MANY HOURS OF PAIN

Crushed and Half Frozen, Frank Arnold Dies in Fearful Agony.

A WELL-KNOWN COWBOY

He and Mr. Page Were Digging in a Hill After Wolves When a Slide of Earth Fell Upon Them—News Notes.

Great Falls, May 8.—A Benton special of the Standard office says: News has just been received here of the shocking death of Frank Arnold, a cowboy, well and favorably known in this section. Last Tuesday Arnold with a companion named Henry Page, was digging out a hole after wolves in a coulee, 35 miles west of Fort Benton, and while so doing a portion of the side hill slipped down on them crushing them in the trench in which they were working. All night long Page worked to extricate himself and Arnold from the slide and, when near morning he finally dug Arnold out, the latter's legs were found to be paralyzed and his shoulder broken, besides internal injuries. All night long, while pinned by the slide of earth and chilled by the cold, drizzling rain, Arnold shrieked and prayed for death to come to his relief. Wednesday morning at daylight Page started for the camp, eight miles away, and, returning with blankets for a bed for Arnold, lost his way, and all day Arnold lay helpless in the pouring rain. All Wednesday night did Page search for Arnold and finally, on Thursday morning, he arrived at the point where the accident had occurred. Arnold was missing, but a trail showed where the unfortunate man had slid from the bank down through the slushy snow and mud into the hole he had dragged himself by the aid of his uninjured arm nearly 100 feet. Worn out by pain and exposure and drenched by the falling rain for more than 20 hours, he finally expired. Arnold was a native of Iowa, and he will be buried in Fort Benton cemetery.

EGYPT'S NEW ARMY.

Justice Against Military Service Being Rapidly Overcome.

Cairo Letter to London News. In one sense the Egyptian army is being tried in the field for the first time. True, it has already its record of victory. The men who are now concentrating on the upper Nile are a different army from the wretched slave soldiers who fought at El Teb in Baker's disastrous broke, and who followed Hicks to destruction in Kordofan. These were the days when the recruits were dragged in chains to the quarters of the railway station, and when parents destroyed their children's sight or crippled a hand or a limb that they might escape impressment into the army. Now—a new sign of the times—the reservists are coming in without any difficulty, even though they are ordered for service in the once dreaded Sudan.

An Unnatural Proceeding.

Great Falls, May 8.—Gideon Teteault, a Canadian Frenchman, is in jail on a charge of criminal assault, and the complaining witness is his own daughter, a girl 15 years of age, who alleges that her father first committed a criminal assault two years ago and has since continued his devilish work at different times. The girl has been doing housework. Recently the girl expressed a desire to get married to a young man whom she knew. The father objected and the girl ran away from home. She was finally induced to tell the story to the county attorney, who had the unnatural brute arrested and he will be tried at the next term of court.

"Saskatchewan Flour."

BROOKLYN BRIDGE IS DOOMED

When Vibration Ceases the Great Structure Will Probably Fall. From the New York Journal. The Brooklyn bridge is doomed. Civil engineers are speculating now as to its length of life. Their attention has been attracted to it by the discovery that the span of steel structures is much more limited than popularly supposed.

Its life is largely numbered by its vibrations. It has been found that every bridge can stand so many and then the end comes like the sudden stoppage of a human pulse. In his laboratory in Long Island city of period of actual vibrating influences that steel structures are subjected to, is laboring night and day to discover some protection against the dreaded effect of corrosion and rust. His investigations have led engineers to turn their eyes to steel bridges, and more particularly to the Brooklyn bridge, as its life interests two cities. To engineers such structures always appear lifelike, and they refer to their "birth" and "nature" and "ailments" much the same as if they were discussing the anatomy of a human being.

Professor Sabin said when seen: "There are many deteriorating influences which are even sapping the life of the bridge. The principal trouble is the care of the cables, because the other parts which may be affected can all be replaced little by little."

"What precautions have been taken to care for the cables?" he was asked. "I don't know what has been done for them, but I do know that if they are not thoroughly protected against corrosion in some way they will certainly wear away and become weakened."

A railroad engineer who was seen endorsed everything that had been said by Professor Sabin, and added: "The fact of professional men making intricate and abstruse computations as to the probable life of period of actual durability of the bridges does not imply that it is unsafe or in any immediate danger of falling into desuetude or collapse. The question is not a hypothetical one, but is founded upon existing influences that are constantly tending toward deterioration and prospective results. These may have suf-

TRADER REVIEWS.

Dun's Report. New York, May 8.—R. G. Dun & Co.'s Weekly Review of Trade for tomorrow will say: That the exports of \$5,850,000 in gold this week has produced no monetary disturbance is at once proof of the soundness of the financial condition of the prevailing confidence in better things to come. There is a re-

demanded in all industries, and in iron and steel, however, the combination is being generally tested by the refusal of orders, so that the production exceeds the consumption, but the consumption exceeds the new buying. The general irregularity of prices and slackness of demand for finished products do not prevent the marking up of prices by the combinations, but are largely due to doubt whether such prices, as are fixed, can be maintained. Pig iron is weaker at the East. Minor metals are inactive, with copper weak, tin steady and lead slightly lower and American tin plates 30 cents below foreign.

Bradstreet's Report. New York, May 8.—Bradstreet's tomorrow will say: The relatively unfavorable feature of the general business situation this week includes unseasonably cool weather, which at some centers has checked trade. A falling off in demand for lumber at St. Louis and Minneapolis and continued dullness in iron and steel, where, although mills and furnaces are fairly active, there is a continued absence of new orders. The favorable side of the picture includes a marked increase in the total volume of bank clearings, a longer list of staples for which prices have advanced, almost uniform and unexpectedly improved prospects for cotton and cotton crops, and a reflection of the more confident feeling as to the autumn's business in an improved demand throughout the territory supplied by St. Louis, Kansas City, Omaha, St. Paul, Minneapolis, Milwaukee, Duluth and Sioux Falls.

