

The Modern Architect

would not ask for the "kind of Light" desired in a plan for a new house; he would proceed to arrange for

Electric Light

Yet many Canton homes still use inferior forms of illuminants. Why? Because electric current and electric equipment was not so accessible when those buildings were erected.

Today electric lines reach the majority of Canton houses.

Electric equipment and electric service are within the reach of nearly every family's income.

As the use of electric current service increases, its rate decreases.

It's the light of progressive Canton.

Phone 256 for our Representative.

LIGHTING

Bid Accepted by Board of Public Service, Nothing Doing

ABOUT THE GAS LAMPS

The first meeting of the members of the board of service for a week took place Monday morning, Messrs. Lauffer and St. Clair having returned from their trip to Washington, where they went with Superintendent Ohlinger to attend a water works convention. They took up the lighting proposition at noon, when a bid was received from the Canton Electric company for furnishing all-night electric lights in the city, instead of many that were lighted only upon what is known as a moonlight schedule.

There are 346 of these moonlight schedule lights and the company made a proposition to allow them to illuminate all night and every night for the sum of \$459.75 in addition to the amount that they have been paid, providing that the contract will begin July 1, 1908, and will continue until April 16, 1915. It was also stipulated in their bid that the arc lights would be lighted on an all-night schedule during the month of June entirely free of cost to the city. A resolution was adopted instructing the clerk of the board to communicate with City Solicitor Blake and have him draw up a contract in accordance with the proposition made by the electric company. There was but one bid in for electric lighting in the city, the present company being without opposition. Nothing was done in regard to the lighting of the remainder of the city, which is covered by a system of gas and gasoline lights, although the present contract expired last April. For the present the old contract is still in force, but members of the board say that the question will come before them at some other time.

The board has decided to ask the council for an appropriation of \$500 for the purpose of enlarging the bear enclosure in the zoo at Nimisla park, as Park Superintendent Brooks thinks the present pen is entirely too small for the keeping of the family of Mr. and Mrs. Bruin, which now consists of six members. He desires to have the mother and father removed from their offspring, as at times the male bear takes a notion that his family is too large and attempts to kill the cubs.

Superintendent Ohlinger will take up the matter of looking after the trenches that are filled with stagnant water in the old Union dam property, complained of at a recent meeting of the board of health.

The mid-month's bill of the different departments under the control of the board were allowed, as were the salaries of the many employees.

GARDEN CLUB

Has Been Formed for Members of Boys' Department at Y. M. C. A.

E. C. Myers, superintendent of the boys' department of the Y. M. C. A., has formed a boys' garden club for the season. Each member of the club is to have a garden and raise any thing that he desires to in it. There will be prizes for the best kept garden and for the best products from the gardens. The boys have gone into the work with enthusiasm and some of the gardens are already planted and the rest will be in a day or so. L. H. Koch has offered a camera for the best garden and it is on exhibition in the boys' rooms at the Y. M. C. A. Other prizes will be given when the season is over. The leaders of the department will make inspection tours every week to see how the work is progressing and to decide who will get the prizes at the end of the contest.

Mr. Myers stated that it was his intention to get a tract of ground of about two acres and plat the ground into gardens for the boys, but the lateness of the season prevented his carrying out his designs and he is of the opinion that the individual gardens at the boys' homes will answer the same purpose.

MOTHER'S DEATH CAUSE OF INSANITY

Worry over his mother's death has caused Herman Klinefelter to go insane and it was necessary to take him to the Massillon state hospital Monday afternoon at 3 o'clock. About the noon hour Mayor Turnbull received word that the man had either dropped dead or taken another fit at his little place in Maple avenue and a coach was sent there to take him to the city prison. He was unmanageable and the patrol wagon had to be sent for, the mayor and Detective Brisbin assisting in the care of the man. After witnesses were examined Monday afternoon it was decided that the man was a fit subject for the hospital. While in the city prison he spent his time in singing religious hymns.

High School Poet Writes Song.
Charles Zink, class poet of the present Senior class of the High school, has written a poem which has been set to music by Prof. Daniel, supervisor of music in the public schools. The poem is a very creditable one and set to music makes a pleasing song. It will be used for the concluding number at the commencement exercises of the class.

