COMING AND GOING

L. A. Young was over from Ellsworth, Tuesday.

Dr. and Mrs. D. Campbell spent Thursday in Youngstown.

Lee Cunningham of Cleveland visited here with his wife the latter part of last week.

Phil Stratford spent last Sunday at the home of his uncle, Louis Kroeck, in Youngstown.

Matt Lee left the first of the week for New Orleans where he expects to remain some time.

O. S. Walter of Greenford circulated among Canfield acquaintances, Wednesday afternoon.

Mr. and Mrs. Emory Bunts of Ellsworth township were in Canfield several hours Monday.

Mrs. James Clay and Miss Etta Hake spent Wednesday afternoon and evening in Youngstown.

G. O. Eckels of Berlin Center called at the Dispatch office while in the village Monday forenoon.

Mr. and Mrs. J. A. Fleck visited last Sunday at the home of Russel Fleck and wife in North Jackson.

F. W. Calvin of Locust Grove was in the village Thursday morning and paid the Dispatch office a visit.

Mrs. Sarah Sanzenbacher and Miss Mary Obenauf will leave next week for Miami, Fla., to spend some time.

Mrs. Jessie Bryson of Youngstown spent a day last week with her uncle and aunt, Mr. and Mrs. W. E. Rose.

W. E. Rose has resigned as janitor of the high school building to accept a similar one at the Farmers National bank.

Mrs. William Smith has returned home to Obitown after a visit here with her parents, Mr. and Mrs. Thos. Crothers.

J. S. Miller of Ellsworth, one of the leading breeders of Jersey cattle in this county, was a Canfield visitor, Tuesday.

Mrs. Ella Bingham of Warren spent several days the past week at the home of her brother, J. A. Fleck, and wife on High street.

Phil and Elton Stratford pleasantly entertained thirteen Boy Scout friends last Saturday night at their home east of the village.

Mr. and Mrs. J. S. Harding of Ellsworth township and Miss Bernice Buck of this place have returned home from a trip to Alabama, where they went before the holidays to visit relatives.

J. P. Markley, superintendent of the county experiment farm south of the village, is able to be around after a severe attack of la grippe. His wife and children are confined to the house with the disease.

Miss Dorothy Stubbs has accepted a position in the insurance department of the Home Savings & Loan Co., Youngstown. For a time at least she will continue to reside in Canfield, going to and from Youngstown daily by automobile.

C. F. Matteson of Youngstown was in the village Tuesday afternoon. He came to Canfield 39 years ago from Seville, Medina county, succeeding his father as agent for the Ohio Farmers Insurance Co. and has been on the job ever since, but for more than a quarter of a century residing in the metropolis.

Mrs. Angus Cronick of Ellsworth township was in the village Tuesday. Mr. Cronick recently purchased the Moherman property on West Main street and may later occupy same. It was to the Cronick farm that Roy Blott of Green township recently moved, instead of the Barnes farm as stated in the last Dispatch.

Mrs. Annie Osborn and daughter, Miss Elsie, have returned home to Youngstown after spending some time in Orlando and other points in Florida. They were delighted with the beautiful flowers to be seen in the open and greatly enjoyed the semi-tropical fruits which are plentiful and reasonable in price. They met many people from this section during their stay in the southland.

WHAT WOOD ALCOHOL IS AND DOES

A physician contributes this timely information relative to the latest menace:

Wood alcohol, or methyl alcohol, is the product, or rather one of the products, of the distillation of wood. It is similar to ordinary alcohol and is known by the terms of pyrolytic spirit, wood spirit and wood naphtha.

Wood alcohol is a solvent for many substances, thus making it a vehicle for deleterious and noxious substances. Wood alcohol, similar to ordinary alcohol, is narcotic and sedative in its effects.

It occurs in varying degrees of purity and impurity, containing substances which give it its extremely disagreeable odor and taste. It may be purified, in which case it is paraded under fancy names or attractive titles. It is used exclusively as a solvent of varnishes, also in preparation of essences of Jamaica ginger, spirits of essence, bay rum, essence of peppermint, cinnamon and of lemon.

Poisoning by methyl alcohol at the present time seems to be prevalent in parts of the country, due partly to the prohibition laws and partly to the holiday season. The effects of poisoning by methyl alcohol are particularly noticeable in the blindness it produces. While former fatal cases were accidental in character, at the present time substitution for ordinary alcoholic drinks claims first rank.

The symptoms of exhilaration and of excitement are similar to the symptoms produced by ordinary alcoholic drinks, differing only in that the headache, nausea and vomiting are more severe in wood alcohol ingestion; pain over the region of the kidneys, pale-ness of the surface, dilated pupils, restlessness and finally exhaustion, producing death in from two to twenty-four hours.

