

NO SUCH THING AS A TYPICAL AMERICAN

BY FREDERIC J. HASKIN. Washington, July 5.—There is no such thing as a typical American—typical in physiognomy, stature, figure, complexion and the like? Scientists of the Smithsonian Institution say there is not, and they ought to know for they have been making an exhaustive study of the question for a period of eight years. There is a tendency toward the development of an American type of man or woman, but that is all.

In the extensive investigation of the physical and physiological features of the oldest and most American element in the population of the United States some 1,700 individuals were examined. Only healthy men and women ranging in age from 24 to 65 years and with at least three generations American born on each parental side were included in the study, and most of them were subjected to examination under standardized conditions and with the best instruments as well as care at the National museum.

"Difficulty in finding 'specimens' who would fill all the requirements explains the length of time required for the investigation. It was found necessary to make trips to parts of New England and into the south, and in the end the individuals chosen may be said to represent all walks of life and all occupations. An especially interesting group was found among the mountaineers of Tennessee and neighboring regions, where an unusually large percentage of the people are said to be of direct American descent for many generations.

Not the least important feature of the study was the determination of the temperature, pulse and respiration standards of these representative 'old' Americans. Physiologists and anthropologists will find the result of this phase of the work very valuable as figures arrived at may be accepted as standards. The mean temperature, taken at rest, the subject seated and with the thermometer under the tongue, was 98.6 for the men and 98.8 for the women. The mean pulse under similar conditions was 71 per minute for the men and 74 for the women. Mean respiration was 13.1 per minute for the men and 13.2 for the women.

Tall stature characteristic. Tall stature is characteristic of these men and women. The average height for the men being five feet eight inches and for the women four feet four inches. This superiority in stature is in part a distinctly American acquisition, and is one of the tendencies noted toward the development of a type.

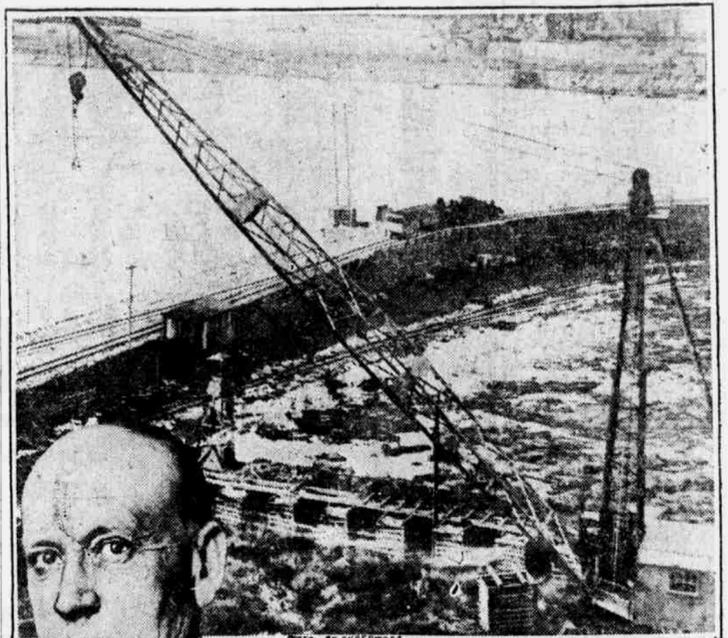

Dr. Alex. Hrdlicka, curator of the department of physical anthropology in the United States National Museum, who had charge of the study, made the first announcement relative to it in a paper read before the Second International Congress of Eugenics at the American Museum of Natural History in New York. In discussing the characteristics of the men and women examined, he said:

"They are mostly relatively 'spare' in early adult life, with rather a tendency to overweight later on. In this connection there appears one serious feature—Many of the younger women are fat. Their bodies are not as well developed as those of the men. The men, in the average, are in every way a fine lot. The non-working women, many of them are physically somewhat neglected, which calls for an improvement. Naturally this does not apply to the farm girl or the athletic girl, or the one whose development has been supervised and assisted in a high-class college; but there is a large proportion who do not fall into these classes, and it is these who show sub-development.

"But the American woman shows a superior head. The size of her head is somewhat above what it usually is in relation to the average head of the male, and it is also perceptibly above that indicated by her stature. As the size of the head means a corresponding size of brain, we have here a highly favorable condition. The form of the head in the old American stock differs widely, according to parentage.

"The tendency toward 'Americanization' is shown by the face. This has lost the prominence

CONGRESSMAN KEARNS SOUNDS WARNING AGAINST HENRY FORD'S MUSCLE SHOALS PLAN

GOVERNMENT BUILT DAM AT MUSCLE SHOALS

CONGRESSMAN KEARNS WHO SAYS FORD IS FOOLING THE FARMERS

Ford promise as designed to gain popular support for his Muscle Shoals plan. The Congressman who sign the report say Ford gives no guarantee to manufacture fertilizer at all.

No Fertilizer Guarantee. "Mr. Ford has at all times steadfastly refused to bind his proposed company in the contract to make fertilizer if certain contingencies should happen," says this latest report on the Ford plan. "Our position is that this is a hollow promise made to enlist the support of the farmers and not absolutely binding on any fact contained in the contract or existing outside of the contract."

