

DEMOCRATIC TICKET.

For District or Congress, MARTIN MAGINNIS. For District Assembly, W. W. FLEMINGTON. For the Council, GEORGE DE WOLFE. For the House of Representatives, JOHN F. FORBES, RUD D. LUDWIG, DANIEL O'GRADY.

County Commissioners: WILLIAM KIRKELLA, JAMES H. HARRIS, JOHN S. HARRIS.

Justices of the Peace: A. H. HARRIS, JOHN EDDY, ELIAS LITTLE, T. S. HARRIS.

Deer Lodge County Democratic Ticket: For Sheriff, J. S. HARRIS; For Constable, W. W. FLEMINGTON.

Missouri County Democratic Ticket: For Sheriff, W. W. FLEMINGTON; For Constable, J. S. HARRIS.

Beaverhead County Democratic Ticket: For Sheriff, J. S. HARRIS; For Constable, W. W. FLEMINGTON.

Jefferson County Democratic Ticket: For Sheriff, J. S. HARRIS; For Constable, W. W. FLEMINGTON.

See how it runs. Maginnis' majority, 2582.

The Inter Mountain is still opposing Col. Woodruff for Congress.

Woodchoppers and lumbermen! Vote for your friend, Major Maginnis.

The Republican newspapers refer to it as "the late lamented election in Ohio."

Remember the 7th of November! Let every Democrat be found at his post ready to do his duty.

The withdrawal of Marshal Botkin from the campaign is delayed somewhat longer than we expected.

France refused to fight with England in the Egyptian war. Now, it is said, she will be refused a part in the results of England's victory. The joint control in Egypt will not be refused.

The Brooklyn Young Republicans have expressed their disapproval of the nomination of Secretary Folger by formally refusing to do so.

Governor Foster, of Ohio, is to visit the Indiana Republicans during the week preceding election. Good Foster knows how to make a State Democratic. He proved that in the recent election in his own State.

For Amos, vote for Mr. L. R. Hallist. His business training...

A singular fatality attends the engineering of the Brooklyn bridge. In speaking of it an exchange says: "The first engineer, John A. Roebing, died in consequence of injuries received in building it. He was the first to be killed by the structure."

The great bridge across the Missouri at Hannibal was to have been tested, according to the Minneapolis Tribune on the 21st inst. The bridge is one of the finest in the country—a monument of engineering skill and of the enterprise of the Northern Pacific Railroad Company. It cost about \$1,500,000. The test was to be made with eight locomotives, each with its tender, and all coupled together. These were to be run across the bridge under the direction of Mr. George S. Morrison the engineer who has had charge of the construction from the first. A large number of engineers, experts and distinguished passengers from abroad were to be present and witness the test. It is supposed the test was satisfactory, and that trains are now running across the structure.

Mr. Konward Philip, who was indicted on the charge of having written the celebrated Morry letter, has begun an action against Mr. George Blinn, who made the complaint upon which he was arrested. When asked recently by an interviewer whether he had any other suits arising out of that famous letter he replied that he had a few for libel, aggregating about \$200,000, but such trifles," he added, "are hardly worth speaking of." Mr. Konward Philip will be heard from yet.

A SILLY CHARGE. One charge which Marshal Botkin makes against Major Maginnis is that the latter has done nothing toward securing the admission of Montana as a State. If the charge had been made by one of the hard-boiled boys of the day who condescend to public opinion in political matters it would be laughed at, but coming from a man who is supposed to possess some knowledge of what is required of a Territory before Congress will listen to its application for Statehood, it is more than nonsense. But it indicates the strains to which the Republicans are forced to find something to say against our delegate. The Marshal has his hands full to explain away the damaging charges proffered against him by Major Maginnis concerning the part he has taken to revive persecutions under the old Timber act. Wood choppers and lumbermen want to hear a better explanation than that offered by himself and his henchmen before they will vote for him.