The music for the exercises will be furnished by the class. There will be mixed male and ladies' choruses, two of each during the program.

COAL LANDS LEASED

Salem, May 18.—The B. & B. Fuel and Coal Company has the past week leased hundreds of acres of coal lands between its present property on the Main street road and the railroad lines of the Y. & O. and Pennsylvania on the Franklin road. The completion of a mammoth project by the company will, it is said, entail an outlay of one million dollars. It has closed a deal for the triangle of land near the Franklin road crossing of the Y. & O., this at one time being a proposed site for the removal of the Buckeye and also a manufacturing site for a Milwaukee company, which at the time was promoted by Dr. Phillips and Attorney Coburn.

It is said to be the intention of the company to sink a shaft on the Franklin road at a point between the Y. & O. and Ft. Wayne and then tunnel back to the present shaft on McKinley avenue. In addition to this, it is the intention to build an electric railroad underground by which hundreds of tons of coal can be taken out daily for shipment over the Y. & O. and Ft. Wayne. This will be a distance of nearly two miles and it is said to be the solution of the problem which the company has been up against since the shaft was first sunk. There have been schemes as to the way the coal could be gotten to the railroad, the last one being to use the local electric line. By the latest move this idea seems to have been given up.

In case this project is completed it will give employment to hundreds of men and be a big thing for the city and company as well. It will also probably mean the location of a little village at the Franklin road and Sells Crossing. Work on the immense project will, it is said, start in the near future.

SCORES PROHIBITION

Chicagoan Says Law Applies Only to Poor—Nothing Touches Rich.

Toledo, O., May 18.—Clarence S. Darrow delivered a scathing arraignment of the prohibition forces here this afternoon before an immense audience. In the course of his speech he said:

"Regulate the political conduct of the working man by his personal conduct alone. Destroy the hope of liberty in man and you assassinate the human soul. The working man needs all the liberty he can get. He does not always use it well, neither does the other fellow.

"These people are like John Calvin. He knew much of the kingdom of heaven, but little of the kingdom of earth. The great trouble of such men is that they attempt to tackle the kingdom of which they know so little.

"Prohibition only prohibits the poor. I can get all the liquor I want if I have the money. It does not touch the rich. Nothing touches the rich."

Bellefontaine—A. Blackwood, who has been held on suspicion in connection with murder of C. Melish of Selo, has been released; murder still a mystery.

WOODEN LEG

Saved Man From Drowning in Turkeyfoot Lake, Massillon Attorney Helps

SAVES THREE LIVES

Akron, May 18.—Clarence McLean and Attorney Roy Wilson of Massillon, saved three men from drowning in Turkeyfoot lake Sunday afternoon in the midst of the storm by prompt action with their power boat. A cripple who was in the overturned boat was kept up by his wooden leg until help arrived.

The three fishermen were from Massillon. Their rescuers did not know them except that one was named Ewald and another Heck. They hired a boat at Kepler's landing and were some distance from the shore when the terrific storm that swept over the county Sunday afternoon struck the lake. The waves were several feet high and the boat was swamped and the occupants turned into the water. All three could swim a little and struck out for shore.

Wilson and McLean were the only other persons on the water and were a quarter of a mile away when they heard the cries of the three men. Throwing on the full power of their motor they fought the waves until they reached the scene of the upset. Two of the swimmers were on the point of exhaustion when they were drawn into the launch. The cripple had made his way half of the distance to the shore and had gone under. His body was kept up by the buoyancy of his wooden leg which prevented him from sinking. He was pulled into the motor boat and revived after reaching shore. All three men recovered and were able to go home in their wagon.

TWO EAGLES KILLED IN GUERNSEY COUNTY

Two eagles, one a magnificent specimen measuring almost seven feet from tip to tip, and the other a young one, were killed in the southern part of the county yesterday. The larger one was killed by John Deeren, a farmer living near Derwent, who upon hearing sounds in the yard at the rear of his house suspected something was wrong. Quickly catching up his rifle he left the house and was very much surprised to see a large eagle sailing through the air and carrying in its talons one of his sheep. Quickly taking aim, Mr. Deeren shot the eagle which fell to the ground with the animal near its feet.