If Ford's proposal is accepted, Congressman Kearns declares the company at Muscle Shoals will be given the use of two dams and powerhouses fully equipped for a period of 100 years and it will only be required to pay as rental therefor 4 per cent on \$50,000,000, although the dams will have cost the tax-payers of the country \$67,000,000.

"It must be remembered," says Kearns, "that Mr. Ford does not own these dams but he is given the use of them. Hence if the dams should break the government must stand not only the cost of rebuilding, but must pay any damage that arises in consequence of the escape of this impounded water. How many millions, or even billions, this is going to amount to in the course of 100 years we do not know and neither do you."

If Muscle Shoals is turned over to Mr. Ford, Mr. Kearns says, Ford would not have to pay taxes on the cost of the dams at any time during his 100-year period. The company to be organized by Mr. Ford would be a private company, he alleges, doing business for itself and uncontrolled or unhampered in any way by any utility commission, either State or Federal, except that if this company makes fertilizer it must make it at a profit not to exceed 8 per cent.

If Mr. Ford's proposition is accepted, the Congressman declares, Ford will receive privileges and rights denied to every other man or group of men in the United States.

DUKE CITY-BORN GIRL WILL WED N. Y. CARTOONIST

Miss Carroll McComas, a Prominent Theatrical Star, Will Become the Wife of Walter J. Enright.

New York, July 5.—Miss Carroll McComas, prominent theatrical star, and Walter J. Enright, well known as an illustrator and cartoonist, are to be married tomorrow. They obtained a marriage license at the municipal building today. Mr. Enright said he was 43 years old and lived at 18 Gramercy Park. Miss McComas gave her age as 37.

Mr. Enright, who was born in Chicago, was divorced by Maginel Wright Enright, who is also an artist at Reno, Nev., on September 1, 1920, on allegations of non-support.

Miss McComas was born at Albuquerque, N. M., and is the daughter of Mr. and Mrs. C. C. McComas.

Miss Laura K. Burton left yesterday to attend the Kappa Kappa Gamma national convention of state universities, which convened at Glacier Park, July 1. She is a delegate from the local chapter of the New Mexico state university and will visit friends in Denver and Colorado Springs while on her trip.

FOUND SALE. On Saturday, the 8th day of July, 1922, at 10 a. m., in front of the city hall on North Second street, will sell the following described stock which have been taken up by the pound master:

One sorrel mare, about 5 years old, weighs 700 pounds, hind feet, branded on right thigh. One bay mare, 3 years old, star in forehead, both hind feet white, weighs 650 pounds, branded on left thigh. One bay stallion, 9 years old, weighs 1,900 pounds, blind in right eye, both hind feet white, branded on left thigh.

DEATHS AND FUNERALS

CHAVEZ—Maria Chavez, infant daughter of Mr. and Mrs. Juan Chavez, died last night at their home, 702 West Crowmell, after a short illness. The body was taken to Garcia and Sons' parlors pending arrangements for the funeral.

CHAVES—The funeral of Cater and G. Chaves, 24 years old, who died at Arisco last Monday, will be held this morning at 9 o'clock from the family residence to the Arisco church, where high requiem mass will be said by Rev. Fr. Troy. Burial will be in Arisco cemetery. Garcia and Sons will have charge.

SAPP—Mrs. Emma C. Sapp, 55, died at a local hospital yesterday. Burial at Kensington and near here, with her and will take the body to the home of her birth in Pennsylvania, W. Va. Strong Brothers are in charge.

FARMER—Jesse Farmer, 33 years old, died Tuesday night at his apartment in the highlands. Mr. Farmer was a locomotive fireman and came here from St. Louis. He is survived by his wife and mother in St. Louis. C. T. French is in charge of arrangements, which will be announced later.

BODIES OF TWO ARE FOUND IN CITY PARK (By The Associated Press.) South Center, Kan., July 5.—Tourists camping in the city park at Kensington, near here, today found the dead bodies of a man and woman, shot to death in the park. The bodies were identified as the divorced wife of Warren Wood, of Koningston, and W. J. Allen of Denver, Colo. Mrs. Wood had been shot four times in the back, and Allen had two bullet wounds in his left breast.

Two new inventions are a wireless receiving station in a match box, and a wireless receiver that can be used like a finger ring, with an umbrella as aerial.

A diamond lost in a hotel coal bin was found in ten minutes by a one-eyed employee after ten men, with perfect sight, had searched for several hours in vain.

RAGS WANTED We want good clean cotton rags, good size, no small pieces. Bring them to the JOURNAL OFFICE.

REPORT OF CONDITION OF State Trust & Savings Bank

At Albuquerque, in the State of New Mexico, at the close of business on June 30, 1922:

RESOURCES table with columns for item, amount, and total. Includes Loans and discounts, Bonds, securities, etc., and Other stocks.

LIABILITIES table with columns for item, amount, and total. Includes Capital stock paid in, Surplus fund, and Undivided profits.