REPUBLICAN TWADDLE. The Inter Mountain has so often repeated the state falsehood that "our mine are turning out silver dollars which will not circulate at home" that it finds it impossible to attempt to discuss the silver question. Every one knows, if the Inter Mountain does not, that our silver dollars do circulate at home and always find glad takers. If former secretaries of the Treasury had complied with the law as they were required to, and had retired the \$200,000,000 of greenbacks of the denomination of one and two dollars, there would be present now for all the silver the United States can produce for the next five years. The silver certificates which

are taken every day with National and United States bank notes by our banks, business and laboring men, give the lie to this assertion which the Inter Mountain constantly indulges in. A ten dollar silver certificate which a miner receives in part payment for his week's wages may represent that amount of Butte silver in the United States Treasury. It is there to secure the redemption of the certificate whenever it is presented for payment. This certificate buys as many groceries or as much clothing for himself or family as a ten-dollar gold piece and is much more easily handled. The greenback is covered by only fifty cents in the United States Treasury—the silver certificate by four double that amount. Silver dollars do not circulate, indeed. Why do not these Republican mono-metallics say that our mine are turning out gold coins which do not circulate at home and therefore the sale of gold should cease? They know they are from five to ten dollars in gold constantly in the Treasury vaults to one of silver. If the argument is good against the coinage of silver it certainly is against the coinage of gold. When will the Republican twaddle about silver not circulating cease?

A CAVILIER ANSWERED. Over this wretched, light-headed, evading contemporary, in its issue of the 29th inst., taken up another excerpt from the MINER on the silver question, and quotes a portion of Mr. Everts' speech before the International Monetary Conference as an argument against the ground we occupy. He is certainly a very obscure reader who does not see that what Mr. Everts said is not at all relevant to what we said. The ground the MINER took is that no good reason is shown why the United States should adjust the weight of their standard dollar to suit the convenience of foreign powers. We maintain, as do other nations, a system of coinage and are not suffering. We import more gold than we export, and export more silver than we import. We have what gold and silver we want. Our standard dollar buys as much flour, sugar and clothing as the gold dollar. Our finances are in a healthy condition, and though our people are taxed beyond all reason by a Republican Administration for the purpose of supporting and keeping in power the Republican party, they are prosperous, contented and happy.

We have always held that it would be of mutual benefit to all civilized nations to adopt a uniform system of coinage, but if the mono-metallics of England and Germany and the monetary power in the United States will persistently throw obstacles in the way of perfecting such a system we do not see the necessity of our throwing overboard our silver dollar to please them and adopt their pet single standard theory. The repeal of the silver coinage law is advocated by those only who are at heart hostile to silver. The idea of repealing it to bring England and Germany to terms is supremely ridiculous. If we did it they would laugh at our folly and profit by our idleness. Twenty-four millions of dollars more of silver would be thrown annually upon the London market, and its immediate depreciation in value would close every silver mine in Montana. These are stubborn facts, and cannot be gainsaid. The cavalier of the Inter Mountain, in the face of them, will quote Mr. Everts without effect. That gentleman had so little confidence in the favorable results of the monetary conference that he would not attend its second meeting last April. The Inter Mountain has much to say about this conference, what it might do, and what results would flow from its adopting a certain line of action. Such talk is simply nonsense. We catch hares before we cook them. We must have a monetary conference before we may be benefited by its action, and we will never have one of the force of a straw until England and Germany become converted to bi-metallicism. Until then the United States will go right along as she has done since the Democrats wrested the present silver coinage law from the Republican party, coin her own silver and gold, place her own value upon such coins, and snap her fingers in the face of the nations that don't like it. That is the Democratic idea.

REMEMBER. Voters of Silver Bow County remember that a vote for Marshal Botkin and the Republican ticket is a vote for the demonization of silver.

Remember that a vote for Major Maginnis and the Democratic ticket is a vote for the continuance of the present silver coinage law and a protest against the further influx of Chinese coolie labor.

Remember to vote for your friends and against your enemies.

Remember that the Democratic party is your friend.

Remember these facts and vote for Major Maginnis and the whole county Democratic ticket.

BAKER PASHA. It will be remembered that some year ago Col. Valentine Baker was compelled to leave England under a cloud, having perpetrated an outrage in a railway train, the character of which it is not necessary to mention. He was at that time master of his profession and had no difficulty in obtaining a very responsible position in the Turkish army. We now hear of him in Egypt, having unceremoniously left his post without the Sultan's consent, and in reorganizing the Egyptian army he comes directly into the service of Queen Victoria again. Thus the man who a few years ago led England by the nose, and was taken by the head of an army in which many of his former comrades in arms occupy inferior positions. Indeed, truth is often stranger than fiction. The army under Baker Pasha will be well disciplined, efficient and faithful to the interests of England.

Actually split all the gains the Marshal has hitherto made during the campaign. The Republicans have no hope of carrying old Jeff now.

