gives away easily. If farmers would take the stones they gather from their fields and haul them to the edge or place them on the side of the ditch, it would be a great help and might save some one's life and expense to the township. Wonder why the road from Steamtown to Woodworth has never been some over with a king drag? There are many nice homes along that road and it is traveled considerably. It's bad enough when one has the best of the road to himself, but if necessary to pass another it makes one afraid of breaking something besides being badly shaken up. Another danger is west of the Marquis coal and clay plant. Where they put red ashes on last year it's fine now. They should have gone farther east with the red ashes.
