U. S. TRADE INCREASE

Report Shows Record-Breaking Foreign Business in 1920.

Exports to the Leading Allies in the War Fell Off Sharply, Says Commerce Department.

Washington, D. C.—Increased trade with Germany, South America, the Orient, West Indies and North America accounted in large measure for the record breaking foreign business of the United States in 1920.

A compilation of American exports and imports last year by countries, issued by the department of commerce, shows that exports to Great Britain, France and Italy fell off sharply. Those countries, however, increased their shipments to the United States, as did practically all the other important nations.

American trade with the four principal South American countries—Brazil, Argentina, Chile and Uruguay—totaled approximately \$1,044,000,000, as compared with \$917,000,000 in 1919. American exports to these countries increased more than \$100,000,000 during 1920, totaling \$457,000,000, whereas imports from these countries increased only about \$25,000,000, the total being \$582,000,000.

Trade with Germany during the year nearly quadrupled, aggregating \$400,000,000, but fell far short of that before the war. Exports to Germany reached \$311,000,000, against \$89,000,000 the year before, and imports from that country totaled \$92,000,000, as compared with \$10,000,000 the year before.

American trade with Cuba alone in 1920 exceeded \$1,200,000,000, increasing nearly \$500,000,000 when compared with 1919. Exports of \$515,000,000 to the island republic showed an increase of \$247,000,000, while imports of \$721,000,000 from the republic presented an increase of \$303,000,000.

Spain was the only principal European country which increased its purchases of goods in the American market.

SNEEZE, STUDENTS GET GATE

Offenders in Boston School Sent Direct to Physicians for Examination and Treatment.

Boston.—Sneezing in a classroom at Massachusetts Institute of Technology drew the gate for the offender.

Orders from Dr. George W. Morse, head of Tech's new medical department, instructed members of the faculty to send sneezers and coughers directly to the school clinic, where they can be taken care of.

The epidemic of infectious colds, the order says, has brought the doctors to this drastic step. Not only those who give audible evidence of the possession of a cold through a cough or a sneeze, but even those who, perhaps through an over-red nose, apparently are in the grip of the thing are to be sent to Doctor Morse.

CHEROKEES FORGET OLD ROW

Indian Nation Reunited After Split Over Slavery at Time of Civil War.

Talequah, Okla.—Tribal differences dating back to the Civil war, when the powerful Cherokee Indian nation broke into factions over the question of slavery, were wiped out here when several hundred delegates met and unanimously elected Levi Gritts of Muskogee, a full-blood, as principal chief. Levi Cookson, a mixed blood, living near Gore, Okla., was chosen assistant chief.

For the first time in the history of the nation white men, members through intermarriage, sat at the council and voted. Many of them were unable to speak Cherokee and the proceedings frequently were halted while translations were made.

SPEED CRAZE HITS INDIA

Three Cartloads of Motorcycles Arrive at Jellalabad for Dispatch Service.

Bombay.—Life in Afghanistan is speeding up, writes a frontier correspondent of the Times of India.

Three cartloads of motorcycles have recently arrived at Jellalabad for Prince Kasir Jan, the director of communications, who intends to organize a dispatch rider service throughout the country.

Orders have been issued by the Amir's government for contracts to construct macadamized roads through the country to the capital, and for the importation of automobile vehicles. Firms are also invited to establish woolen mills and sugar refineries at Kabul, the capital.

Seeks to Calm Married Life.

Seattle, Wash.—Justice of the Peace C. C. Dalton announced his purpose to establish a court of domestic relations for adjustment of family troubles under the Washington "lazy husband" act and cases of desertion and non-support.

It will be the first domestic relations court in Washington.

Mennonites to Settle in Mississippi.

Winnipeg.—An agreement has been concluded between representatives of an American land syndicate and H. M. Klausner, representing Mennonites of Manitoba, Canada, whereby they will purchase 125,000 acres in Mississippi for colonization, a newspaper in Winnipeg has announced.

TWO MILES OF AIRPLANES

Impressive Welcome That Was Given to General Nivelle on Kelly Field in Texas.