BUTTS' COMMISSIONER. In the Inter Mountain of the 29th inst., appears an account of the stewardship of the person who, through courtesy, has been called Butts' Commissioner to the Denver National Exposition. Of his account we have, at present nothing to say. We will leave it to the Colorado Journal to comment upon his management, because unnecessary, criticisms upon the state of the mining camp of that State. He went to Denver, saw his sights, made a poor report for the Inter Mountain, was a poor representative of Butts' interests, and a weak enemy of the MINER—all on a money raised by a few good-natured, enterprising citizens of this city, and returned, according to his own statement, with two dollars in his pocket. That two dollars would doubtless have been obtained on the line of the Utah & Northern.

But in this follow, his account of his stewardship, and his two dollars' community takes little or no interest and the public generally none at all. The MINER shares the general indifference as to what he did or what he professed to do. Personally he is too insignificant; intellectually too weak and unambitious to occupy the public eye, and we would have him where he belongs—a scavenger of filth and obscenity—if his million falsehoods concerning the action of the MINER in the Denver Exposition matter did not call for this notice. What he says of us personally, is a matter of supreme indifference. Occupying the low social sphere he does his abuse in rank safety and his praise is to be dreaded. We have lived too long in the Territory to be injured by the one or benefited by the other. He is an earnest coward, hence he is irresponsible, and no gentleman cares to dirty his hands with him. For this reason he is still permitted to mingle among men and ply his dirty practice.

He went to Denver. How he happened to be sent has already been noticed in these columns. If he possessed the first instincts of a gentleman he would have suffered his right hand to be cut off before he would have accepted the commission, knowing as he did that his appointment to that position was opposed by a large number of respectable and influential mining and business men of Butte and vicinity. But he did accept and because the MINER did not choose to go into contest over his selection, it and its editor have been the targets for his puny shafts. We can stand all these if the reason of the Inter Mountain can. We have only one way to treat such a fellow when in our way, otherwise we pass them by unnoticed.

We feel compelled to ask pardon of our readers for devoting so much space to the notice of such an unworthy object, and promise them if they will forgive us that the columns of the MINER will not be clogged by the mention of his name.

THE SILVER DOLLAR. The New York Times is a Republican journal. It is sustained by monopolists and corporations, and like all Republican journals that pander to the interests of their masters, it is hostile to silver. Our next door neighbor doubtless receives much of its inspiration upon the silver question, from that exponent of the moneyed interest. In a recent editorial upon "The Glut of Silver Dollars," the Times takes the ground, occupied by all mono-metallics, that "beyond a very limited amount there can be found no practical employment for this coin." The Mining Editor, of the 21st inst., notices this editorial, and dispenses it in the following masterly manner:

"The report of the Director of the Mint, just submitted to the Assistant Secretary of the Treasury, presents some very interesting facts in regard to silver currency question worthy of notice. In regard to the loss sustained by the Government in its compulsory coinage of silver, it is stated that the mints have already followed the policy adopted by Secretary Sherman, and coined a very small fraction over the minimum of \$2,000,000 per month, and at a profit to the Government on this coinage were \$3,487,887 during the past year. This report also shows that the increase in the total circulation during the fiscal year is about \$7,500,000 of which \$3,000,000 is gold coin and bullion and \$4,500,000 is silver. Where the increase in circulation in one year shows twenty-eight millions in gold and silver, and the total circulation is \$7,500,000, it looks as if there would be found more for more than a 'very limited amount' of silver. One other statement bearing upon the silver question is important, though silver considerable light upon the glut of silver dollar. The New Orleans Mint has discontinued during the year more silver dollars than has any other mint at Philadelphia has distributed all its coinage, except a trifling balance. The only accumulation of silver dollars in the United States mints is at San Francisco, where there is a stock of \$4,000,000. There has been but little demand for silver dollars on the Pacific coast, and the cost of transportation is \$10 per year in about \$7,500,000 of which \$3,000,000 is gold coin and bullion and \$4,500,000 is silver. Where the increase in circulation in one year shows twenty-eight millions in gold and silver, and the total circulation is \$7,500,000, it looks as if there would be found more for more than a 'very limited amount' of silver. The New Orleans Mint has discontinued during the year more silver dollars than has any other mint at Philadelphia has distributed all its coinage, except a trifling balance. The only accumulation of silver dollars in the United States mints is at San Francisco, where there is a stock of \$4,000,000. There has been but little demand for silver dollars on the Pacific coast, and the cost of transportation is \$10 per year in about \$7,500,000 of which \$3,000,000 is gold coin and bullion and \$4,500,000 is silver. Where the increase in circulation in one year shows twenty-eight millions in gold and silver, and the total circulation is \$7,500,000, it looks as if there would be found more for more than a 'very limited amount' of silver. One other statement bearing upon the silver question is important, though silver considerable light upon the glut of silver dollar.