In cases which survive these symptoms atrophy of the optic nerve and blindness follow. This blindness may disappear in a few days, but it returns ultimately, to become permanent.

Serum measures should be taken to diminish severely the paroxysms of wood alcohol as a drink.

WILL SUPPLY NITRATE OF SODA

Those desiring nitrate of soda can procure it at an approximate cost of \$10 per ton, f. o. b. Canfield. Send your orders at once to the county agent at Canfield with check to cover the cost of the amount of Nitrate needed.

BREEDING STOCK VERY IMPORTANT

Essential Feature in Making Start in Goose Industry is Proper Foundation.

GRASS THEIR NATURAL FOOD

Grain-Fed Fowls Are Loafers, Poor Layers and Eggs Are Infertile—Clover Hay or Alfalfa is Best Feed for Winter.

In starting in the goose industry it is important to get the right kind of parent stock. The essential feature is to get breeding stock from someone who has raised his flock almost entirely on grass. Grass is the natural food for geese, also cheapest. If you buy grass-raised geese they will be active and alert for such food, and will prove good layers of fertile, strong-germed eggs. If you get grain-fed stock you will have a lot of loafers that are lazy and sluggish, that will prove to be poor layers, and a large percentage of their eggs will be infertile.

Best Winter Fed.

Breeding geese should be wintered on clover hay or alfalfa, with a very little grain in the coldest weather. If you have some coarse vegetables, such as mangels, rutabagas or Swedish turnips, you need not give them any grain. After they begin to lay, which should be from February 12 to 20, you can mix bran or shorts with cooked vegetables to good advantage. This ration will help in egg production, but need not be continued after grass starts. The goslings will need no other feed if they can have grass. If at any time you do have to feed them something else, use hard boiled eggs, or bread squeezed out of boiled milk. Corn-bread is better than wheat bread. Start them on grass when possible and continue them so, and you will usually raise all your hatch.

Breeding Stock.

Old females from two to twelve years old are best for breeding, though it is advisable to use young ganders from two to five years of age.

Select those that have a large frame and are broad across the back. Get them mated before the middle of February or earlier. Do not attempt to give more than two females to one male. It is better, though not absolutely necessary, to have each mating yarded separately during breeding season, as they are inclined to fight. Set the first dozen or thirty eggs under good-sized hens, four or five to the hen. You can let the goose set on her second or third laying. Frequently the third or fourth

Grass Pasture is Essential for Geese.

layings will only be partially fertile, so many prefer to allow them to lay only about twelve eggs, which are taken away, then let them set on the second laying. After they are through laying they may be plucked once or twice.

Shelter for Geese.

The matter of housing for geese is not of so much importance as with most other kinds of poultry. They should have a dry place, fairly well protected from the northwest winds, and should have some straw or leaves to roost on, but usually they will care for themselves if protected from horses and colts.

TO ONE WHO TAKES A LIKING TO THEM,

goose raising becomes a pleasing industry, and can be made a very profitable one on most any farm—one that can be conducted on either a small or a large scale. If pasture is to be had there need be no limit to the size of the flock, except help to care for it.

INBREEDING VERY INJURIOUS

Best Plan to Introduce New Tom of Unrelated Blood Each Year in Turkey Flock.

Inbreeding of turkeys is very harmful, resulting in loss of vigor and vitality. Therefore, each year a new tom of unrelated blood, but of the same type and species, is necessary. Nothing is gained by cross breeding and much is lost, as it soon reduces purebreds to mongrels.

HOUDAN FOWL TERMED QUEEN

Possesses Elegant Carriage and Form—is Good Layer and Splendid Bird for the Table.

The Houdan fowl may be termed the queen of the French farmyard. Not only has an elegant carriage and form, and a gay and enticing plumage, but it also has all the practical qualities that one could wish in a fowl. It is a good layer, easy to fatten, and their flesh is of a delicate flavor.

Ambiguous.

Hostess—It's beginning to rain. You'll get wet. I think you'd better stay to dinner.

Departing Guest—Oh, dear no! It's not raining so badly as all that.—Sydney Bulletin.

Defined.

Tommy—Pop, what is retribution? Popley—Retribution, my son, is something we are sure will eventually overtake our people.—Philadelphia Bulletin.

It isn't until he builds a house on it that man's man is disinterested with his lot.

Headache

THOUSANDS OF WOMEN suffer miserably from periodic attacks of headache, never dreaming that a permanent cure may be had. Headache nearly always results from some disorder of the stomach, liver or bowels. Take Chamberlain's Tablets. They will correct these disorders and there will be no more headache. Many have been permanently cured by Chamberlain's Tablets.