The second bird was shot in the right wing and caught by T. F. Slay, proprietor of the large department store at Byesville. He captured it near Hartford and had it on exhibition in one of his show windows last

night. These birds are exceedingly rare in Guernsey county and the two specimens are attracting much attention.—Daily Jeffersonian.

DEMOCRATS WILL RUN SPECIAL TO DENVER

The Democrats of Ohio who are planning to attend the National Democratic convention at Denver from July 7 to 15 are invited by the Duckworth club of Cincinnati to travel on the special train which will go to Denver under the auspices of that club. The excursion is open to all delegates, Democrats, families and friends of Ohio and vicinity.

The special train will leave Cincinnati on July 5, and will proceed to Denver by way of Chicago, and Omaha, Nebraska, reaching Denver on July 7. Here various side trips will be arranged, though the main interest will center about the convention. Among the proposed trips are those to the Garden of the Gods and to Pike's Peak. Stopover will be allowed both going and returning. The return trip will be made by way of St. Louis.

The entire trip, including railroad fare, meals, hotel, carriages, side trips, etc., will cost \$59.50. It is likely that a number of Columbiana county Democrats, among them T. S. Arnold, will go to Denver on this excursion.

NOT A DEMOCRATIC PANIC.

Just \$105,000,000 poorer today is the United States government than it was one year ago. We trust implicitly, if not wistfully, that no harsh remarks will be made about the Democracy causing the gloomy condition which now exists. There have been exceeding great politeness and a tone of converted sympathy shown by the Republican brethren in discussing panics and Democratic stupidity in its relation to business depression. In 1893 it was different. Then the Harrison administration had depleted the gold supply, had prepared the plates for a bond issue and later came a panic. At once the Democracy was held accountable for producing it, although it was encountered at the front door coming in. We prayerfully hope that by no twist of the wrist and legerdemain during the campaign Democracy will be charged with the prevailing business depression.—Findlay Courier, May 14.

Rush for Building Permits.

Fine weather for erecting homes caused a slight rush for building permits Monday. Those issued were to F. A. Tolleston, Bluff street, two residences, \$1500 each; Joseph Tolleston, Bluff street, residence, \$1500; B. T. Bender, West William street, addition, \$15; Samuel Glodde, Hurford street, residence, \$400; W. G. Mulford, West South street, residence, \$1000; Charles M. Jollat, Highland avenue, residence, \$500.

Port Clinton—By digging hole through jail wall, J. Reilly, charged with breaking into Ohio Rifle association club house, gained liberty.

Canal Dover—Gottlieb Stuckey, 67, dead of heart disease.

Full Food Value

cannot always be determined by chemical analysis alone.

A "true food" contains tissue-building, heat- and energy-making elements, and certain natural elemental salts—Phosphate of Potash, etc., (in wheat and barley)—without which new brain and body cells cannot be formed.

That's why

Grape-Nuts

is a "true food"—is more readily absorbed than any other—and is RETAINED BY WEAK STOMACHS when even water or milk is rejected!

CLEARED AWAY

Proper Food Put the Troubles Away.

Our own troubles always seem more severe than any others. But when a man is unable to eat even a light breakfast, for years, without severe distress, he has trouble enough.

It is small wonder he likes to tell of food which cleared away the troubles.

"I am glad of the opportunity to tell of the good Grape-Nuts has done for me," writes a N. H. man. "For many years I was unable to eat even a light breakfast without great suffering.

"After eating I would suddenly be seized with a terrible attack of colic and vomiting. This would be followed by headache and misery that would sometimes last a week or two, leaving me so weak I could hardly sit up or walk.

"Since I began to eat Grape-Nuts I have been free from the old troubles. I usually eat Grape-Nuts food one or more times a day, taking it at the beginning of the meal. Now I can eat almost anything I want without trouble.

"When I began to use Grape-Nuts I was way under my usual weight, now I weigh 30 pounds more than I ever weighed in my life, and I am glad to speak of the food that has worked the change."

"There's a Reason." Name given by Postum Co., Battle Creek, Mich. Read the little booklet, "The Road to Wellville," in pkgs.

PRACTICAL, PERSONAL TESTS are of far greater worth than any laboratory estimate of Food Value, and the large number of extreme cases wherein no other food could be retained proves

"There's a Reason"

for
