MONDAY, AUGUST 9, 1897.

Canovas.

THE assassination of Premier Canovas del Castillo by an anarchist is the latest chapter in the tragic history of Spain.

In contrast with the enlightened and progressive conduct of Spain in the assertion of political unity, was its retrogressive and bigoted action with regard to freedom of conscience.

These facts convey a fair idea of Canovas' character. He possessed talent, but he was bigoted, obstinate, tyrannical in the extreme.

As chief of the present ministry of Spain, Canovas has endorsed General Weyler's policy in Cuba, a policy of brutal extermination.

SOME Ohio farmers, says the Cleveland Leader, "are getting almost a double yield of wheat, and they are going to sell it for a big advance over the price of one year ago."

If he received that price. He was so hard up for money to pay taxes and other unrelenting debts that he was obliged to dispose of his wheat at what he could get for it, before the slight rise.

The Gambling Evil.

GAMBLING in Chicago seems to be in about the same condition as it is in Montana. It is prohibited by law. Public opinion is opposed to it and is anxious for its suppression.

THE official statement regarding the climate of Alaska by Chief Moore, of the United States weather bureau, may dampen the ardor of a good many men who contemplate a search for gold.

ACCORDING to the Railway Age, the number of railroads for which receivers were appointed in the first six months of 1897 has been greater than for the corresponding period of 1896.

A man named Wood is spending the summer in the Yellowstone park and occasionally running up to Livingston, making himself conspicuous by his freshness.

Facts in the Case of Andrews.

WORSE and worse is the light in which the Brown university trustees are showing up. It has been alleged in their defense that the reason President Andrews was dismissed was not because of his economic beliefs.

Current Humor.

"Ball tells me that although he has inherited a fortune, he sets his alarm clock for 6 o'clock in the morning same as ever."

"I will be revenged." The guest stared angrily and the hotel clerk smiled with the disdain peculiar to his class.

"I will be revenged." The guest stared angrily and the hotel clerk smiled with the disdain peculiar to his class.

Montana and Montanans.

Mayor Leiser of Anaconda does not seem to be having what the girls would call "a lovely time."

The Montana senatorial fight is showing a disposition to shove itself to the front very early in the game.

Taking it altogether, the races of Butte are as they always have been, one of the leading attractions of that sport-loving city.

We hope those soldiers in the National park who cheered Bryan will not lose their \$12 per month for "offensive partisanship."

A careful man with ten acres of winter apples is more certain of health, home and happiness than one-nine one-hundredths of those who seek fortune in the Klondyke placers.

Great Falls is feeling the influence of the McKinley wave of prosperity. A personal friend of the president stopped there a few days ago and dropped \$200 in a poker game.

The distinguished visitor will find much to interest him in Butte, with its mines and smelters and other evidences of activity and prosperity.

Everybody and their brothers and sisters and the other fellows' sisters, too, have taken to the hills to enjoy a brief respite from the burning, blistering rays of Old Sol and quietness is so supremely desirable that the coal miners of the east can be heard when they strike.

The spectacle of green hills and waving meadows almost untouched up to Aug. 1 is one that is seldom witnessed in Montana, and yet occasionally it so happens.

It local mining circles Mr. Laird will be much missed. His long and practical experience in his profession rendered him an excellent authority on mines, and the company in whose interests he has so long and faithfully labored will find it difficult to procure his equal to fill the vacancy caused by his death.

Patience and a great deal of money are necessary to exterminate wolves and other obnoxious animals. It will not do to suppose that high bounties will exterminate the pests in two or three years.

Bantam Hen Was a Fighter.

Mrs. Benjamin Elliott, whose husband is a breeder of game fowls at Scotch Plains, N. J., was hunting fresh eggs in the henhouse when she threw some bantam hen with sitting privileges from a nest.

A campaigning visit to Montana would be a work of supererogation, as the people of this state demonstrated that they are in hearty accord with Mr. Bryan's financial views when last year, regardless of party consideration, 75 per cent. of them gave him loyal and hearty support in his candidacy for the presidency.

On Monday last, Aug. 2 the Daily Herald, the "Pioneer Daily of Montana," began its 31st year. The Weekly Herald antedates the daily by one year, it having been established in 1896.

Literally thousands of intelligent American citizens are rushing into a country where in a few short weeks the thermometer will range from 30 to 60 degrees below zero, and on special occasions freeze the mercury by way of entertainment.

Catarrh in the Head

A Great Deal of Good Accomplished by Hood's Sarsaparilla.

"My daughter had catarrh in the head and I gave her Hood's Sarsaparilla and she is now entirely well. I gave Hood's Sarsaparilla to the other children and it has done a great deal of good.

Morgan's Place

THE POOR MAN'S GROCERY

- 340 East Park Street, Butte, 342. Now is the time to put up fruit for winter use. Buy your fruit jars now before the prices advance.

FOUND TWO DINOSAURS.

Lizards 50 Feet Long That Could Stand on Their Hind Legs and Eat Trees. From the New York Herald.

The principal work of the members of the expedition has been to unearth fossils of dinosaurs, or extinct lizards, which existed in the Mesozoic age.

Dr. Wortman and Mr. Brown have found two gigantic dinosaurs, each about 50 feet long. They lived about 2,500,000 years ago.

These dinosaurs of the Mesozoic age were all sizes. Some looked much like birds, and it took scientists of great ability to make the differentiations.

Other dinosaurs were very large, some being 50 to 60 feet in length. The largest lizards were herbivorous, while the smaller ones were carnivorous.

The large dinosaurs could stand on their hind feet and reach up into trees for food. They had coats of mail and resembled in some respects alligators and crocodiles.

It is expected that the excavations in Wyoming will result in equipping the American Museum of Natural History with a magnificent collection of these extinct lizards.

The museum has also two expeditions working in Kansas and Nebraska. In the former state the scientists are securing fossils of pterosaurs or pterodactyls.