THE KITCHEN CABINET

"You had ventured deeply, but all must do so, who would deeply win." "So many worlds, so much to do; So little done such things to be."

VARIETY IN DIET.

What we need to stress in these days is a larger variety or more attention given to food combinations and seasonings. The average housewife confines herself to a few dishes and repeats them so often that the family rebels. Where there is infinite variety from which to choose, even for the simple liver, it shows lack of progression to continue with monotony.

In the serving of meat, fish or game the sauce which accompanies it is most important. Commonly such foods are well cooked, but an appropriate sauce served with the dish is not so common.

With fish the favorite sauce has some acid to make it appetizing. For sweet and sour highly seasoned sauce formed from stock as a basis are liked, although sweet sauces also hold favor. For a thick, juicy broiled steak there is nothing more tasty than Maitre d'Hotel Butter.—Put one-fourth of a cupful of butter into a bowl and cream it with a wooden spoon; add half a teaspoonful of finely minced parsley and lastly, adding very slowly, three-fourths of a tablespoonful of lemon juice.

A sauce which makes a dish of boiled or steamed fish out of the ordinary is Olive and Almond Sauce.—Melt three tablespoonfuls of butter, add the same amount of flour, and when well mixed add one cupful of white stock. Cook until smooth and just before serving add half a cupful of cream, one-fourth of a cupful of shredded almonds, one-half cupful of beef extract, eight olives, stoned and cut in quarters, half a tablespoonful of lemon juice and salt and cayenne to taste.

As a garnish for duck or a salad to serve with game, sliced oranges with a well-seasoned French dressing is especially good.

A most tasty tomato sauce may be prepared by using a cupful or less of the canned tomato soup. It is strained, seasoned and slightly thickened, so with other seasonings for variety, the sauce is ready to serve.

Wagons, Buggies, Harness, Blankets, Ties, etc. Auto tires and tubes. Harness and shoes repaired. Auto tops recovered and curtains repaired. Rubber Carriage tires applied. Phone 81. J. W. Johnston, Canfield, O. 35-4f

A farm of 130 acres located on new macadam road, 3 miles southwest of Canfield, at cross roads known as Toot's Corners. This is an excellent farm; good buildings, large silo. Write P. J. Crockett, 1450 Clarence Ave., Lakewood, O. 35-4f

ADMINISTRATOR'S NOTICE

Docket 23. Page 87. Notice is hereby given that Joseph F. Williams, Youngstown, Ohio, has been appointed and qualified administrator of the estate of Manio Jelleff, late of Poland township, Mahoning county, Ohio, deceased by the Probate Court of said county. All persons interested will govern themselves accordingly. July 6, 1918. JOHN W. DAVIS, Probate Judge of Mahoning county, Ohio. 85-2

Don't ruin the spare tire on your new Ford—get an exhaust deflector at Fowler's Garage, Canfield.

It is surprising how slow a watch can run in church.

Buy Your Ford Car Now

To make sure of getting a Ford car, buy one now. Don't wait until spring but buy now while deliveries are possible. Even next month is an uncertainty.

The number of Ford cars allotted to this territory is limited and specified. Even to get our allotment, we must have real, bona-fide orders for cars. Just so many cars allotted to us; just so many will get cars; will you be one of them? Those who order their cars now will be protecting themselves. If you would be forehanded, get your name on an order today.

Don't think you cannot use it if you get it now. The four seasons are all alike to the Ford car. It is a necessity every month of the year. Besides, the Ford car is lowest in upkeep cost and easiest in operation. And the new Ford electric starting and lighting system makes driving more convenient. Your order for open cars will have our prompt attention.

Keep Cow Troubles in the Background

Your dairy can be healthy and profitable with but little care and expense on your part—if you just exercise the same "first aid" principles as you would use in your own family. Do not wait until a cow is non-productive; the intelligent use of Kow-Kure will prevent the diseases that sap her life and vigor.

Cows frequently need medical attention, and in most cases you can supply the need yourself with the aid of KOW-KURE—just as thousands of the best dairymen have been doing for over twenty-five years.

Kow-Kure has made many a poor milker profitable. Do you have a cow that is worth the expense of a package of Kow-Kure to prove for yourself what it will do? This well-known cow medicine has a positive action on the digestive and genital organs—a preventive of disease and a sure, quick remedy for such common cow ills as Abortion, Barrenness, Scouring, Lost Appetite and bunched. Use before and after calving. Kow-Kure is a sure preventive of milk fever and Retained Afterbirth. 60c and \$1.20
