HER LIFE'S SAD STORY

Ruth Hollengren Found This a Bitter World.

SHE DIED AMONG STRANGERS

Born of Aristocratic Parents She Was Early Thrown Upon Her Own Resources and Her Death Was One of Sorrow.

MISSOULA, Jan. 3.—One of the saddest deaths that ever occurred in this city was that of Ruth Hollengren, notice of which appeared in to-day's STANDARD.

The young lady was of Swedish parentage and had resided in Missoula for two or three years. Her parents were of the aristocratic class in her native home, her father being an officer in the royal army.

During her last illness it was frequently suggested that she write to her father, but she refused to do so, saying that her step-mother would intercept the letter and it would be useless.

ONE WOMAN'S EMPIRE

Mrs. King Has a Ranch in Texas of Considerable Size.

BIGGER THAN RHODE ISLAND

About 1,200,000 Acres Under Fence—The Land is Worth \$5,000,000—Countless Flocks and Herds.

Think of it! A million and a quarter acres of land owned by one woman. All in one body and under fence.

An empire in which the state of Rhode Island could be put and there would still be nearly 500,000 acres outside of the state line.

The southern point of Texas is a country of great pastures, says Leslie's Weekly. In Nueces county alone there are 15 persons who own over 100,000 acres of land each.

Mr. Richard King, who died in 1885, leaving to his widow, Henrietta M. King, his vast possessions in land and personal property, was a good specimen of a type that conditions of to-day do not produce.

He was born in 1825 in New York state, and when 19 years old ran away to sea. In 1847 he appeared on the Rio Grande as a pilot, later as a boat owner, and in 1852 he bought what was known as the Santa Gertrudes ranch, a vast possession in itself.

This all went to the widow, a daughter of the late Rev. Hiram Chamberlain, who established the first Presbyterian church on the Rio Grande, and under her careful management the property has increased in value.

Mrs. King is 60 years of age, a lady of kindly instincts and admirable characteristics that have made her greatly beloved by the community.

The division of these pastures will be of great benefit to the country, but it will destroy the entity of a remarkable property as exists in the United States to-day.

It is only within the last five years that any of the owners of these great tracts of land would part with a corner of their possessions. Now many realize that they must give way to the inevitable, and some, sharper than the rest, are pushing colonization schemes that will net them many times the profits from their herds.