When the first sentry at Kelly field saluted Gen. Robert Georges Nivelle the word was passed to the waiting airman and as General Nivelle's car rounded hangar No. 1 he saw a line of ships that stood wing to wing, from hangar No. 1 to No. 24. A line of SE-5s, De Havillands, Fokkers, Spads, Curtiss, JN-6 Hg., Capronis and Handley Pages, every plane in working order, with its crew and pilot lined up in front.

The general rode down the entire line. When he returned to the reviewing stand the word of command was given and the big line of pilots and mechanics simultaneously broke, and from hangar No. 1 the bark of a single S-E. was the signal for the entire line of ships to "come to life," and they did. Three minutes later there was not a single dead motor on the line and the first-pursuit formation was already out on the field ready to take off. They were followed by three other S-E. formations; then the De Havillands rounded off. The formation circled the field and passed over the reviewing stand. The highest formation was 2,000 feet, the lowest 500.

There was a typical Texas northern in action, with a thirty-five mile wind from the ground, and naturally it was a little bumpy. You who have flown in Texas know what that means, but the formations were all close and some excellent stunting was carried on despite conditions.

The A. S. M. S. contributed pilots to a pursuit and bombing formation. Both formations were low and close and the mechanics' school men showed that, though they were supposed to be more familiar with the monkey wrench than the joy stick, when occasion demanded they could handle both in a more than passing manner. —American Service Bulletin.

MIGHT HAVE "WON" THE ROLL

Colored Man Did His Best, and the Matter Ended Without Harsh Feelings.

Somewhere in Chicago today a good-natured negro is suffering passive disappointment, for he very nearly "won" some money yesterday.

A reporter was passing along Sheridan road near Irving Park boulevard when he noticed a small roll of money. As he reached for it a slim and sniling negro jumped out of a doorway and said:

"Just a minute, boss, I just missed it. It's mine, mister."

The finder turned to one side, saw how much there was in the small roll, and asked:

"How much did you lose?"

"Let me see," said the negro, still smiling and looking thoughtfully up in the air. "Hout, let's see, now, Oh-h-h-h, say 'bout 'leven dollars."

"Wrong," said the reporter. "This amount is nothing like that."

"Well," said the negro, shrugging his shoulders, "the best I could do, boss, was try. You win!"—Chicago Herald and Examiner.

Greek Rulers Unfortunate.

The modern kingdom of the Hellenes—as Greece is officially known—has had five rulers. Not one has served until his natural death or voluntary abdication. The first ruler, president of the abortive Greek republic, organized before independence was entirely assured, was assassinated. Otto, prince of Bavaria, who was given the throne in 1832 was deposed in 1862. Prince George of Schleswig-Holstein, who was then called to the throne, ruled for fifty-one years, but was assassinated in 1913. His son, Constantine, was deposed in 1915 because of his sympathy for the German cause. The death of Alexander, who succeeded Constantine, was due to an unusual accident.—National Geographic Society Bulletin.

Desired Money's Worth.

Five-year-old Noel had been taken to the dentist to have three teeth extracted. He was duly exhorted by the dentist on "setting up like a little man and not having to be held, etc." And Noel proceeded to do so. Not a whimper escaped. Still smiling, he slipped into his coats as father paid the dentist. When he saw the exchange of money Noel asked, "Dad, what did he charge?"

"Three dollars—a dollar a tooth," father replied.

"Oh, shoot!" Noel was plainly disgusted. "If I'd a known he was going to charge like that I'd had to be held and yelled like everything."

New Sterilization Process.

The new process of sterilizing milk developed by Prof. J. Martin Beattie of the University of Liverpool is claimed to kill all bacteria without the alteration of taste produced by pasteurization. An electric current is passed quickly by a special apparatus, raising the temperature of the milk not higher than 148 degrees Fahrenheit, and producing no cooking or alteration of the essential properties of the material.

Fish-Skin Leather.

Fish-skin leather has been so successful in imitating that made from animal hides that it is now almost impossible to distinguish between the two kinds. The bureau of fisheries and the bureau of standards at Washington are now trying to discover a simple and easy way of detecting the difference.