THE MARKET. New York, May 8.—The stock market today showed some improvement in volume of the existing to-day speculation was irregularly distributed and active in spots.

THE MARKET.

Chicago, May 8.—Cattle—The demand for cattle was only fair and sales were slow at an average decline of 59/100. Stockers were active to the extent of the feeding of calves, selling at 10c higher. Sales were mostly 200 to 300 head, the best feeders selling within 50c of fancy heaves and closing only 75c lower than a year ago; bulls, \$1.25@2.25; cows and heifers, \$2.75@3.50; calves, plentiful, the best lots bringing \$4.50.

Hogs—Heavy hogs, \$3.09@3.45; choice mixed, \$3.55; common to prime light, \$3.35 @3.45.

Sheep—Prices were weak and trade slow at \$2.35@3.35 for poor to prime sheep and \$3.25@4.50 for lambs. Few lambs sold lower than \$4, while western sheep brought \$3.80 for choice.

Chicago Wheat Market. There was a fair trade in wheat, chiefly local. Many of yesterday's principal buyers took profits.

Chicago General Market. Close—July wheat, 63 1/2c; corn, 29 1/2c; oats, 19 1/2c; pork, \$7.80; lard, \$4.72; rib, \$4.17. Receipts: Wheat, 7,000 bushels; corn, 113,000 bushels; oats, 144,000 bushels.

Boston Minor Stocks. Boston, May 8.—Boston & Montana, 7 1/2; Butte & Boston, 2.

Boston Wool Market. Boston, May 8.—The Boston Commercial Bulletin will say to-morrow of the wool market: The market continues extremely dull and listless on the eastern seaboard. The only purchases of note have been by Pacific mills. Their buyers have been taking in large lines of quarter bloods at 14 1/2@15c. Quarter bloods have touched the lowest price known in their history. Fine western wools are from 1/2 to 1 cent higher than last year. Sales for the week are 1,235,000 pounds domestic and 208,500 pounds foreign, against 1,138,000 pounds domestic and 47,900 pounds foreign last week, and 1,947,400 pounds domestic and 328,000 pounds foreign for same week last year. Sales to date show 12,530,173 pounds domestic and 8,129,813 pounds foreign, against sales to same date in 1894. Receipts to date show a decrease of 2,308 bales domestic and an increase of 13,962 bales foreign.

Condition of the Treasury. Washington, May 8.—To-day's statement of the condition of the treasury shows: Available cash balance, \$288,848,430; gold reserve, \$119,297,238; silver, \$24,628,842.

The Ernest Brown.

In the early ages, before men knew anything about civilized ways, they lived in caves and had to protect themselves not only from the attacks of animals, but from those of their human brothers as well. The first weapon their unaccustomed fingers shaped was a war club. Experience, however, soon taught them that a deadlier blow might be delivered with a weapon that would cut rather than crush, and they made a hatchet. Then, one day, someone discovered a substance in the secret stores of the good brown earth on which he finally learned to put a keener edge than he had ever been able to chip on his stone hatchet, and the sword was made.

Lawyers as Our Rulers.

From Harper's Weekly. The president and cabinet are all lawyers except Mr. Lamont and Mr. Morton, who are editors. The vocations followed by senators are indicated as follows: Lawyers, 64; business men, 13; farmers, 3; doctors, 1; clergymen, 1; editors, 2; no data given, 6.

The occupations followed by representatives are as follows: Lawyers, 248; business men, 71; farmers, 19; editors, 9; doctors, 6; preachers, 4; printers, 3. Five give no data as to vocation. More than three-quarters of the senate and more than two-thirds of the house are lawyers.

Mr. Thomas O'Connor of San Jose Tells How He Suffered Once, and How He Was Cured by Dr. Sanden's Electric Belt in One Night—Lame Back Has Its Terrors.

San Jose, Cal., March 18, 1896. DR. A. T. SANDEN—Dear Sir: You ask me for a statement concerning my back since I have been using your Electric Belt. I was under the impression I had written you about it, but whether or not I got your letter, I tried everything and all of 14 years as laid as any man could suffer. I could not get on my feet, and if I sat down I could not get up. I tried everything and got no relief till I got your Belt. I received the Belt on the 7th day of last month (February). I put it on the evening of the same day, wore it all night, I had not a pain in the morning. I went to work feeling well and have had no pain since, and don't expect any if I take care of myself. That is the truth, and I am thankful to you and the Belt for being able to do it. You can do as you please with this statement. You know where I live. Yours truly,

THOS. O'CONNOR, 64 South River street, San Jose, Cal.

Mr. O'Connor has probably worn all sorts of plasters and tried everything in the way of liniments, besides the numerous prescriptions the doctors give for lame back, during the fourteen years he suffered—and after all Dr. Sanden's Belt cured him in one night. It seemed almost beyond belief, but the statement is straight from the heart, and it is true. Do you suffer from lame back? Do you suffer from any weakness or pain? If so, discard drugs and plasters and try this famous Electric Belt. Get the book about it, free. Address

SANDEN ELECTRIC CO., 253 Washington street, Portland, Ore.

FOR SALE—RESTAURANT, BAKERY and confectionery store, doing good business; in one of the best towns in the state. Particulars address "Business," Standard office, Anaconda, Mont.