LIABILITIES table with columns for item, amount, and total. Includes Capital Stock paid in, Surplus Fund, and Total Demand Deposits.

Theaters Today

"B" Theater—For the last time today, the picture, "Moran of the Lady Letty," with Dorothy Dalton and Rudolph Valentino as the leading stars, is being repeated; also repeating the added attractions, Annette Kellerman in her high-diving feats, and the "Current Events" pictures.

Lyric Theater—"Turn to the Right," great Metro picture, is a drawing card at the Lyric. It is being repeated today; also repeating the play, "Fore," the Goldwyn-Sport-Review comedy.

Pastime Theater—"Jack London's great story, 'The Son of the Wolf,' is the main attraction; also presenting several extra attractions.

PIERCE BATTLE SCENE IN "MORAN OF THE LADY LETTY"; AT "B" TODAY

Fighting on the fore top of the schooner with the vessel rolling and pitching and the mast swaying, is no pleasant job, according to Rudolph Valentino, playing the leading male role and Walter Long, the villainous captain of the heli-skip in "Moran of the Lady Letty," a Paramount picture which is being repeated at the "B" theater today for the last time.

The fight scenes were filmed aboard the ship in San Francisco Bay. The two men were at least sixty feet above the deck. The fight started on deck and continued on up the rigging until they reached the fore top. From there they fought on out to the end of a spar. After a final struggle, the villain drops into the ocean. From this latter shot, a camera was lashed to another spar, and thus a close-up view of the knock-out punch and the fall was obtained.

Dorothy Dalton plays the featured role of "Moran." The picture is an adaptation of the sea story by Frank Norris.

Alice Terry tells how SHE KEEPS FIT AS STAR IN HER SCREEN TRIUMPHS

Alice Terry, the featured player of the Rex Ingram production for Metro of "Turn to the Right," now showing at the Lyric theater, gives the following information on how she keeps in good condition:

"I begin using Cuticura Soap and Ointment after the first week I could see an improvement, and after using three boxes of Ointment, together with the Soap, I was healed." (Signed) Miss Mary A. Mickel, R. F. D. 1, Box 195, Sherwood, Ore.

JOHN W. THOMAS, well-known insurance man of Wilmington, Del., who declares Tanlac promptly overcame his stubborn stomach trouble after running a million following two attacks of influenza. Gains weight and now feels fine.

The flu got me in such a run-down condition life was miserable and work a burden," declared W. Thomas, well-known insurance man, 600 Tattall St., Wilmington, Del., in a recent statement regarding Tanlac.

"Twice I was a victim of the flu," he continued, "the last time about two years ago, and since then I suffered from stomach trouble, nervousness and dizzy spells. After eating, gas on my stomach worked up through my chest and made my heart beat so fast it alarmed me and I nearly smothered. I could never get a good night's sleep and got up mornings with a mean taste in my mouth and all tired out."

"Other medicines seemed to do me harm instead of good, but three bottles of Tanlac rid me of indigestion, the nervousness and dizziness. My sleep is restful and I am feeling like a different man. Tanlac is certainly great."

Tanlac is sold by all good druggists.—Adv.

STATIONARY FIREMEN AT CHAFFEE STRIKE

(By The Associated Press.) Chaffee, Mo., July 5.—Twenty-five stationary firemen and officers, members of the railroad maintenance of way union, went on strike at the St. Louis & San Francisco railway shop here today. The men

acted under orders of the local union chairman, despite the fact that the national maintenance of way union has postponed a walk-out pending negotiations with the United States railroad labor board.

In many places, the hays on the coast of Norway especially, the sea freezes upward—the water freezes at the bottom before it does at the top.

The NEW EDISON

"The Phonograph With a Soul"

Out of all phonographs we chose the New EDISON to lead the Rosenwald Phonograph department because we were convinced by the same tests that have convinced thousands—that it is the ultimate achievement in phonograph invention, construction and equipment; the most perfect instrument; the machine which has passed the mere power of reproduction and that has achieved that marvel of the age—Re-Creation.

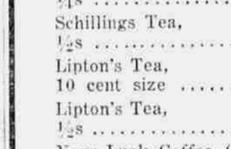

You realize instantly when you stand before the New EDISON and hear that most difficult of all instruments to transfer—the piano, that the Edison has achieved re-creation. No other phonograph can approach the marvel of piano presentation achieved by the Edison. No other phonograph even tries to do so.

And if re-creation can be achieved with the piano—then what can you expect with the violin, the orchestra, the human voice?

Expect all—the New EDISON, the phonograph with a soul, will not disappoint you, for it re-creates in your very presence the music you hear.

For these reasons, aside from beauty of housing, master cabinet work, machinery that is practically "fool-proof" and of utmost ease of operation—we urge you to consider the New EDISON, to hear and test it before you buy a phonograph.

The Edison rooms, third floor, are cool, light, airy. It will be a pleasure to demonstrate the New EDISON for you at any time, or to play any records you may wish to hear. Make the Edison room your rest room during these hot July days. You're always welcome.
