GERMANY PAYS SOME MORE

Payments Through J. P. Morgan & Co. Total \$55,000,000
(Associated Press)

New York, Sept. 7.—The total of reparations money thus far paid by Germany through this center was brought up to \$55,000,000 by the recent deposit of \$5,000,000 with J. P. Morgan & Co. for the account of the Bank of England and the Belgian government.

Payments are being made here in accordance with terms prescribed by the Reparations Commission, primarily because the United States is virtually the only country operating on a gold currency basis and for the equally important reason that "dollar" or American exchange now is the most valuable and available medium of international remittance.

CO-EDS BUILT A HOUSE

They Worked Hard But They Did What They Planned
(Associated Press)

Determination on the part of the co-eds at the Michigan Agricultural College built "The Flower Pot." That is its trade name. Literally, it is a "practice house" for senior students in the home economics course. It ranks as one of the two or three campus practice houses in the country.

GIVE 'EM ANIMAL SHOWS

Parliament Members Bewildered By Animal Trainers
(Associated Press)

London, Sept. 7.—Westminster, where the British parliament sits, recently has assumed the appearance of the approach to some zoological garden or animal show, much to the amusement of passersby and even to dignified members of parliament who have not been able to resist the temptation to stop and look on.

It all came about through the debate in the house of commons of a bill intended to prevent cruelty to trained animals. Aroused by charges that trainers universally employ harsh measures in teaching their animals to do tricks on the stage, the trainers themselves have made a combined assault on the gates of parliament. Some of them have been admitted to give testimony before a committee, but none has succeeded in introducing his animals because of a ban placed by the speaker.

This prohibition against bringing animals into parliament has resulted in street performances usually at lunch hour when commons might most readily be attracted to the spot.

"State capitalism," he says, "is incomparably higher economically than our present economic system—that is one point, and secondly there is nothing in it that is terrible for the Soviet government, for the Soviet state is a state which guarantees power to the workers and the poor."
